Lt. Leroy Powder has moved to the Missing Persons department after years on nights. What an opportunity to improve departmental procedures and provide a better service to the people of Indianapolis. If only the Indy Police Department would staff the place properly. Instead they send him a wheelchair-bound sergeant. OK, she's a public hero because she took a bullet for her partner and has refused to retire. So she's tough, but she's still on wheels. How does that qualify her to find a missing wife or identify a woman with amnesia? In Hard Line, winner of the 'Falcon' in Japan, Powder makes do. But he doesn't like it. And he doesn't have to be quiet about the way Missing Persons is being short-changed. And, meanwhile, a series of cases becomes more complicated than they first appear to be. As does Powder's relationship with his son.

What Does It Mean to Fear God? 2Leaf Press

How do you love a person you cannot see? What do you give to someone who has it all? Why is it so important to love the Creator of the galaxies? What does it mean to love God? Jesus taught us that the greatest

commandment given to mankind is to love the Lord with all our mind, heart, and strength, and yet what it means to love God can be a profound mystery. Maurice Roberts explains the biblical meaning of love for God and shows how such love moves us to do many things, from thirsting for God to praying for our neighbor's salvation. He shows that love for God is like a sweet fire that must lift all our hearts, all our souls, all our minds, and all our strength in a holy flame toward God.

The Meaning of Anxiety Wakefield Press

When this important work was originally published in 1950-the first book in this country on anxiety-it was hailed as a work ahead of its time. In the revised edition of this now-classic study, the distinguished author of *Love and Will* deepens his exploration into anxiety theory. Dr. May challenges the idea that mental health means living without anxiety, and he explores anxiety's potential for self-realization as well as ways to avoid its destructive aspects.

Since the birth of evangelicalism in the eighteenth century, it has defined itself as a movement keenly interested in salvation. What, however, has the evangelical understanding of salvation been? What is it today? What should it be? *What Does It Mean to Be Saved?* marshals leading evangelical scholars to probe these questions with the goal of encouraging a more holistic understanding of salvation. Each chapter introduces a distinctive point of view on an aspect of redemption. Issues addressed in the volume include individual and corporate salvation, salvation with regard to women, the poor, the oppressed, and the natural world.

There are many people who experience invisible, and often undiagnosed, disabilities and conditions which affect their everyday lives. On the surface, it might not be immediately obvious that someone perhaps has a different way of thinking, experiencing or processing the world around them. Having an invisible disability usually means that it is difficult to provide concrete, visible evidence for it and it can be perceived as 'not real' by other people. Indeed, some individuals can often be made to feel they are not good enough, and may end up masking or hiding their difficulties in order to just get by in day-to-day life without being judged. In this collection, we introduce and educate Young Minds about a range of "invisible" conditions, for example mental health conditions like Post-Traumatic Stress Disorder, autism, chronic pain conditions, intellectual disabilities, stuttering, and many others. We also highlight some of the wider challenges faced within society, such as the lack of understanding from other people, and discuss how Young Minds can potentially support their friends and family who might be experiencing some of these disabilities or conditions. This collection covers what Young Minds could learn about what it means to have an invisible condition and how it can impact on relationships, education, thinking, communication, emotions, behaviours, and generally navigating everyday life. Further, some people might be unwilling to seek help and share their concerns with others, because they are worried that others don't really understand what life is like for them. We hope that this collection helps those without an invisible condition to think carefully about how they can make the world a more supportive and inclusive place for everyone.

The testimony and teachings of Joseph Ratzinger on the act of faith are particularly urgent for the Church today. Doctrinal confusion and other signs of crisis experienced by believers find their root in a crisis of faith. Understanding what it means to believe is more than an academic exercise; rather, it is a necessary step for authentic renewal in the Church. In *What Does it Mean to Believe?*, Fr. Daniel Cardó outlines the different insights of Joseph Ratzinger on the act of faith—understood as a personal, integral, and ecclesial act. Cardó provides an organic view of the rich contribution made by the Pope Emeritus in his many theological works. *What Does it Mean to Believe?* is also an invitation to appreciate the mind and the faith of one of

the greatest theologians of our time.

What Does It Mean to Be Well Educated? Oxford University Press

A philosopher of science examines the biggest ethical and moral issues in science today, and explains why they matter for all of us -- scientist and layman alike. Science has produced explanations for everything from the mechanisms of insect navigation to the formation of black holes and the workings of black markets. But how much can we trust science, and can we actually know the world through it? How does science work and how does it fail? And how can the work of scientists help -- or hurt -- everyday people? These are not questions that science can answer on its own. This is where philosophy of science comes in. Studying science without philosophy is, to quote Einstein, to be "like somebody who has seen thousands of trees but has never seen a forest." Cambridge philosopher Tim Lewens shows us the forest. He walks us through the theories of seminal philosophers of science Karl Popper and Thomas Kuhn and considers what science is, how far it can and should reach, and how we can determine the nature of its truths and myths. These philosophical issues have consequences that stretch far beyond the laboratory. For instance: What role should scientists have in policy discussions on environmental issues such as fracking? What are the biases at play in the search for a biological function of the female orgasm? If brain scans can be used to demonstrate that a decision was made several seconds before a person actually makes a conscious choice, what does that tell us about the possibility of free will? By examining science through this philosophical lens, Lewens reveals what physics can teach us about reality, what biology teaches us about human nature, and what cognitive science teaches us about human freedom. A masterful analysis of the biggest scientific and ethical issues of our age, *The Meaning of Science* forces us to confront the practical, personal, and political purposes of science -- and why it matters to all of us.

