When Zozimos is banished by an evil witch (his stepmother!) from the kingdom of Sticatha-the kingdom he was next in line to rule-he trains at battle (if you call chasing after butterflies training), travels across stormy seas (thanks for that, Poseidon), slays golems and monsters (with a lot of help), charms beautiful women (not really), and somehow (despite his own ineptitude) survives quest after quest. By the love of Zeus, though, none of it brings him any closer to home! It does, however, make for one quirky, original, giggle-provoking graphic novel sure to appeal to any kid interested in Greek mythology, or merely looking for an entertaining read.

This Technical Note discusses findings of interconnectedness and spillover analysis on Italy. The market-based measures of tail risks and interconnectedness among key banks and insurance companies in Italy have declined from their peak but remain at elevated levels. Although the stress on Banca Monte dei Paschi di Siena has been manifesting on its own, the market perception about the condition of the banks appears to be increasingly contaminating the market views on other Italian financial institutions. It is also observed that exogenous factors, such as the Italian sovereign, are the key source of systemic risk for the market pricing of Italian financial institutions.
