[Solution - Wikipedia](#)

In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent . The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that are specific to solvation .

[What is a Solution?: Components, Characteristics ...](#)

In a stricter sense, however, an IT solution is an aggregation of products and services, as opposed to a single, discrete product. To accurately be called a solution, therefore, the antivirus software should be bundled with related products, such as a spam filter or backup service.

[What is IT solution? - Definition from WhatIs.com](#)

Solution definition, the act of solving a problem, question, etc.: The situation is approaching solution. See more.

[What Is A Solution](#)

Solution, in chemistry, a homogenous mixture of two or more substances in relative amounts that can be varied continuously up to what is called the limit of solubility. The term solution is commonly applied to the liquid state of matter, but solutions of gases and solids are possible.

[Solution Definition in Chemistry - ThoughtCo](#)

A solution is described by a text file (extension.sln) with its own unique format; it's not intended to be edited by hand. Conversely, the.suo file is a hidden file that is not displayed under the default File Explorer settings. To show hidden files, on the View menu in File Explorer, select the Hidden Items checkbox.

[solution | Definition & Examples | Britannica](#)

A solution is a homogeneous mixture of one or more solutes dissolved in a solvent. solvent: the substance in which a solute dissolves to produce a homogeneous mixture. solute: the substance that dissolves in a solvent to produce a homogeneous mixture. Note that the solvent is the substance that is present in the greatest amount.

[What is a Solution? - Edinformatics](#)

A solution is a homogeneous mixture of two substances—that is, it has the same distribution of particles throughout. Technically speaking, a solution consists of a mixture of one or more solutes dissolved in a solvent. The particles of solute and solvent are molecules or ions, with one or more solvent molecules bound to each solute particle.
