Government Alone Can't Solve Society's Biggest Problems World hunger. Climate change. Crumbling infrastructure. It's clear that in today's era of fiscal constraints and political gridlock, we can no longer turn to government alone to tackle these and other towering social problems. What's required is a new, more collaborative and productive economic system. The Solution Revolution brings hope—revealing just such a burgeoning new economy where players from across the spectrum of business, government, philanthropy, and social enterprise converge to solve big problems and create public value. By erasing public-private sector boundaries, the solution economy is unlocking trillions of dollars in social benefit and commercial value. Where tough societal problems persist, new problem solvers are crowdfunding, ridesharing, app-developing, or impact-investing to design innovative new solutions for seemingly intractable problems. Providing low-cost health care, fighting poverty, creating renewable energy, and preventing obesity are just a few of the tough challenges that also represent tremendous opportunities for those at the vanguard of this movement. They create markets for social good and trade solutions instead of dollars to fill the gap between what government can provide and what citizens need. So what drives the solution economy? Who are these new players and how are their roles changing? How can we grow the movement? And how can we participate? Deloitte's William D. Eggers and Paul Macmillan answer these questions and more, and they introduce us to the people and organizations driving the revolution—from edgy social enterprises growing at a clip of 15 percent a year, to megafoundations, to Fortune 500 companies delivering social good on the path to profit. Recyclebank, RelayRides, and LivingGoods are just a few of the innovative organizations you'll read about in this book. Government cannot handle alone the huge challenges facing our global society—and it shouldn't. We need a different economic paradigm that can flexibly draw on resources, combine efforts, and create value, while improving the lives of citizens. The Solution Revolution shows the way.

An innovation classic. From Steve Jobs to Jeff Bezos, Clayton Christensen's work continues to underpin today's most innovative leaders and organizations. A seminal work on disruption—for everyone confronting the growth paradox. For readers of the bestselling *The Innovator's Dilemma*—and beyond—this definitive work will help anyone trying to transform their business right now. In *The Innovator's Solution*, Clayton Christensen and Michael Raynor expand on the idea of disruption, explaining how companies can and should become disruptors themselves. This classic work shows just how timely and relevant these ideas continue to be in today's hyper-accelerated business environment. Christensen and Raynor give advice on the business decisions crucial to achieving truly disruptive growth and propose guidelines for developing your own disruptive growth engine. The authors identify the forces that cause managers to make bad decisions as they package and shape new ideas—and offer new frameworks to help create the right conditions, at the right time, for a disruption to succeed. This is a must-read for all senior managers and business leaders responsible for innovation and growth, as well as members of their teams. Based on in-depth research and theories tested in hundreds of companies across many industries, *The Innovator's Solution* is a necessary addition to any innovation library—and an essential read for entrepreneurs and business builders worldwide. *The Starch Solution* Infobase Publishing
Acids and bases are essential components of the natural world that play key roles in medicine and industry. They are used in the manufacturing of everyday items such

as carbonated soft drinks, salad dressing, kitchen and bathroom cleaners, and fertilizers. But these compounds can also serve a dramatic function, such as in the sulfuric acid clouds of Venus and in grave wax, a basic substance in soil that mummifies animal and human bodies. The informative *Acids and Bases* takes a closer look at these fascinating, yet contrasting, substances, giving concrete, real-world examples with numerous colorful illustrations.

Seeking to identify the plant origins of the early sacramental beverages Soma and Haoma, this study draws a connection between the psychoactive properties of these drinks and the widespread use of cannabis among Indo-Europeans during this time. Exploring the role of these libations as inspiration for the Indian Rig Veda and the Persian Avestan texts, this examination discusses the spread of cannabis use across Europe and Asia, the origins of the Soma and Haoma cults, and the shamanic origins of modern religion.

