#### **Popular Photography** Farrar, Straus and Giroux

'The traditional analysis of infrastructure networks has provided the conceptual rationalization for centralized monopolies for a century. In recent years, liberalization has shown that much wider participation can be beneficial. Innovative development in decentralized networks can be driven from below if government policies permit it, as vividly demonstrated by the Internet. This book contributes to a much needed exploration into the characteristics and implications of decentralized networks being driven from below, introducing new perspectives on the conception and analysis of infrastructure networks.' William H. Melody, Aalborg University, Denmark and Delft University of Technology, The Netherlands The notion of inverse infrastructures that is, bottom-up, user-driven, self-organizing networks gives us a fresh perspective on the omnipresent infrastructure systems that support our economy and structure our way of living. This fascinating book considers the emergence of inverse infrastructures as a new phenomenon that will have a vast impact on consumers, industry and policy. Using a wide range of theories, from institutional economics to complex adaptive systems, it explores the mechanisms and incentives for the rise of these alternatives to large-scale infrastructures and points to their potential disruptive effect on conventional markets and governance models. The approach in this unique book challenges the existing literature on infrastructures, which primarily focuses on large technical systems (LTSS). Rather, this study highlights unprecedented developments, analyzing the differences and complementarity between LTSS and inverse infrastructures. It illustrates that even large infrastructures need not require a blueprint design or top-down and centralized control to run efficiently. The expert contributors draw upon a captivating and wide-ranging set of case studies, including: Wikipedia; wind energy cooperatives, Wireless Leiden, rural telecom in developing countries, local radio and television distribution, the collection of waste paper, syngas infrastructure design, and e-government projects. The book discusses the feasibility of temporary infrastructures and unheard of ownership arrangements, and concludes that inverse networks represent a critical transformation of the accepted model of infrastructure development. Laying a foundation for future research in the area and suggesting ways to bridge the gap between policy and practice, this path-breaking book will prove a riveting read for academics, students and researchers across a number of disciplines including economics, business, management, innovation, and technology and policy studies.

Magic fades. Darkness rises. Darion Ulther and his family have carved out a simple life for themselves in the untamed hinterlands of a wild realm, far from lords and kingdoms and warfare. After destroying the last existing record of a powerful spell capable of crippling magic itself, they assumed they were safe from the machinations of Dathron's power-hungry ruler. They were wrong. A new threat has emerged in the east, and with it a startling shift in the symmetry between magic and nature. When the Five Realms fall into preternatural crisis, Darion and his loved ones will set out on an adventure to restore balance to the realms – and, if they are fortunate, to awaken the Mage Song once more, for good and all. "Jay Worrall depicts the hearts and minds of the late eighteenth century with a facility I have seldom seen equaled. Readers of Patrick O' Brian will find themselves back in familiar gunrooms and wardrooms. Well done, Jay Worrall!" —David Poyer, author of *That Anvil of Our Souls* The year is 1798. The war between England and revolutionary France has reached a stalemate. With rumors swirling that the French are secretly amassing a powerful fleet, the Admiralty dispatches a group of ships under the command of Rear Admiral Horatio Nelson to investigate. But after a ferocious storm blindsides the squadron, Nelson's flagship and two other ships go missing. Putting his career on the line by disobeying direct orders, Captain Charles Edgemont sets out in pursuit of Nelson and the French fleet on a treacherous voyage along the Tuscan coast. As tensions among the crew rise from a simmer to a boil, Edgemont makes an unexpected discovery in Naples that may compromise his mission. And when the French fleet turns up off the shores of Egypt, Edgemont is suddenly thrown into a crisis of conscience. As circumstances grow dire and require heroic action, the fate of the

crucial battle effectively lies in Edgemont's hands—as does the course of history. Praise for *Any Approaching Enemy* "A thoroughly enjoyable venture into the venue made famous by C. S. Forester . . . [evoking] the same admiration and sense of adventure [as] the Forester books do." —The Roanoke Times "Combining engaging characters, witty dialogue and rousing action, Worrall's nautical series continues its promising start." —Publishers Weekly

Working with Paper builds on a growing interest in the materials of science by exploring the gendered uses and meanings of paper tools and technologies, considering how notions of gender impacted paper practices and in turn how paper may have structured knowledge about gender. Through a series of dynamic investigations covering Europe and North America and spanning the early modern period to the twentieth century, this volume breaks new ground by examining material histories of paper and the gendered worlds that made them.

Contributors explore diverse uses of paper—from healing to phrenological analysis to model making to data processing—which often occurred in highly gendered, yet seemingly divergent spaces, such as laboratories and kitchens, court rooms and boutiques, ladies' chambers and artisanal workshops, foundling houses and colonial hospitals, and college gymnasiums and state office buildings. Together, they reveal how notions of masculinity and femininity became embedded in and expressed through the materials of daily life. Working with Paper uncovers the intricate negotiations of power and difference underlying epistemic practices, forging a material history of knowledge in which quotidian and scholarly practices are intimately linked.

