Never before had Daniel Bergner seen a spectacle as bizarre as the one he had come to watch that Sunday in October. Murderers, rapists, and armed robbers were competing in the annual rodeo at Angola, the grim maximum-security penitentiary in Louisiana. The convicts, sentenced to life without parole, were thrown, trampled, and gored by bucking bulls and broncos before thousands of cheering spectators. But amid the brutality of this gladiatorial spectacle Bergner caught surprising glimpses of exaltation, hints of triumphant skill. The incongruity of seeing hope where one would expect only hopelessness, self-control in men who were there because they'd had none, sparked an urgent quest in him. Having gained unlimited and unmonitored access, Bergner spent an unflinching year inside the harsh world of Angola. He forged relationships with seven prisoners who left an indelible impression on him. There's Johnny Brooks, seemingly a latter-day Stepin Fetchit, who, while washing the warden's car, longs to be a cowboy and to marry a woman he meets on the rodeo grounds. Then there's Danny Fabre, locked up for viciously beating a woman to death, now struggling to bring his reading skills up to a sixth-grade level. And Terry Hawkins, haunted nightly by the ghost of his victim, a ghost he tries in vain to exorcise in a prison church that echoes with the cries of convicts talking in tongues. Looming front and center is Warden Burl Cain, the larger-than-life ruler of Angola who quotes both Jesus and Attila the Hun, declares himself a prophet, and declaims that redemption is possible for even the most depraved criminal. Cain welcomes Bergner in, and so begins a journey that takes the author deep into a forgotten world and forces him to question his most closely held beliefs. The climax of his story is as unexpected as it is wrenching. Rendered in luminous prose, *God of the Rodeo* is an exploration of the human spirit, yielding in the process a searing portrait of a place that will be impossible to forget and a group of men, guilty of unimaginable crimes, desperately seeking a moment of grace.

Since Darwin's day, we've been told that sexual monogamy comes naturally to our species. Mainstream science—as well as religious and cultural institutions—has maintained that men and women evolved in families in which a man's possessions and protection were exchanged for a woman's fertility and fidelity. But this narrative is collapsing. Fewer and fewer couples are getting married, and divorce rates keep climbing as adultery and flagging libido drag down even seemingly solid marriages. How can reality be reconciled with the accepted narrative? It can't be, according to renegade thinkers Christopher Ryan and Cacilda Jethá. While debunking almost everything we "know" about sex, they offer a bold alternative explanation in this provocative and brilliant book. Ryan and Jethá's central contention is that human beings evolved in egalitarian groups that shared food, child care, and, often, sexual partners. Weaving together convergent, frequently overlooked evidence from anthropology, archaeology, primatology, anatomy, and psychosexuality, the authors show how far from human nature monogamy really is. Human beings everywhere and in every era have confronted the same familiar, intimate situations in surprisingly different ways. The authors expose the ancient roots of human sexuality while pointing toward a more optimistic future illuminated by our innate capacities for love, cooperation, and generosity. With intelligence, humor, and wonder, Ryan and Jethá show how our promiscuous past haunts our struggles over monogamy, sexual orientation, and family dynamics. They explore why long-term fidelity can be so difficult for so many; why sexual passion tends to fade even as love deepens; why many middle-aged men risk everything for transient affairs with younger women; why homosexuality persists in the face of standard evolutionary logic; and what the human body reveals about the prehistoric origins of modern sexuality. In the tradition of the best historical and scientific writing, *Sex at Dawn*

unapologetically upends unwarranted assumptions and unfounded conclusions while offering a revolutionary understanding of why we live and love as we do.

"A beautiful tribute to the power of good teachers."--Terry Gross, Fresh Air "One of the most inspiring stories I've come across in a long time."--Pamela Paul, New York Times Book Review Ryan Speedo Green had a tough upbringing in southeastern Virginia: his family lived in a trailer park and later a bullet-riddled house across the street from drug dealers. His father was absent; his mother was volatile and abusive. At the age of twelve, Ryan was sent to Virginia's juvenile facility of last resort. He was placed in solitary confinement. He was uncontrollable, uncontainable, with little hope for the future. In 2011, at the age of twenty-four, Ryan won a nationwide competition hosted by New York's Metropolitan Opera, beating out 1,200 other talented singers. Today, he is a rising star performing major roles at the Met and Europe's most prestigious opera houses. SING FOR YOUR LIFE chronicles Ryan's suspenseful, racially charged and artistically intricate journey from solitary confinement to stardom. Daniel Bergner takes readers on Ryan's path toward redemption, introducing us to a cast of memorable characters--including the two teachers from his childhood who redirect his rage into music, and his long-lost father who finally reappears to hear Ryan sing. Bergner illuminates all that it takes--technically, creatively--to find and foster the beauty of the human voice. And Sing for Your Life sheds unique light on the enduring and complex realities of race in America.

