This book traces and analyses the role of heritage in the urban transformation of the city of Cape Town. By looking at discourses of heritage and urban design, the book shows how Cape Town positions itself as an emerging global city in the context of a series of global events. The book points at how a heritage focus on the themes of post-colonial and post-apartheid reconciliation, restitution and memory in the city shifts to a focus on creativity, design and the arts. Thereby showing how traumatic remnants of colonialism and apartheid are reframed as “design challenges”. Furthermore, it argues that the idea of a transformed society is projected into a future time and the chaotic present everyday life is left to its own devices. Against this backdrop, the book lays out the opportunities for epistemological reset and decolonial reflection on the city’s deep histories, its embedded injustices and traumas that surfaced.?

This book explores the view that normative behaviour is part of a complex of social mechanisms, processes and narratives that are constantly shifting. From this perspective, norms are not a kind of self-contained social object or fact, but rather an interplay of many things that we label as norms when we ‘ take a snapshot ’ of them at a particular instant. Further, this book pursues the hypothesis that considering the dynamic aspects of these phenomena sheds new light on them. The sort of issues that this perspective opens to exploration include: Of what is this complex we call a “social norm” composed of? How do new social norms emerge and what kind of circumstances might facilitate such an appearance? How context-specific are the norms and patterns of normative behaviour that arise? How do the cognitive and the social aspects of norms interact over time? How do expectations, beliefs and individual rationality interact with social norm complexes to effect behaviour? How does our social embeddedness relate to social constraint upon behaviour? How might the socio-cognitive complexes that we call norms be usefully researched?

Routledge Handbook of Media, Conflict and Security Springer The television industry is changing, and with it, the small screen’s potential to engage in debate and present valuable representations of American history. Founded in 1972, HBO

has been at the forefront of these changes, leading the way for many network, cable, and streaming services into the "post-network" era. Despite this, most scholarship has been dedicated to analyzing historical feature films and documentary films, leaving TV and the long-form drama hungry for coverage. In *History by HBO: Televising the American Past*, Rebecca Weeks fills the gap in this area of media studies and defends the historiographic power of long-form dramas. By focusing on this change and its effects, *History by HBO* outlines how history is crafted on television and the diverse forms it can take. Weeks examines the capabilities of the long-form serial for engaging with historical stories, insisting that the shift away from the network model and toward narrowcasting has enabled challenging histories to thrive in home settings. As an examination of HBO's unique structure for producing quality historical dramas, Weeks provides four case studies of HBO series set during different periods of United States history: *Band of Brothers* (2001), *Deadwood* (2004–2007), *Boardwalk Empire* (2012–2014), and *Treme* (2010–2013). In each case, HBO's lack of advertiser influence, commitment to creative freedom, and generous budgets continue to draw and retain talent who want to tell historical stories. Balancing historical and film theories in her assessment of the roles of *mise-en-scène*, characterization, narrative complexity, and sound in the production of effective historical dramas, Weeks' evaluation acts as an ode to the most recent Golden Age of TV, as well as a critical look at the relationship between entertainment media and collective memory.

Contributions by Jacob Agner, Sarah Gilbreath Ford, Katie Berry Frye, Michael Kreyling, Andrew B. Leiter, Rebecca Mark, Suzanne Marrs, Tom Nolan, Michael Pickard, Harriet Pollack, and Victoria Richard Eudora Welty's ingenious play with readers' expectations made her a cunning writer, a paramount modernist, a short story artist of the first rank, and a remarkable literary innovator. In her signature puzzle-texts, she habitually engages with familiar genres and then delights readers with her transformations and nonfulfillment of conventions. *Eudora Welty and Mystery: Hidden in Plain Sight* reveals how often that play is with mystery, crime, and detective fiction genres, popular fiction forms often condescended to in literary studies, but unabashedly beloved by Welty throughout her

lifetime. Put another way, Welty often creates her stories' secrets by both evoking and displacing crime fiction conventions. Instead of restoring order with a culminating reveal, her story-puzzles characteristically allow mystery to linger and thicken. The mystery pursued becomes mystery elsewhere. The essays in this collection shift attention from narratives, characters, and plots as they have previously been understood by unearthing enigmas hidden within those constructions. Some of these new readings continue Welty's investigation of hegemonic whiteness and southern narratives of race—outlining these in chalk as outright crime stories. Other essays show how Welty anticipated the regendering of the form now so characteristic of contemporary women mystery writers. Her tender and widely ranging personal correspondence with the hard-boiled American crime writer Ross Macdonald is also discussed. Together these essays make the case that across her career, Eudora Welty was arguably one of the genre's greatest double agents, and, to apply the titles of Macdonald's novels to her inventiveness with the form, she is its "underground woman," its unexpected "sleeping beauty."