How to Innovate and Execute Leaders already know that innovation calls for a different set of activities, skills, methods, metrics, mind-sets, and leadership approaches. And it is well understood that creating a new business and optimizing an already existing one are two fundamentally different management challenges. The real problem for leaders is doing both, simultaneously. How do you meet the performance requirements of the existing business—one that is still thriving—while dramatically reinventing it? How do you envision a change in your current business model before a crisis forces you to abandon it? Innovation guru Vijay Govindarajan expands the leader's innovation tool kit with a simple and proven method for allocating the organization's energy, time, and resources—in balanced measure—across what he calls “the three boxes”:

- Box 1: The present—Manage the core business at peak profitability
- Box 2: The past—Abandon ideas, practices, and attitudes that could inhibit innovation
- Box 3: The future—Convert breakthrough ideas into new products and businesses

The three-box framework makes leading innovation easier because it gives leaders a simple vocabulary and set of tools for managing and measuring these different sets of behaviors and activities across all levels of the organization. Supported with rich company examples—GE, Mahindra & Mahindra, Hasbro, IBM, United Rentals, and Tata Consultancy Services—and testimonies of leaders who have successfully used this framework, this

book solves once and for all the practical dilemma of how to align an organization on the critical but competing demands of innovation.

"At last--a global plan that actually adds up."--James Hansen, former director, NASA Goddard Institute for Space Studies
The world must reach negative greenhouse gas emissions by 2050 to avoid the most catastrophic effects of climate change. Yet no single plan has addressed the full scope of the problem--until now. In *The 100% Solution*, Solomon Goldstein-Rose--a leading millennial climate activist and a former Massachusetts state representative--makes clear what needs to happen to hit the 2050 target: the manufacturing booms we must spur, the moonshot projects we must fund, the amount of CO2 we'll have to sequester from the atmosphere, and much more. Most importantly, he shows us the more prosperous and equitable world we can build by uniting the efforts of activists, industries, governments, scientists, and voters to get the job done. This is the guide we've been waiting for. As calls for a WWII-scale mobilization intensify--especially among youth activists--this fully illustrated, action-oriented book arms us with specific demands, sets the stakes for what our leaders must achieve, and proves that with this level of comprehensive thinking we can still take back our future.

Nick Ortner, founder of the Tapping World Summit and best-selling filmmaker of *The Tapping Solution*, is at the forefront of a new healing movement. In his upcoming book, *The Tapping Solution*, he gives readers everything they need to successfully start using the powerful practice of tapping – or Emotional Freedom Techniques (EFT). Tapping is one of the fastest and easiest ways to address both the emotional and physical problems that tend to hamper our lives. Using the energy meridians of the body, practitioners tap on specific points while focusing on particular negative emotions or physical sensations. The tapping helps calm the nervous system to restore the balance of energy in the body, and in turn rewire the brain to respond in healthy ways. This kind of conditioning can help rid practitioners of everything from chronic pain to phobias to addictions. Because of tapping's proven success in healing such a variety of problems, Ortner recommends to try it on any challenging issue. In *The Tapping Solution*, Ortner describes not only the history and science of tapping but also the practical applications. In a friendly voice, he lays out easy-to-use practices, diagrams, and worksheets that will teach readers, step-by-step, how to tap on a variety of issues. With chapters covering everything from the alleviation of pain to the encouragement of weight loss to fostering better relationships, Ortner opens readers' eyes to just how powerful this practice can be. Throughout the book, readers will see real-life stories of healing ranging from easing the pain of fibromyalgia to overcoming a fear of flying. The simple strategies Ortner outlines will help readers release their fears and clear the limiting beliefs that hold them back from creating the life they want.

