From the author of the New York Times bestseller The Inevitable— a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution.

By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed-or "what it wants." Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

In this accessible presentation of the famous Bates method, Thomas R. Quackenbush (who teaches the Bates method in California

and Oregon) describes how eyesight can improve naturally, at any age and regardless of heredity. This book is a wonderful tribute to the genius of Dr. Bates, who was a pioneer in discovering how vision becomes blurred and how it restores itself naturally to clarity and acuity. Now 80 years later, his findings and teachings remain light years ahead of our contemporaries. His approach to treating vision problems was truly holistic and the theme throughout this book is very much an extension of that holistic approach. Dr. Quackenbush is to be commended for his dedication in getting the truth out and keeping the torch burning in this "bible" on vision improvement.

Owning a coin-operated Laundromat is a great business and can be very profitable. But, unless you have all new equipment, it can quickly nickel and dime you into making a loss and going out of business, losing your investment. The skills needed to run and maintain a laundromat are not rocket science and don't need expensive equipment: just common sense and logic. I will assume you have no previous experience in repairing washers, dryers, change machines, etc. I will get you started on a journey to taking charge of your equipment. You will get great satisfaction in making common repairs and keeping your equipment working and earning you money. I do not have any problem paying for repair parts. That is the cost of doing business. What I want to avoid is the \$95 service call to troubleshoot a problem by my local appliance repair company, then the part cost being doubled as their mark up and a second \$95 service call to install the newly inflated part. Even if you only make one repair, you will save 10 times the cost of this book.

This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO2 emissions and at the same time increases the security of energy supply. Energy efficiency is recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of information programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL '19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.
