This is an open access book. The 4th International Conference on Literature, Art and Human Development (ICLAHD 2022)

was successfully held on October 28th-30th, 2022 in Xi'an, China (virtual conference). ICLAHD 2022 brought together academics and experts in the field of Literature, Art and Human Development research to a common forum, promoting research and developmental activities in related fields as well as scientific information interchange between researchers, developers, and engineers working all around the world. We were honored to have Assoc. Prof. Chew Fong Peng from University of Malaya, Malaysia to serve as our Conference Chair. The conference covered keynote speeches, oral presentations, and online Q&A discussion, attracting

over 300 individuals. Firstly, keynote speakers were each allocated 30-45 minutes to hold their speeches. Then in the oral presentations, the excellent papers selected were presented by their authors in sequence.

**Popular Mechanics** New York : Knopf

From Lisa Tucker, the critically acclaimed author of *Once Upon a Day* and *The Song Reader*, comes an extraordinary novel about the way we live now: the choices we make and the decisions we let life make for us. Matthew and Amelia were once in love and

---

planning to raise a family together, but a decade later, they have become professional enemies. To Amelia, who has dedicated her life to medical ethics, Matthew's job as a high-powered pharmaceutical executive has turned him into a heartless person who doesn't care about anything but money. Now they're kept in balance only by Matthew's best and oldest friend, Ben, a rising science superstar -- and Amelia's new boyfriend. That balance begins to crumble one night when, coming home to his upscale Philadelphia loft, Matthew finds himself on a desolate bridge face-to-face with a boy screaming for help. Homeless for most of his life, ten-year-old Danny is as streetwise as he is world-weary, and his desperation to save his three-year-old sister means he will do whatever it takes to get Matthew's help. What follows is an escalating game of one-upmanship between Matthew, Amelia, and

as all three players struggle to defend what is most important to them -- and are ultimately forced to reconsider what they truly want. Dazzlingly written with a riveting story that will resonate with readers everywhere, Lisa Tucker's *The Cure for Modern Life* is a smart, humorous, big-hearted novel about what it means in the twenty-first century to be responsible, to care about other people, and to do the right thing. Working with Paper builds on a growing interest in the materials of science by exploring the gendered uses and meanings of paper tools and technologies, considering how notions of gender impacted paper practices and in turn how paper may have structured knowledge about gender. Through a series of dynamic investigations

---

covering Europe and North America and spanning the early modern period to the twentieth century, this volume breaks new ground by examining material histories of paper and the gendered worlds that made them. Contributors explore diverse uses of paper—from healing to phrenological analysis to model making to data processing—which often occurred in highly gendered, yet seemingly divergent spaces, such as laboratories and kitchens, court rooms

and boutiques, ladies' chambers and artisanal workshops, foundling houses and colonial hospitals, and college gymnasiums and state office buildings. Together, they reveal how notions of masculinity and femininity became embedded in and expressed through the materials of daily life. Working with Paper uncovers the intricate negotiations of power and difference underlying epistemic practices, forging a material history of

knowledge in which quotidian and scholarly practices are intimately linked. **The Handyman's Enquire Within, Making, Mending, Renovating** Farrar, Straus and Giroux "Olympiad Champs General Knowledge Class 8 with Past Olympiad Questions" is a complete preparatory book not only for Olympiad Exams but also for General Awareness of Class 8 student. Gresham is able to establish why, he is summoned by the man he fears most: Robert Cecil, the King's Machiavellian Chief Secretary. Cecil wants Gresham to investigate Sir Francis Bacon's private life. When Gresham begins his inquiries, he uncovers a plot so audacious it is scarcely believable: a conspiring clutch of Catholic lords and a trail of gunpowder underneath the Houses of Parliament.

equaled. Readers of Patrick O'Brian will find themselves back in familiar gunrooms and wardrooms. Well done, Jay Worrall!"—David Poyer, author of *That Anvil of Our Souls* The year is 1798. The war between England and revolutionary France has reached a stalemate. With rumors swirling that the French are

---

secretly amassing a powerful fleet, the Admiralty dispatches a group of ships under the command of Rear Admiral Horatio Nelson to investigate. But after a ferocious storm blindsides the squadron, Nelson's flagship and two other ships go missing. Putting his career on the line by disobeying direct orders,

Captain Charles Edgemont sets out in pursuit of Nelson and the French fleet on a treacherous voyage along the Tuscan coast. As tensions among the crew rise from a simmer to a boil, Edgemont makes an unexpected discovery in Naples that may compromise his mission. And when the French fleet turns up off the shores of

