#### **Types of Engineering for Kids' Exploration - TeachEngineering**

Engineers solve problems. They use chemistry, physics, and math to figure out the best way to create new things or to improve a product. The goal of engineers is to design things that can solve economic, environmental, or social problems. There are many different kinds of engineering.

Engineers, like scientists, are simply superb when it comes to solving problems. It is for this reason that if you can envision your kid to be an engineer in the future, you may want him or her to start sharpening his or her logical and critical thinking skills, particularly his or her scientific problem-solving skills.
