What Is An Enterprise Solution
Enterprise solutions are designed to integrate multiple facets of a company's business through the interchange of information from various business process areas and related databases. These solutions enable companies to retrieve and disseminate mission-critical data throughout the organization, providing managers with real-time operating information.

A solutions architect focuses
on an organization's overall
business goals, while an
enterprise architect focuses
on enforcing standards and
managing items like data
diagrams and process flows.
The...
