Business, Conflict Resolution and Peacebuilding examines the actions currently being taken by businesses in areas of violent conflict around the world, and explores how they can make a significant contribution to the resolution of violent conflicts through business-based peacebuilding. This book combines two approaches to provide a comprehensive look at the current state and future of business-based peacebuilding. It marries a detailed study of documented peacebuilding activities with a map of the possibilities for future business-related conflict work and pragmatic suggestions for business leaders, conflict resolution practitioners, and peacebuilding organizations. The use of the label ' business-based peacebuilding ' is new and signifies actions business can take beyond simple legal compliance or making changes to avoid creating a conflict. Although business-based peacebuilding is new, examples are included from around the world to illustrate that, working together, businesses have a strong contribution to make to the creation of peaceful societies. The book advocates pragmatic peacebuilding, which is not overly concerned with cause-driven models of conflict. Instead, pragmatic peacebuilding

encourages an examination of what is needed in the conflict and what can be provided. This approach is free of some of the ideological baggage of traditional peacebuilding and allows for a much wider range of participants in the peacebuilding project. This book will be of much interest to students of peace studies, conflict resolution, international security and business studies, as well as to practitioners and business leaders. Robert's Rules of Order for Deliberative Assemblies Henry M. Robert There appears to be much needed a work on parliamentary law, based, in its general principles, upon

the rules and practice of Congress, and adapted, in its details, to the use of ordinary societies. Such a work should give, not only the methods of organizing and conducting the meetings, the duties of the officers and the names of the ordinary motions, but in addition, should state in a systematic manner, in reference to each motion, its object and effect; whether it can be amended or debated; if debatable, the extent to which it opens the main question to debate; the circumstances under which it can be made, and what other motions can be made while it is pending. This Manual has been prepared with a view to supplying the above information in a condensed and systematic manner, each rule being either complete in itself, or giving references to every section that in any way qualifies it, so that a stranger to the work can refer to any special subject with safety.

 Private corporations are rarely discussed as playing a role in efforts to curb civil violence, even though they often have strong interests in maintaining stability. Violence often damages the infrastructure necessary to deliver goods to market or may directly target companies. Corporations also have a normative obligation to conduct business in ways that promote peace. While there are

historical examples of firm-instigated violence and firms reaping benefits from instability and conflict, there is also evidence that corporations proactively engage in peacebuilding. For example, firms devise programs to promote economic development, offer access to education, and employ former combatants. In *The Building and Breaking of Peace*, Molly M. Melin develops a theory of the conflicting roles corporations play in both building and preventing peace. Melin shows that corporations engage in peacebuilding when there is a gap in the state's capacity to enforce laws, but they also weigh the opportunity costs of peacebuilding, responding to the need for action when conditions enable them to do so. Firms are uniquely situated in their ability to raise the cost of violence, and proactive firms can increase the years of peace in a country. At the same time, an active private sector can make it harder for states with ongoing conflict to reach an agreement, as they act as an additional veto player in the bargaining process. Including original cross-national data of peacebuilding efforts by firms in Latin America, the Middle East, and Africa from 2000 to 2018, and in-depth case analyses of corporate actions and outcomes in Colombia, Northern Ireland, and Tunisia, Melin shows that corporations help to prevent violence but not resolve it. In examining the corporate motives for peacebuilding and the implications of these activities for preventing violence and conflict resolution, the book builds a more holistic picture of the peace and conflict process. The findings also help explain why armed civil conflicts persist despite the multitude of diverse actors working to end them.
