In the weeks after D-Day, the

level of artillery action in Normandy was unprecedented. In what was a relatively small area, both sides bombarded each other relentlessly for three months, each trying to overwhelm the other by sheer fire power. The Guns of Normandy puts the reader in the front lines of this horrific battle. In the most graphic and authentic detail, it brings to life

---

every aspect of a soldier ' s existence, from the mortal terror of impending destruction, to the unending fatigue, to the giddy exhilaration at finding oneself still, inexplicably, alive. The story of this crucial battle opens in England, as the 4th Field Regiment receives news that something big is happening in France and that after long years of training they are finally going into action. The troop ships set out from besieged London and arrive at the D-Day beaches in the appalling aftermath of the landing. What follows is the most harrowing and realistic account of what it is like to be in action, as the very lead man in the attack: an artillery observer calling in fire on enemy positions. The story unfolds in the present tense, giving the uncomfortably real sense that “ You are here. ” The conditions under which the troops had to exist were

horrific. There was near-constant terror of being hit by incoming shells; prolonged lack of sleep; boredom; weakness from dysentery; sudden and gruesome deaths of close friends; and severe physical privation and mental anguish. And in the face of all this, men were called upon to perform heroic acts of bravery and they did. Blackburn provides genuine insight to the nature of military service for the average Canadian soldier in the Second World War – something that is all too often lacking in the accounts of armchair historians and television journalists. The result is a classic account of war at the sharp end. From the Hardcover edition.

Sheperd Paine did more than anyone to elevate modeling to the level of an art form - one that includes elements of painting, sculpting, research, and storytelling. Building and painting miniature figures, armor, aircraft, and ships with equal skill, and displaying a broad scope of knowledge and interests ranging from the Napoleonic era to WWII, Paine created incredibly detailed and masterfully rendered vignettes and dioramas. This is the first book to examine all of his remarkable work, cataloging it with more than seven hundred beautiful photos, and charting the life experiences that formed these creations in an

Following on from the acclaimed *Whose Beak is This?* and *Whose Feet are These?*, author Gillian Candler and illustrator Fraser Williamson turn to looking at homes. *Whose Home is This?* includes native birds and sea creatures, such as the

yellow-eyed penguin, octopus and crabs. While having fun guessing which native animal lives in the different homes or habitats pictured, young children will learn how animals have different strategies for keeping themselves (and their young) safe. Being encouraged to look closely at the pictures teaches observation skills and children will start to learn more about what makes each animal unique.
