The mean of a probability  
distribution is the long-run  
arithmetic average value of a  
random variable having that  
distribution. In this context, it is  
also known as the expected  
value. For a discrete probability  
distribution, the mean is given by  
 $\sum (x_i \cdot p_i)$ , where the sum is taken over  
all possible values of the random  
variable and  $p_i$  is the probability  
mass function.
