"On an unnamed island  
country ten years after the  
collapse of a brutal regime,  
Lena suspects the powerful  
senator she was involved  
with back in her student  
activist days may be guilty of  
murder. She says nothing,  
assuming no one will believe  
her, given her family's  
shameful support of the  
former regime and her lack  
of evidence. They are the

Top 10 Book about a blind  
French girl and a German  
boy whose paths collide in  
occupied France as both try  
to survive the devastation of  
World War II. Marie-Laure  
lives with her father in Paris  
near the Museum of Natural  
History where he works as  
the master of its thousands  
of locks. When she is six,  
Marie-Laure goes blind and  
her father builds a perfect  
miniature of their  
neighborhood so she can  
memorize it by touch and  
navigate her way home.  
When she is twelve, the  
Nazis occupy Paris, and  
father and daughter flee to  
the walled citadel of Saint-  
Malo, where Marie-Laure's

---

reclusive great uncle lives in a tall house by the sea. With them they carry what might be the museum's most valuable and dangerous jewel. In a mining town in Germany, the orphan Werner grows up with his younger sister, enchanted by a crude radio they find. Werner becomes an expert at building and fixing these crucial new instruments, a talent that wins him a place at a brutal academy for Hitler Youth, then a special assignment to track the Resistance. More and more aware of the human cost of his intelligence, Werner travels through the heart of the war and, finally, into Saint-Malo, where his story and Marie-Laure's converge. Doerr's "stunning sense of physical detail and gorgeous metaphors" (San Francisco Chronicle) are

dazzling. Deftly interweaving the lives of Marie-Laure and Werner, he illuminates the ways, against all odds, people try to be good to one another. Ten years in the writing, *All the Light We Cannot See* is a magnificent, deeply moving novel from a writer "whose sentences never fail to thrill" (Los Angeles Times).

Mais um romance de sucesso. Verity é perturbador, arrepiante e inesperado. Uma experiência inesquecível. Lowen Ashleigh é uma escritora que se debate com grandes dificuldades financeiras, até que aceita uma oferta de trabalho irrecusável: terminar os três últimos volumes da série de sucesso de Verity Crawford, uma autora de renome que ficou

---

incapacitada depois de um terrível acidente. Para poder entrar na cabeça de Verity e estudar as anotações e ideias reunidas ao longo de anos de trabalho, Lowen aceita o convite de Jeremy Crawford, marido da autora, e muda-se temporariamente para a casa deles. Mas o que ela não esperava encontrar no caótico escritório de Verity era a autobiografia inacabada da autora. Ao lê-la, percebe que esta não se destinava a ser partilhada com ninguém. São páginas e páginas de confissões arrepiantes, incluindo as memórias de Verity relativas ao dia da morte da filha. Lowen decide ocultar de Jeremy a existência do manuscrito, sabendo que o seu conteúdo destroçaria aquele pai, já em tão grande sofrimento. Mas, à medida que os sentimentos de Lowen por Jeremy se intensificam, ela apercebe-se de que talvez seja melhor ele ler as palavras escritas por Verity. Afinal de contas, por mais dedicado que Jeremy seja à sua mulher doente, uma verdade tão horrenda faria com que fosse impossível ele continuar a amá-la. Os elogios da crítica: «Aviso: Verity não vai derreter-lhe o coração... Vai incendiar-lhe a alma.» - Kindle Crack Book Reviews «Isto não é um livro, é uma experiência visceral!» - B. B. Easton, autora bestseller [Flamer](#) Algonquin Books *Springtime in Styria*. And that means war. There have been nineteen years of blood. the scenes bankers, priests and older, darker powers play a deadly game to choose who will be king. War may be hell but for Monza Murcatto, the Snake of Talins, the most feared and famous mercenary in Duke Orso's employ, it's a damn good way of making money too. Her victories have made her popular - a shade too popular for her employer's taste. Betrayed, thrown down a mountain and left for dead, Murcatto's reward is a broken body and a burning hunger for vengeance. Whatever the cost, seven men must die. Her allies include Styria's least reliable drunkard, Styria's most treacherous poisoner, a mass-murderer obsessed with numbers and a Northman who just wants to do the right thing. Her enemies number the better half of the nation. And that's all before the most

dangerous man in the world is dispatched to hunt her down and finish the job Duke Orso started... Springtime in Styria. And that means revenge.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Why I Write, the first in the Orwell's Essays series, Orwell describes his journey to becoming a

---

writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the ‘ four great motives for writing ’ – ‘ sheer egoism ’ , ‘ aesthetic enthusiasm ’ , ‘ historical impulse ’ and ‘ political purpose ’ – and considers the importance of keeping these in balance. Why I Write is a unique opportunity to look into Orwell ’ s mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer ’ s oeuvre. 'A writer who can and must – be rediscovered with every age.' — Irish Times

In The Vision Revolution: How the Latest Research Overturns Everything We Thought We Knew About Human Vision, Mark Changizi, prominent neuroscientist and vision expert, addresses four areas of human vision and provides explanations for why we have those particular abilities, complete with a number of full-color illustrations to demonstrate his conclusions and to engage the reader. Written for both the casual reader and the science buff hungry for new information, The Vision Revolution is a resource that dispels commonly believed perceptions about sight and offers answers drawn from the field's most recent research. Changizi focuses on four “ why ” questions: 1. Why do we see in color? 2. Why do our eyes face forward? 3. Why do we see illusions? 4. Why does reading come so naturally to us? Why Do We See in Color? It was commonly believed that color vision evolved to help our primitive ancestors identify ripe fruit. Changizi says we should look closer to home:

---

ourselves. Human color vision evolved to give us greater insights into the mental states and health of other people. People who can see color changes in skin have an advantage over their color-blind counterparts; they can see when people are blushing with embarrassment, purple-faced with exertion or the reddening of rashes. Changizi's research reveals that the cones in our eyes that allow us to see color are exquisitely designed exactly for seeing color changes in the skin. And it's no coincidence that the primates with color vision are the ones with bare spots on their faces and other body parts; Changizi shows that the development of color vision in higher primates closely parallels the loss of facial hair, culminating in the near hairlessness and highly developed color vision of humans. Why Do Our Eyes Face Forward? Forward-

facing eyes set us apart from most mammals, and there is much dispute as to why we have them. While some speculate that we evolved this feature to give us depth perception available through stereo vision, this type of vision only allows us to see short distances, and we already have other mechanisms that help us to estimate distance. Changizi's research shows that with two forward-facing eyes, primates and humans have an x-ray ability. Specifically, we're able to see through the cluttered leaves of the forest environment in which we evolved. This feature helps primates see their targets in a crowded, encroached environment. To see how this works, hold a finger in front of your eyes. You'll find that you're able to look "through" it, at what is beyond your finger. One of the most amazing feats of two forward-facing eyes?

---

Our views aren't blocked by the “ moving” element into our noses, beaks, etc. Why Do We See Illusions? We evolved to see moving objects, not where they are, but where they are going to be. Without this ability, we couldn't catch a ball because the brain's ability to process visual information isn't fast enough to allow us to put our hands in the right place to intersect for a rapidly approaching baseball. “ If our brains simply created a perception of the way the world was at the time light hit the eye, then by the time that perception was elicited—which takes about a tenth of a second for the brain to do—time would have marched on, and the perception would be of the recent past,” Changizi explains. Simply put, illusions occur when our brain is tricked into thinking that a stationary two-dimensional picture has an element that is moving. Our brains project the future and, as a result, we don't see what's on the page, but what our brain thinks will be the case a fraction of a second into the future. Why Does Reading Come So Naturally to Us? We can read faster than we can hear, which is odd, considering that reading is relatively recent, Proceedings of the Southern Forestry Congress Corwin Press 'Intriguing ... an impressive debut' Shari Lapena, author of The Couple Next Door 'It made me look at marriage in a different light' Jane Corry, author of My Husband's Wife 'T. I guess I always felt even if the world came to an end, McDonald's still would be open. High school sophomore Miranda's disbelief turns to fear in a split second when an asteroid knocks the moon closer to Earth, like "one marble hits another." The result is catastrophic. How can her family prepare for the future when worldwide tsunamis are wiping out the coasts, earthquakes are rocking the continents, and volcanic ash is blocking out the sun? As August turns dark and wintry in northeastern Pennsylvania, Miranda, her two brothers, and their mother retreat to the unexpected safe haven of their sunroom, where they subsist on stockpiled food and limited water in the

---

warmth of a wood-burning stove. Told in a year's worth of journal entries, this heart-pounding story chronicles Miranda's struggle to hold on to the most important resource of all--hope--in an increasingly desperate and unfamiliar world. An extraordinary series debut Susan Beth Pfeffer has written several companion novels to *Life As We Knew It*, including *The Dead and the Gone*, *This World We Live In*, and *The Shade of the Moon*.

A simple and authoritative challenge to the conventional wisdom about AIDS, this newly revised book probes widely held assumptions about the risks, tests, and treatments associated with this controversial disease.

The ideas of the general public—that everyone is at risk, that AIDS is widespread, that HIV is proven to cause AIDS, and that drug treatments or vaccines offer the only hope to resolve health problems

associated with AIDS—are refuted, and new information is presented on AIDS in Africa and recent research on the effects of AZT, protease inhibitors, and combo cocktails. A

recommended reading list and website directory supply tools for further study, and first-person accounts from naturally healthy HIV-positive men, women, and children give the facts a human face.

newest book, Binds That Culturally Responsive Teaching and The Brain Sourcebooks, Inc. New York Times bestselling author, television personality, and host of the #1 podcast "Paper Ghosts," M. William Phelps is one of America's most celebrated true crime authorities. In WE THOUGHT WE KNEW YOU, he takes readers deep into the murder of Mary Yoder, a popular wife, mother, and healer in Upstate New York -- telling a gripping tale of a family drama, a determined investigation, and a killer with the face of

---

an angel. In July 2015, Mary Yoder returned home from the chiropractic center that she operated with her husband, Bill, complaining that she felt unwell. Mary, health-conscious and vibrant, was suddenly vomiting, sweating, and weak. Doctors in the ER and ICU were baffled as to the cause of her rapidly progressing illness. Her loved ones--including Bill and their children, Adam, Tamryn, and Liana--gathered in shock to say goodbye. In the weeks that followed Mary's death, the grief-stricken family received startling news from the medical examiner: Mary had been

deliberately poisoned. The lethal substance was colchicine, a chemical used to treat gout but extremely toxic if not taken as prescribed. Mary did not have gout. Another bombshell followed when the local sheriff's office received a claim that Adam Yoder had poisoned his mother. But Adam was not the only person of interest in the case. Pretty and popular Kaitlyn Conley, Adam's ex-girlfriend, worked at the Yoders' clinic. She'd even been at Mary's bedside during those last terrible hours. Still, some spoke of her talent for manipulation and a history of bizarre, rage-fueled behavior against anyone who

---

dared to reject her. Had Kaitlyn and Adam conspired to kill Mary Yoder, or was the killer someone else entirely? In another twist, accusations were hurled at Bill Yoder himself, ricocheting blame in still another direction... Renowned investigative journalist M. William Phelps details this incredible story piece by piece, revealing a heartless plan of revenge--a scheme that would tear a family apart, divide a community, and result in two gripping, high-profile trials.