Egypt, Edgemont is suddenly thrown into a crisis of conscience. As circumstances grow dire and require heroic action, the fate of the crucial battle effectively lies in Edgemont's hands—as does the course of history. While elite merchants, financiers, shopkeepers, and customers were the most visible producers, consumers, and distributors of goods and capital in the nineteenth century, they were certainly not alone in shaping the economy. Lurking in the shadows of capitalism's past are those who made

markets by navigating a range of new financial instruments, information systems, and modes of transactions: prostitutes, dealers in used goods, mock auctioneers, illegal slavers, traffickers in stolen horses, emigrant runners, pilfering dock workers, and other ordinary people who, through their transactions and lives, helped to make capitalism as much as it made them. Capitalism by Gaslight illuminates American

---

economic history by emphasizing the significance of these markets and the cultural debates they provoked. These essays reveal that the rules of economic engagement were still being established in the nineteenth century: delineations between legal and illegal, moral and immoral, acceptable and unsuitable were far from clear. The contributors examine the fluid mobility and unstable value of people and goods, the

shifting geographies and structures of commercial institutions, the blurred boundaries between legitimate and illegitimate economic activity, and the daily lives of men and women who participated creatively—and often subversively—in American commerce. With subjects ranging from women's studies and African American history to material and consumer culture, this compelling volume illustrates that when hidden forms of

commerce are brought to light, they can become flashpoints revealing the tensions, fissures, and inequities inherent in capitalism itself. Contributors: Paul Erickson, Robert J. Gamble, Ellen Gruber Garvey, Corey Goettsch, Joshua R. Greenberg, Katie M. Hemphill, Craig B. Hollander, Brian P. Luskey, Will B. Mackintosh, Adam Mendelsohn, Brendan P. O'Malley, Michael D. Introducing an unforgettable cast of strivers and rogues, Jake Halpern chronicles their lives as they manage high-pressure call centers, hunt for paper in Las Vegas casinos, and meet in parked cars to sell the social security numbers and account information of unsuspecting consumers. He also tracks a "package" of debt that is stolen by unscrupulous

collectors, leading to a dramatic showdown with guns in a Buffalo corner store. Along the way, he reveals the human cost of a system that compounds the troubles of hardworking Americans and permits banks to ignore their former customers. The result is a vital exposé that is also a bravura feat of storytelling.

rationalization for centralized monopolies for a century. In recent years, liberalization has shown that much wider participation can be beneficial. Innovative development in decentralized networks can be driven from below if government policies permit it, as vividly demonstrated by the

---

Internet. This book contributes to a much needed exploration into the characteristics and implications of decentralized networks being driven from below, introducing new perspectives on the conception and analysis of infrastructure networks.' William H. Melody, Aalborg University, Denmark and Delft

University of Technology, The Netherlands The notion of inverse infrastructures that is, bottom-up, user-driven, self-organizing networks gives us a fresh perspective on the omnipresent infrastructure systems that support our economy and structure our way of living. This fascinating book considers the

emergence of inverse infrastructures as a new phenomenon that will have a vast impact on consumers, industry and policy. Using a wide range of theories, from institutional economics to complex adaptive systems, it explores the mechanisms and incentives for the rise of these alternatives to

---

large-scale infrastructures and points to their potential disruptive effect on conventional markets and governance models. The approach in this unique book challenges the existing literature on infrastructures, which primarily focuses on large technical systems (LTSS). Rather, this study

highlights unprecedented developments, analyzing the differences and complementarity between LTSS and inverse infrastructures. It illustrates that even large infrastructures need not require a blueprint design or top-down and centralized control to run efficiently. The expert

contributors draw upon a captivating and wide-ranging set of case studies, including: Wikipedia; wind energy cooperatives, Wireless Leiden, rural telecom in developing countries, local radio and television distribution, the collection of waste paper, syngas infrastructure

---

design, and e-government projects. The book discusses the feasibility of temporary infrastructures and unheard of ownership arrangements, and concludes that inverse networks represent a critical transformation of the accepted model of infrastructure development. Laying

a foundation for future research in the area and suggesting ways to bridge the gap between policy and practice, this path-breaking book will prove a riveting read for academics, students and researchers across a number of disciplines including economics, business, management,

innovation, and technology and policy studies. Creative Paper Cutting Disha Publications
