See, when you drive home today, you've got a big windshield on the front of your car. And you've got a little bitty rearview mirror. And the reason the windshield is so large and the rearview mirror is so small is because what's happened in your past is not near as important as what's in your future.

Strictly speaking, when you look in a mirror, you see a face that you recognize as your own. This in and of itself is a remarkable feat—other animals generally can't do this. A dog looking in a mirror sees another dog. (At least, that’s what we infer from observing its behavior.) Human infants don’t seem to recognize their own faces, either.
