This is the Oz book which L. Frank Baum considered his best. It starts quietly enough with Trot and Cap'n Bill rowing along a shore of the Pacific Ocean to visit one of the many caves near their home on the California coast. Suddenly, a mighty whirlpool engulfs them. The old sailorman and the little girl are miraculously saved and regain consciousness to find themselves

in a sea cavern. (To this day, Trot asserts she felt mermaid arms about her during those terrible moments under water.) From here on, one perilous adventure crowds in upon another. In Jinxland they meet the Scarecrow who takes charge of things once Cap'n Bill is transformed into a tiny grasshopper with a wooden leg. An exciting royal reception greets the adventurers upon their return to the Emerald City.

From the internationally bestselling author and prizewinning economist--a highly original guide to the global economy. In his bestselling 23 Things They Don't Tell You About Capitalism, Cambridge economist Ha-Joon Chang brilliantly debunked many of the predominant myths of neoclassical economics. Now, in an entertaining and accessible primer, he explains how the global economy actually works-in real-world terms. Writing with irreverent wit, a deep knowledge of history, and a disregard for conventional economic pieties, Chang offers insights that will never be found in the textbooks. Unlike many economists, who present only one view of their discipline, Chang introduces a wide range of economic theories, from classical to Keynesian, revealing how each has its strengths and weaknesses, and why there is no one way to explain economic behavior. Instead, by ignoring the received wisdom and exposing the myriad forces that shape our financial world, Chang gives us the tools we need to understand our increasingly global and interconnected world often driven by economics. From the future of the Euro, inequality in China, or the condition of the American manufacturing industry here in the United States-Economics: The User's Guide is a concise and expertly crafted guide to economic fundamentals that offers a clear and accurate picture of the global economy and how and why it affects our daily lives.

Wall Street Journal Bestseller! Next Big Idea Club selection chosen by Malcolm Gladwell, Susan Cain, Dan Pink, and Adam Grant as one of the "two most groundbreaking new nonfiction reads of the season!" "A must-read that topples the idea that emotions don't belong in the workplace." --Susan Cain, author of Quiet A hilarious guide to effectively expressing your emotions at the office, finding fulfillment, and defining work-life balance on your own terms.

---

How do you stop the office grouch from ruining your day? How do you enjoy a vacation without obsessing about the unanswered emails in your inbox? If you're a boss, what should you do when your new, eager hire wants to follow you on Instagram? The modern workplace can be an emotional minefield, filled with confusing power structures and unwritten rules. We're expected to be authentic, but not too authentic. Professional, but not stiff. Friendly, but not an oversharer. Easier said than done! As both organizational consultants and regular people, we know what it's like to experience uncomfortable emotions at work - everything from mild jealousy and insecurity to panic and rage. Ignoring or suppressing what you feel hurts your health and productivity -- but so does letting your emotions run wild. Our goal in this book is to teach you how to figure out which emotions to toss, which to keep to yourself, and which to express in order to be both happier and more effective. We'll share some surprising new strategies, such as: \* Be selectively vulnerable: Be honest about how you feel, but don't burden others with your deepest problems. \* Remember that your feelings aren't facts: What we say isn't always what we mean. In times of conflict and miscommunication, try to talk about your emotions without getting emotional. \* Be less passionate about your job: Taking a chill pill can actually make you healthier and more focused. Drawing on what we've learned from behavioral economics, psychology, and our own experiences at countless organizations, we'll show you how to bring your best self (and your whole self) to work every day.
