This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO2 emissions and at the same time increases the security of energy supply. Energy efficiency is recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of information programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL'19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and

policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.

Beginning with the impassioned, never-before-published title poem, here is the life's work of a beloved Kashmiri-American poet. Agha Shahid Ali died in 2001, mourned by myriad lovers of poetry and devoted students. This volume, his shining legacy, moves from playful early poems to themes of mourning and loss, culminating in the ghazals of *Call Me Ishmael Tonight*. The title poem appears in print for the first time. from "The Veiled Suite" I wait for him to look straight into my eyes This is our only chance for magnificence. If he, carefully, upon this hour of ice, will let us almost completely crystallize, tell me, who but I could chill his dreaming night. Where he turns, what will not appear but my eyes? Wherever he looks, the sky is only eyes. Whatever news he has, it is of the sea.

*Chilton's Guide to Large Appliance Repair and Maintenance*

Owning a coin-operated Laundromat is a great business and can be very profitable. But, unless you have all new equipment, it can quickly nickel and dime you into making a loss and going out of business, losing your investment. The skills needed to run and maintain a laundromat are not rocket science and don't need expensive equipment: just common sense and logic. I will assume you have no previous experience in repairing washers, dryers, change machines, etc. I will get you started on a journey to taking charge of your equipment. You will get great satisfaction in making common repairs and keeping your equipment working and earning you money. I do not have any problem paying for repair parts. That is the cost of doing business. What I want to avoid is the \$95 service call to troubleshoot a problem by my local appliance repair company, then the part cost being doubled as their mark up and a second \$95 service call to install the newly inflated part. Even if you only make one repair, you will save 10 times the cost of this book.