What Did Jesus Really Mean When He Said Follow Me? Wipf and Stock Publishers

In this cogent and accessible introduction to philosophy, the distinguished author of *Mortal Questions* and *The View From Nowhere* sets forth the central problems of philosophical inquiry for the beginning student. Arguing that the best way to learn about philosophy is to think about its questions directly, Thomas Nagel considers possible solutions to nine problems--knowledge of the world beyond our minds, knowledge of other minds, the mind-body problem, free will, the basis of morality, right and wrong, the nature of death, the meaning of life, and the meaning of words. Although he states his own opinions clearly, Nagel leaves these fundamental questions open, allowing students to entertain other solutions and encouraging them to think for themselves.

What Does It All Mean? Little Pickle Press

Why ask this question today? After all, a lot is written about India, her culture, her past, her society, the psychology and sociology of individuals and groups. Why is that not enough? It is because what we have learnt so far is either false or fragmentary. If Indian culture is not a slightly inferior, slightly idiosyncratic variant of Western culture, as the received view has it for a very long time, what else is it? Research into culture and cultural differences gives novel and surprising answers. Written for an intelligent but lay public, this book shares the results of 40 years of scientific investigations in the research programme Comparative Science of Cultures. It transcends the political distinction between 'the right' and 'the left' by looking deeper into ideas on human beings, society, culture, experience, the past, impact of colonialism etc. Today, the question 'What does it mean to be 'Indian'?' is both important and difficult to answer. Is there something 'Indian' about this culture that goes beyond the differences between Hindus, Muslims, Christians, Sikhs or Jains? What does it überhaupt mean to belong to Indian culture?

Enlightenment is not something that can just be handed to you. The closest thing to it that you can receive are thoughts and questions that can lead you inward in the search for meaning. *What Does That Mean?* is full of thoughts and questions that do just that. Some insights you may have thought of and then forgotten, and others you may have experienced but simply haven't appreciated. An old saying asserts that the value of a book is not in what it says but rather in what it does. *What Does That Mean?* is one of those books that will have a lifetime impact on all who read it. The book squarely faces the many inconsistencies held in our systems of belief, from the sciences to psychic phenomena. Eldon Taylor is willing to speak out without reservation, and without avoiding any so-called sanctities. The result is absolutely thought-provoking at every level, as this work addresses the meaning of life and the ultimate "humanness" of the human being. If you have ever questioned the nature of life, the power of the mind, unexplained events, and other mysteries, you will find this book totally riveting. Throughout these pages, Eldon shares life experiences that will lead you to revelations about your own life. Perhaps this book's greatest value is that it assists you in remembering who you really are and thereby places you firmly back on the path to personal enlightenment. English writer and poet Joseph Addison, said, "Reading is to the mind what

exercise is to the body." If that is the case, then this book is the perfect workout to enrich your thinking. You may not always like what you read, but you will always find the depth of thought wholly provocative.

In 2010 Mary MacKillop became the first Australian citizen to be officially proclaimed a saint by the Catholic Church. This event, and the long canonisation process which preceded it, has received much coverage in the Australian media. Yet confusion persists over what exactly it means to be a saint. In this book scholars from the Catholic Theological College of South Australia and the Flinders University School of Theology share reflections from different perspectives: historical, biblical, philosophical, theological, ethical, spiritual, liturgical and personal. Veneration of St Mary MacKillop is set in the context of a tradition which can be traced back to Christian martyrs in the ancient Roman Empire, and which, it is argued, is still meaningful today.

In *What Does It Mean to Be Post-Soviet?* Madina Tlostanova traces how contemporary post-Soviet art mediates this human condition. Observing how the concept of the happy future—which was at the core of the project of Soviet modernity—has lapsed from the post-Soviet imagination, Tlostanova shows how the possible way out of such a sense of futurelessness lies in the engagement with activist art. She interviews artists, art collectives, and writers such as Estonian artist Liina Siib, Uzbek artist Vyacheslav Akhunov, and Azerbaijani writer Afanassy Mamedov who frame the post-Soviet condition through the experience and expression of community, space, temporality, gender, and negotiating the demands of the state and the market. In foregrounding the unfolding aesthetic and activism in the post-Soviet space, Tlostanova emphasizes the important role that decolonial art plays in providing the foundation upon which to build new modes of thought and a decolonial future.
