THE STARTER is the sequel to THE ROOKIE, a hard-hitting, bone-crunching YA sports/scifi novel described as "Any Given Sunday" meets "The Godfather" meets "Star Wars." It's high-stakes, win-or-die football action in the far future, as aliens and humans fill positions based on physiology and leave their blood, sweat and tears on gridirons across the galaxy. Last season, 19-year-old rookie quarterback Quentin Barnes overcame his racism and unified his team. He led the Ionath Krakens to a lower-tier championship, a championship that earns them promotion into the meat grinder known as "Tier One." Now, he and the Krakens have to compete against the greatest football teams ever assembled and do far more than just survive each game. As he rebuilds the team in his own image, Quentin's quest

for a Tier One championship begins in THE STARTER.

Starter cultures have great significance in the food industry due to their vital role in the manufacture, flavour, and texture development of fermented foods. Once mainly used in the dairy industry, nowadays starter cultures are applied across a variety of food products, including meat, sourdough, vegetables, wine and fish. New data on the potential health benefits of these organisms has led to additional interest in starter bacteria. *Starter Cultures in Food Production* details the most recent insights into starter cultures. Opening with a brief description of the current selection protocols and industrial production of starter cultures, the book then focuses on the innovative research aspects of starter cultures in food production. Case studies for the selection of new starter cultures for different food products (sourdough and cereal based foods, table olives and vegetables, dairy and meat products, fish and wine) are presented before chapters devoted to the role of lactic acid bacteria in alkaline fermentations and ethnic fermented foods. This book will provide food producers, researchers and students with a tentative answer to the emerging issues of how to use starter cultures and how microorganisms could play a significant role in the complex process of food innovation.

American Produce Review Cengage Learning

From the bestselling author of *Girl Last Seen* comes "a spine-tingler" (Booklist) of a psychological suspense, perfect for fans of Lisa Jewell and Jessica Knoll. Local police have announced that they're closing the investigation of the suspected drowning of 37-year-old painter Colleen Westcott. She disappeared on April 11, 2010, and her car was found parked near the waterfront in Cleveland two days later, but her body has never been found. The chief of police has stated that no concrete evidence of foul play has been discovered in the probe. I

close the online search window, annoyed. These articles never have enough detail. They think my husband's first wife disappeared or they think she is dead. There's a big difference. My phone rings, jarring me away from my thoughts, and when I pick it up, it's an unknown number. The only answer to my slightly breathless hello is empty static. When the voice does finally come, it's female, low, muffled somehow.

"Where is it, Claire? What did you do with it? Tell me where it is." A woman. A real flesh-and-blood woman on the other end of the phone. She's not just in my head. A wave of panic spreads under my skin like ice water. It's Colleen. "Laurin knows how to ratchet up the suspense." --Publishers Weekly
