On the night of February 18, 1952, during one of the worst winter storms that New England has ever seen, two oil tankers just off the shore of Cape Cod were torn in half by the force of the storm. This middle-grade adaptation of an adult nonfiction book tells the story of the shipwreck and a harrowing Coast Guard rescue when four men in a tiny lifeboat overcame insurmountable odds and saved more than 30 stranded sailors. This is a fast-paced, uplifting story that puts young readers in the middle of the action. It's a gripping story of heroism and survival with the same intensity as the bestselling book and movie *The Perfect Storm*. A

"As finely worked as a Swiss watch and as funny as the human condition permits ... the zigzag brilliance of the text as the clunky lines of the farce-within-a-farce rub against the sharp dialogue of reality." The Guardian
A play-within-a-play following a touring theatre company who are rehearsing and performing a comedy called *Nothing On*, results in a riotous double-bill of comedic craft and dramatic skill. Hurtling along at breakneck speed it shows the backstage antics as they stumble through the dress-rehearsal at Weston-super-Mare, then on to a disastrous matinee at Ashton-under-Lyne, followed by a total meltdown in Stockton-on-Tees. Michael Frayn's irresistible, multi-award-winning backstage farce has been enjoyed by millions of people worldwide since it premiered in 1982 and has been hailed as one of the greatest British comedies ever written. Winner of both Olivier and Evening Standard Awards for Best Comedy. This edition features a

The Dust That Falls from Dreams Putnam Juvenile

A mordantly funny, all-too-real novel in the vein of Tom Perotta and Emma Straub about a suburban American family who have to figure out how to survive themselves and their neighbors in the wake of a global calamity that upends all of modern life. It's Tuesday morning in Lincolnwood, New Jersey, and all four members of the Altman family are busy ignoring each other en route to work and school. Dan, a lawyer turned screenwriter, is preoccupied with satisfying his imperious TV producer boss's creative demands. Seventeen-year-old daughter Chloe obsesses over her college application essay and the state tennis semifinals. Her vape-addicted little brother, Max, silently plots revenge against a thuggish freshman classmate. And their MBA-educated mom Jen, who gave up a successful business career to raise the kids, is counting the minutes until the others vacate the kitchen and she can pour her first vodka of the day. Then, as the kids begin their school day and Dan rides a commuter train into

Manhattan, the world comes to a sudden, inexplicable stop. Lights, phones, laptops, cars, trains...the entire technological infrastructure of 21st-century society quits working. Normal life, as the Altmans and everyone else knew it, is over. Or is it? Over four transformative, chaotic days, this privileged but clueless American family will struggle to hold it together in the face of water shortages, paramilitary neighbors, and the well-mannered looting of the local Whole Foods as they try to figure out just what the hell is going on.

Tell-Tale Heart Turner Publishing Company Blackouts—whether they result from military planning, network failure, human error, or terrorism—offer snapshots of electricity's increasingly central role in American society. Where were you when the lights went out? At home during a thunderstorm? During the Great Northeastern Blackout of 1965? In California when rolling blackouts hit in 2000? In 2003, when a cascading power failure left fifty million people without electricity? We often remember vividly our time in the dark.

In When the Lights Went Out, David Nye views power outages in America from 1935 to the present not simply as technical failures but variously as military tactic, social disruption, crisis in the networked city, outcome of political and economic decisions, sudden encounter with sublimity, and memories enshrined in photographs. Our electrically lit-up life is so natural to us that when the lights go off, the darkness seems abnormal. Nye looks at America's development of its electrical grid, which made large-scale power failures possible and a series of blackouts from military blackouts to the “greenout” (exemplified by the new tradition of “Earth Hour”), a

voluntary reduction organized by environmental organizations. Blackouts, writes Nye, are breaks in the flow of social time that reveal much about the trajectory of American history. Each time one occurs, Americans confront their essential condition—not as isolated individuals, but as a community that increasingly binds itself together with electrical wires and signals.

ñ I tell you, God could care less about the poor. Tell me, why must we live here like this? What have we done to deserve this? You í re so good and yet you suffer so much, î a young boy tells his mother in Tom à s Rivera í s classic novel about the migrant worker experience. Outside the chicken coop that is their home, his father wails in pain from the unbearable cramps brought on by sunstroke after working in the hot fields. The young boy can í t understand his parents í faith in a god that would impose such horrible suffering, poverty and injustice on innocent people. Adapted into the award-winning film and the earth did not swallow him and recipient of the first award for Chicano literature, the Premio Quinto Sol, in 1970, Rivera í s masterpiece recounts the experiences of a Mexican-American community through the eyes of a young boy. Forced to leave their home in search of work, the migrants are exploited by farmers, shopkeepers, even other Mexican Americans, and the boy must forge his identity in the face of exploitation, death and

disease, constant moving and conflicts with school officials. In this new edition of a powerful novel comprised of short vignettes, Rivera writes hauntingly about alienation, love and betrayal, man and nature, death and resurrection and the search for community.