Cyanotype: The Blueprint in Contemporary Practice is a two part book on the much admired blue print process. Part One is a comprehensive how-to on the cyanotype process for both beginner and advanced practitioners, with lots of photographs and clear, step-by-step directions and formulas. Part Two highlights contemporary artists who are using cyanotype, making work that ranges from the photographic to the abstract, from the traditional to the conceptual, with tips on their personal cyanotype methods alongside their work. These artists illustrate cyanotype's widespread use in contemporary photography today, probably the most of any alternative process. Book features include: A brief discussion of the practice of the process with some key historical points How to set up the cyanotype room The most extensive discussion of suitable papers to date, with data from 100+ papers Step-by-step digital negative methods for monochrome and duotone negatives Chapters on classic, new, and other cyanotype formulas Toning to create colors from yellow to brown to violet Printing cyanotype over palladium, for those who want to temper cyanotype's blue nature Printing cyanotype on alternate surfaces such as fabric, glass, and wood More creative practice ideas for cyanotype such as handcoloring and gold leafing Troubleshooting cyanotype, photographically illustrated Finishing, framing, and storing cyanotype Contemporary artists' advice, techniques, and works Cyanotype is backed with research from 120 books, journals, and magazine articles from 1843 to the present day. It is richly illustrated with 400 photographs from close to 80 artists from 14 countries. It is a guide for the practitioner, from novice to expert, providing inspiration and proof of cyanotype's original and increasing place in historical and contemporary photography.

#### *Any Approaching Enemy* Random House Trade Paperbacks

The Federal Trade Commission receives more complaints about rogue debt collecting than about any activity besides identity theft. Dramatically and entertainingly, *Bad Paper* reveals why. It tells the story of Aaron Siegel, a former banking executive, and Brandon Wilson, a former armed robber, who become partners and go in quest of "paper"—the uncollected debts that are sold off by banks for pennies on the dollar. As Aaron and Brandon learn, the world of consumer debt collection is an unregulated shadowland where operators often make unwarranted threats and even collect debts that are not theirs. Introducing an unforgettable cast of strivers and rogues, Jake Halpern chronicles their lives as they manage high-pressure call centers, hunt for paper in Las Vegas casinos, and meet in parked cars to sell the social security numbers and account information of unsuspecting consumers. He also tracks a "package" of debt that is stolen by unscrupulous collectors, leading to a dramatic showdown with

---

guns in a Buffalo corner store. Along the way, he reveals the human cost of a system that compounds the troubles of hardworking Americans and permits banks to ignore their former customers. The result is a vital exposé that is also a bravura feat of storytelling.

**The Cure for Modern Life** J.C. Staudt

While elite merchants, financiers, shopkeepers, and customers were the most visible producers, consumers, and distributors of goods and capital in the nineteenth century, they were certainly not alone in shaping the economy. Lurking in the shadows of capitalism’s past are those who made markets by navigating a range of new financial instruments, information systems, and modes of transactions: prostitutes, dealers in used goods, mock auctioneers, illegal slavers, traffickers in stolen horses, emigrant runners, pilfering dock workers, and other ordinary people who, through their transactions and lives, helped to make capitalism as much as it made them. Capitalism by Gaslight illuminates American economic history by emphasizing the significance of these markets and the cultural debates they provoked. These essays reveal that the rules of economic engagement were still being established in the nineteenth century: delineations between legal and illegal, moral and immoral, acceptable and unsuitable were far from clear. The contributors examine the fluid mobility and unstable value of people and goods, the shifting geographies and structures of commercial institutions, the blurred boundaries between legitimate and illegitimate economic activity, and the daily lives of men and women who participated creatively—and often subversively—in American commerce. With subjects ranging from women’s studies and African American history to material and consumer culture, this compelling volume illustrates that when hidden forms of commerce are brought to light, they can become flashpoints revealing the tensions, fissures, and inequities inherent in capitalism itself. Contributors: Paul Erickson, Robert J. Gamble, Ellen Gruber Garvey, Corey Goetsch, Joshua R. Greenberg, Katie M. Hemphill, Craig B. Hollander, Brian P. Luskey, Will B. Mackintosh, Adam Mendelsohn, Brendan P. O’Malley, Michael D. Thompson, Wendy A. Woloson.

This is an open access book. The 4th International Conference on Literature, Art and Human Development (ICLAHD 2022) was successfully held on October 28th-30th, 2022 in Xi’an, China (virtual conference). ICLAHD 2022 brought together academics and experts in the field of Literature, Art and Human Development research to a common forum, promoting research and developmental activities in related fields as well as scientific information interchange between researchers, developers, and engineers working all around the world. We were honored to have Assoc. Prof. Chew Fong Peng from University of Malaya, Malaysia to serve as our Conference Chair. The conference covered keynote speeches, oral presentations, and online Q&A discussion, attracting over 300 individuals. Firstly, keynote speakers were each allocated 30-45 minutes to hold their speeches. Then in the oral presentations, the excellent papers selected were presented by their authors in sequence.

Sessional Papers Martingale

From Lisa Tucker, the critically acclaimed author of *Once Upon a Day* and *The Song Reader*, comes an extraordinary novel about the way we live now: the choices we make and the decisions we let life make for us. Matthew and Amelia were once in love and planning to raise a family together, but a decade later, they have become professional enemies. To Amelia, who has dedicated her life to medical ethics, Matthew’s job as a high-powered pharmaceutical executive has turned him into a heartless person who doesn’t care about anything but money. Now they’re kept in balance only by Matthew’s best and oldest friend, Ben, a rising science superstar -- and Amelia’s new boyfriend. That balance begins to crumble one night when, coming home to his upscale Philadelphia loft, Matthew finds himself on a desolate bridge face-to-face with a boy screaming for help. Homeless for most of his life, ten-year-old Danny is as streetwise as he is world-weary, and his desperation to save his three-year-old sister means he will do whatever it takes to get Matthew’s help. What follows is an escalating game of one-upmanship between Matthew, Amelia, and Danny, as all three players struggle to defend what is most important to them -- and are ultimately forced to reconsider what they truly want. Dazzlingly written with a riveting story that will resonate with readers everywhere, Lisa Tucker’s *The Cure for Modern Life* is a smart, humorous, big-hearted novel about what it means in the twenty-first century to be responsible, to care about other people, and to do the right thing.