The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. *START WITH WHY* asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. *START WITH WHY* shows that the leaders who have had the

greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

A groundbreaking, urgent report from the front lines of "dirty work"—the work that society considers essential but morally compromised. Drone pilots who carry out targeted assassinations. Undocumented immigrants who man the "kill floors" of industrial slaughterhouses. Guards who patrol the wards of the United States' most violent and abusive prisons. In *Dirty Work*, Eyal Press offers a paradigm-shifting view of the moral landscape of contemporary America through the stories of people who perform society's most ethically troubling jobs. As Press shows, we are increasingly shielded and distanced from an array of morally questionable activities that other, less privileged people perform in our name. The COVID-19 pandemic has drawn unprecedented attention to essential workers, and to the health and safety risks to which workers in prisons and slaughterhouses are exposed. But *Dirty Work* examines a less familiar set of occupational hazards: psychological and emotional hardships such as stigma, shame, PTSD, and moral injury. These burdens fall disproportionately on low-income workers, undocumented immigrants, women, and people of color. Illuminating the moving, sometimes harrowing stories of the people doing society's dirty work, and incisively examining the structures of power and complicity that shape their lives, Press reveals fundamental truths about the moral dimensions of work

and the hidden costs of inequality in America. Operating Expenses of Building Material Dealers in 1927 Taylor & Francis
WINNER OF THE PULITZER PRIZE • NATIONAL BESTSELLER • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). • From the bestselling author of *The Passenger* A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. *The Road* is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. This is the first reference book to provide a detailed assessment of the Affordable Care Act, explaining the realities and myths surrounding one of the most divisive political struggles in recent U.S. history. Entries feature primary documents, a further reading section, and tables and graphs. Topics include the impact on health care costs for families, states, and the federal government; the effect of the Affordable Care Act on employer-sponsored insurance; and the role of health status on coverage under the Affordable Care Act.

Outlines how the social dimensions of medical diagnosis can deepen our understanding of health. Diagnosis is central to medicine. It creates order, explains illness, identifies treatments, and predicts outcomes. In *Putting a Name to It*, Annemarie Jutel presents medical diagnosis as more than a mere clinical tool, but as a social phenomenon with the potential to deepen our understanding of health, illness, and disease. Jutel outlines how the sociology of diagnosis should function by situating it within the broader discipline, laying out the directions it should explore, and discussing how the classification of illness and the framing of diagnosis relate to social status and order. This second edition provides important updates to the groundbreaking first edition by incorporating new research that demonstrates how the social nature of diagnosis is just as important as the clinical. It includes new perspectives on diagnostic recognition, diagnostic coding, lay diagnosis, crowdsourced diagnosis, algorithmic diagnosis, diagnostic exploitation, diagnostic systems, stigmatizing diagnosis, and contested diagnosis. The new edition also features a case study of COVID-19 from a critical sociological perspective and a new conclusion. Both a challenge and a call to arms, *Putting a Name to It* is a lucid, persuasive argument for formalizing, professionalizing, and advancing long-standing practice. Jutel's innovative, open approach and engaging arguments illustrate how diagnoses have the power to legitimize our medical ailments—and stigmatize them.

For almost the duration of his professional career, during which he was a mainstay for Leinster and Ireland, the name Jamie Heaslip was synonymous with the No 8 jersey. An athletic and tireless presence at the base of the pack, outspoken both on and off the field, not to mention a captain for province and country, he was one of the leading lights of a generation that helped propel Irish rugby to previously uncharted heights. Written in partnership with Matt Cooper, *All In* is the story of Heaslip's thirteen years at rugby's frontline, as demanding and uncompromising a place as can be found in professional sport. From the euphoria and disappointment of life on the field to the major relationships that have helped shape the team – for better or worse – it's the most vivid portrait yet of life behind the scenes at Leinster and Ireland, and a compelling account of what it means to put your body on the line in pursuit of excellence.

Agriculture, mining and related rural industries have been central to the development of Australia's economy. This book details the role that the Australian Government has played in the making of rural and regional Australia, particularly since World War II. The book reviews these policies and evaluates them with regards the commitments undertaken by the Government to contribute towards vibrant, rural communities. Policy areas addressed include agriculture, water, education, welfare and population, natural resource management, resource extraction, Indigenous

and affairs, localism, rural research and regional innovation, Youth Affairs and the devolution of regional governance. Overall two distinct policy strategies can be observed: one wherein the government saw its role as part of the entrepreneurial state and a sector wherein government has increasingly taken itself out of industry development, leaving this role to the market. Having considered these strategies and their impacts, the book concludes that policy over the past 40 years has not in fact contributed to a more vibrant, prosperous rural and regional Australia. *Rural and Regional Futures* concludes with several chapters looking to the future. One chapter explores what the role of the state can be within a social market economy while the final chapter gives consideration to the initial steps rural communities will need to take to begin the process of revitalisation. While these materials present as a case study of developments in Australia, the policy shift from the Government as entrepreneur to a focus on markets is an international one and as such, the insights offered by this book will have wide appeal.