Many efforts to address the problem of sexual addiction tend to focus on either more commitment or repression of sexual desires. But these strategies do not work, and they diminish the meaning and beauty of sexuality. In *Grace and Sexuality*, the author emphasizes that sexual desire should neither be indulged nor repressed. Rather, healing comes through grateful integration of sexual desire into our lives. As we learn to accept our sexual desires and channel them with love, gratitude and respect, our passions can be rewired. This attitude of grateful integration can deliver us from needless shame for having a sexual nature and enable us to celebrate our freedom from guilt and enjoy our sexuality and closest relationships.

Jacob is a man with an overwhelming attraction to female feet. The Baroness is a clothing designer and evangelical sadist. Roy is a wedding band singer entranced by his step daughter. Ron and Laura are simply in love - only Laura lost both her legs in a car accident, and Ron is beguiled by a beauty many would be blind to. How do we deal with desire? Our own, and the desires of others? How do we comprehend desires that are extreme, or unacceptable? And how do those who have them, live with them? In *A Map of Desire* Daniel Bergner takes us on a journey into human passion suffered, endured, and celebrated. Desire is a sometimes anarchic, sometimes ecstatic, sometimes destructive, sometimes redeeming, and always powerful force. Immersing himself in it through the people whose lives he follows and the scientists he spends time with who are trying to understand it, slowly he exposes and illuminates layers of our humanity.

"A profound and powerful work of essential reporting." —The New York Times Book Review

An important—and intimate—interrogation of how we treat mental illness and how we understand ourselves In the early 1960s, JFK declared that science would take us to the moon. He also declared that science would make the “remote reaches of the mind accessible” and cure psychiatric illness with breakthrough medications. We were walking on the moon within the decade. But today, psychiatric cures continue to elude us—as does the mind itself. Why is it that we still don’t understand how the mind works? What is the difference between the mind and the brain? And given all that we still don’t know, how can we make insightful, transformative choices about our psychiatric conditions? When Daniel Bergner’s younger brother was diagnosed as bipolar and put on a locked ward in the 1980s, psychiatry seemed to have achieved what JFK promised: a revolution of chemical solutions to treat mental illness.

Yet as Bergner’s brother was deemed a dire risk for suicide and he and his family were told his disorder would be lifelong, he found himself taking heavy doses of medications with devastating side effects. Now, in recounting his brother’s journey alongside the gripping, illuminating stories of Caroline, who is beset by the hallucinations of psychosis, and David, who is overtaken by depression, Bergner examines the evolution of how we treat our psyches. He reveals how the pharmaceutical industry has perpetuated our biological view of the mind and our drug-based assumptions about treatment—despite the shocking price paid by many patients and the problematic evidence of drug efficacy. And he takes us into the pioneering labs of today’s preeminent neuroscientists, sharing their remarkably candid reflections and fascinating new theories of treatment. *The Mind and the Moon* raises profound questions about how we understand ourselves and the essential human divide between our brains and our minds. This is a book of thought-provoking reframings, delving into the science—and spirit—of our psyches. It is about vulnerability and personal dignity, the terrifying choices confronted by families and patients, and the prospect of alternatives. In *The Mind and the Moon*, Bergner beautifully explores how to seek a deeper engagement with ourselves and one another—and how to find a better path toward caring for our minds.

What matters most is not IQ, not a business school degree, not even technical know-how or years of expertise. The single most important factor in job performance and advancement is emotional intelligence. Emotional intelligence is actually a set of skills that anyone can acquire, and in this practical guide, Daniel Goleman identifies them, explains their importance, and shows how they can be fostered. "There's a story behind every research study." In Backdrop, Gayle Pitman narrates the "story" behind the science of sexual orientation - a science that has been rife with contradictions and controversies. Pitman argues that, when it comes to sexual orientation research, we could potentially glean more powerful insights from the backdrop of politics and personalities behind the research than from the actual studies themselves. Beginning with a focus on the causes of sexual orientation, moving then to the politics of transgender and intersex identities, and culminating in the political controversies of reparative therapy, "don't ask, don't tell," and same-sex marriage, Backdrop brings into focus the rich and textured landscape behind the scientific research findings. Filled with plot twists and developments, variegated characters (the scientists as well as the activists and reactionaries), and thorny political, moral, and philosophical questions, Backdrop brings the science to life, raising more complex questions while simultaneously providing us with a more nuanced understanding of gender and sexual orientation.

The Fifth Shadow HarperCollins

In this headline-making book, Daniel Bergner turns everything we thought we knew about women's desire on its head. Drawing on extensive research and interviews with renowned behavioural scientists, sexologists, psychologists and everyday women, Daniel Bergner asks: - Do women really crave intimacy and emotional connection? - Are women more disposed to sex with strangers or multiple partners than either science or society have ever let on? - And is 'the fairer sex' actually more sexually aggressive and anarchic than men?