Colin Wilson's interest in the occult and the paranormal has taken him into an area that can seem oddly domestic. Poltergeist seem not to do real harm and often make their presence known in quite normal surroundings. There is a sense of mischief rather than sheer evil in their tricks but it is the almost everyday nature of their activities that makes them both disturbing and fascinating. Detailed and wide-ranging, *Poltergeist* is a treasure-trove of things that do, literally, go bump in the night, as well as a well-thought-out attempt at an

explanation. It is compulsive reading.

When the Lights Went Out tells the story of a moment in the 1987 World Junior Championship that forever changed the lives of the players involved, and ignited a debate that has yet to subside about the way the game is meant to be played. When Team Canada skated onto the ice that night in Piestany, Czechoslovakia, they thought they were 60 minutes away from a gold medal. Future superstars like Brendan Shanahan and Theo Fleury, pitted against Russians like Alexei Fedorov and Alex Mogilny, dreamed of returning to Canada in glory. Instead, they were sent home empty-handed, bearers of a legacy that would follow them throughout their careers. No one who saw it will ever forget it. The mere mention of Piestany evokes the image of twenty fights breaking out all over the ice as players rushed to their mates ' defence, of haymakers, stick-swinging, and even kicking, of a referee skating off the ice in shame. ESPN hockey writer Gare Joyce tells the story of the game that marked the last time Canadian and Soviet players squared off as enemies, rather than potential team mates in the NHL. It tells the stories of the combatants on the ice. Of the coaches behind the bench. Of officials, international hockey executives, members of

the media and even politicians who were caught up in the intrigue.

What you need to know now about America's energy future "Hi, I'm the United States and I'm an oil-oholic." We have an energy problem. And everybody knows it, even if we can't all agree on what, specifically, the problem is. Rising costs, changing climate, peaking oil, foreign oil, public safety?if the fears are this complicated, then the solutions are bound to be even more confusing. Maggie Koerth-Baker?science editor at the award-winning blog BoingBoing.net?finally makes some sense out of the madness. Over the next 20 years, we'll be forced to cut 20 quadrillion BTU worth of fossil fuels from our energy budget, by wasting less and investing in alternatives. To make it work, we'll need to radically change the energy systems that have shaped our lives for 100 years. And the result will be neither business-as-usual, nor a hippie utopia. Koerth-Baker explains what we can do, what we can't do, and why "The Solution" is really a lot of solutions working together. This isn't about planting a tree, buying a Prius, and proving that you're a good person. Economics and social incentives got us a country full of gas-guzzling cars, long commutes, inefficient

houses, and coal-fired power plants out in the middle of nowhere, and economics and incentives will be the things that build our new world. Ultimately, change is inevitable. Argues we're not going to solve the energy problem by convincing everyone to live like it's 1900 because that's not a good thing. Instead of reverting to the past, we have to build a future where we get energy from new places, use it in new ways, and do more with less. Clean coal? Natural gas? Nuclear? Electric cars? We'll need them all. When you look at the numbers, you'll find that we'll still be using fossil fuels, nuclear, and renewables for decades to come. Looks at new battery technology, smart grids, passive buildings, decentralized generation, clean coal, and carbon sequestration. These are buzzwords now, but they'll be a part of your world soon. For many people, they already are. Written by the cutting edge Science Editor for Boing Boing, one of the ten most popular blogs in America

From the acclaimed author of Corelli 's Mandolin, here is a sumptuous, sweeping, powerfully moving new novel about a British family whose lives and loves are indelibly shaped by the horrors of World War I and the hopes for its aftermath. In the brief golden years of the Edwardian era the McCosh sisters—Christabel, Otilie, Rosie and Sophie—grow up in an idyllic household in the countryside south of London. On one side, their neighbors are the proper Pendennis family, recently arrived from Baltimore, whose close-in-age boys—Sidney, Albert and Ashbridge—shake their father 's hand at breakfast and address him as "sir." On the other side is the Pitt family: a "resolutely French" mother, a former navy captain father, and two brothers, Archie and Daniel, who are clearly "going to grow up into a pair of daredevils and adventurers." In childhood this band is inseparable, but the days of careless camaraderie are brought to an abrupt halt by the outbreak of The Great War, in

which everyone will play a part. All three Pendennis brothers fight in the hellish trenches at the front; Daniel Pitt becomes an ace fighter pilot with his daredevil tendencies intact; Rosie and Otilie McCosh volunteer in the hospitals, where women serve with as much passion and nearly as much hardship as the men at the front; Christabel McCosh becomes one of the squad of photographers sending “ snaps ” of their loved ones at home to the soldiers; and Sophie McCosh drives for the RAF in France. In the aftermath of the war, as “ the universal joy and relief were beginning to be tempered by . . . an atmosphere of uncertainty, ” everyone must contend with the modern world that is slowly emerging from the ashes of the old. A wholly immersive novel about a particular time and place, *The Dust That Falls from Dreams* also illuminates the timeless ways in which men and women carry profound loss alongside indelible hope.
