North American Wildland Plants contains descriptions of the salient characteristics of the most important wildland plants of North America. This comprehensive reference assists individuals with limited botanical knowledge as well as natural resource professionals in identifying wildland plants. The two hundred species of wildland plants in this book were selected because of their abundance, desirability, or poisonous properties. Each illustration has been enhanced with labels pointing to key characteristics to facilitate the identification of unknown plants. Each plant description includes plant characteristics, an illustration of the plant with enlarged parts, and a general distribution map for North America. Each species description includes nomenclature; life span; origin; season of growth; inflorescence, flower or spikelet, or other reproductive parts; vegetative parts; and

In *Reconstructing the Native South*, Melanie Benson Taylor examines the diverse body of Native American literature in the contemporary U.S. South—literature written by the descendants of tribes who evaded Removal and have maintained ties with their southeastern homelands. In so doing Taylor advances a provocative, even counterintuitive claim: that the U.S. South and its Native American survivors have far more in common than mere geographical proximity. Both cultures have long been haunted by separate histories of loss and nostalgia, Taylor contends, and the moments when those experiences converge in explicit and startling ways have yet to be investigated by scholars. These convergences often bear the scars of protracted colonial antagonism, appropriation, and segregation, and they share preoccupations with land, sovereignty, tradition, dispossession, subjugation, purity, and violence. Taylor poses difficult questions

in this work. In the aftermath of Removal and colonial devastation, what remains—for Native and non-Native southerners—to be recovered? Is it acceptable to identify an Indian “lost cause”? Is a deep sense of hybridity and intercultural affiliation the only coherent way forward, both for the New South and for its oldest inhabitants? And in these newly entangled, postcolonial environments, has global capitalism emerged as the new enemy for the twenty-first century? *Reconstructing the Native South* is a compellingly original work that contributes to conversations in Native American, southern, and transnational American studies.

While Universal's *Dracula* and *Frankenstein* (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with *The Last Warning*, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows.

Filmographic data for the film conclude the entry. Universal's *The Shadow* short film series is covered in an appendix. Many rare illustrations and movie

Speaking all over the United States about apologetics issues, Charlie Campbell has heard just about every question skeptics have to offer. In this concise, reader-friendly handbook, he provides brief responses to the top-40 questions that keep people from the faith, such as... What evidence do you have that God exists? How do you know the Bible is actually true? What about those who have never heard of Jesus? Will they be condemned to hell? If God is so loving, why does He allow evil and suffering? How can you say Jesus is the only way to heaven? Don ’ t all religions basically teach the same thing? Aren ’ t a lot of churchgoers hypocrites? With a gracious introductory note to skeptical readers and a generous sprinkling of inspiring quotes throughout, this handy resource is an enjoyable read as well as a powerful evangelistic tool.

Planning is an important management function and its effective execution is crucial to ensure the success of any project. This second edition of Thomas Uher ' s and Adam Zantis' textbook maintains its focus on operational rather than strategic aspects of programming and scheduling of projects, providing the reader with the practical planning skills needed to be successful. Unlike most other textbooks that largely focus on the critical path method, Programming and Scheduling Techniques includes a comprehensive review of a range of practices used around the world. Topics covered in this thoroughly revised edition include: deterministic scheduling techniques including the bar chart, the

critical path method, the critical chain method, the multiple activity chart and the line of balance a comparison of the critical path and critical chain scheduling techniques options for computer-based scheduling stochastic scheduling techniques including the critical path method based on Monte Carlo simulation and the Program Evaluation and Review Technique (PERT) risk in scheduling work study. By covering a broad range of scheduling techniques this book is suitable for those planning projects in any industry, particularly in interdisciplinary or international contexts. Written for students studying undergraduate and postgraduate architecture, building, construction/project management, quantity surveying, property development and civil engineering programs. Reflecting this state of affairs, there are a dizzying number of publications on the market, most of which are quite specialized.

The Refurbishment Manual cuts through this jungle of publications. It defines terms and concepts, combines the narrowly focused perspectives of the specialists, and offers concrete approaches to this wide-ranging topic. The Refurbishment Manual closes the gap between basic constructional literature and one-sided, highly specialized technical literature. It constitutes a practical planning aid on the subject of refurbishment, providing a basic introduction to the relevant aspects of building physics, fire protection, sustainability