Fundamentals of General, Organic, and Biological Chemistry by McMurry, Ballantine, Hoeger, and Peterson provides the background in chemistry and biochemistry essential for allied health students, while ensuring students in other disciplines gain an appreciation of chemistry's significance in everyday life. Unlike many texts on this subject, it is clear and concise, punctuated with practical and familiar examples from students' personal experiences. An exceptional balance of chemical concepts explains the quantitative aspects of chemistry, and provides deeper insight into theoretical chemical principles. It also sets itself apart by requiring students to master concepts before they can move on to the next chapter. The Seventh Edition focuses on making connections between General, Organic, and Biological Chemistry with a number of new and updated features-including all-

new Mastering Reactions boxes, new and updated Chemistry in Action boxes (formerly titled Applications), new and revised chapter problems that strengthen the ties between major concepts in each chapter and practical applications, and much more. 032175011X / 9780321750112 Fundamentals of General, Organic, and Biological Chemistry with MasteringChemistry® Package consists of: 0321750837 / 9780321750839 Fundamentals of General, Organic, and Biological Chemistry 0321776461 / 9780321776464 MasteringChemistry® with Pearson eText -- Access Card -- for Fundamentals of General, Organic, and Biological Chemistry Rural Rides Pearson UK

Increase your lifespan and optimize your health with plant-based recipes for a longer, more vibrant life. Authors and leading plant-based nutrition experts Julieanna Hever and Ray Cronise have spent over a decade researching diet and nutrition, analyzing longevity studies, and helping their clients achieve sustainable, lasting health benefits by adopting a whole food, plant-based diet. In *The Healthspan Solution*, they share the simple and effective diet that has allowed their clients to lose weight, reverse disease, reduce or eliminate medication use, and achieve optimal health. This accessible and easy-to-follow guide examines the health risks posed by typical Western eating habits and explains how a diet rich in vegetables, fruits, whole grains, legumes, mushrooms, nuts, seeds, herbs and spices can lead to lower blood pressure, healthy weight management, and longer life. Their flexible, customizable approach to eating challenges the conventional idea of breakfast, lunch, and dinner and focuses instead on soups, salads, sides, and sweets. With 100 delicious recipes to choose from, *The Healthspan Solution* make adopting a plant-based lifestyle simple and sustainable. Evidence-based research on the scientific underpinnings of the healthspan diet Easy-to-follow guidelines simplify food choices without being restrictive Beautifully photographed recipes offer options and flexibility Praise for *The Healthspan Solution*: "Ray and Julieanna didn't write a fad diet book. It's about making a permanent lifestyle transformation. The magic is I still can eat anything I want. The trick is what I want has profoundly changed. They did the trick for me and saved my life-now let them help you."-Penn Jillette, Las Vegas entertainer and magician "Ray is a scientific visionary and Julieanna is a master of nutrition. Together they've written a fact-based recipe book for longevity that belongs in every kitchen. Buy it."-David Sinclair, PhD, AO, Professor of Genetics, Harvard Medical School "Working with Julieanna and Ray has given me a profoundly new

understanding of how food impacts health and how what we eat is often dictated by social influences. I'm excited to be a part of their effort to push to this message out to a far bigger audience."-Cyan Banister, angel investor and entrepreneur "Julieanna and Ray are an incredible team. While others have sought to demonstrate the adequacy of an exclusively plant-sourced diet, they teach how it can be superior and mimics longevity research."-Rich Roll, plant-powered ultra athlete and author

The Practice of Pharmacy Harvard Business Review Press

The assassin's bullet misses, the Archduke's carriage moves forward, and a catastrophic war is avoided. So too with the history of life. Re-run the tape of life, as Stephen J. Gould claimed, and the outcome must be entirely different: an alien world, without humans and maybe not even intelligence. The history of life is littered with accidents: any twist or turn may lead to a completely different world. Now this view is being challenged. Simon Conway Morris explores the evidence demonstrating life's almost eerie ability to navigate to a single solution, repeatedly. Eyes, brains, tools, even culture: all are very much on the cards. So if these are all evolutionary inevitabilities, where are our counterparts across the galaxy? The tape of life can only run on a suitable planet, and it seems that such Earth-like planets may be much rarer than hoped. Inevitable humans, yes, but in a lonely Universe.
