It examines the devastating global impact caused by opioids and is replete with information and resources that can be immediately applied to addiction work. The authors' pragmatic, strengths-based approach to treatment is based on a collaborative counselor-client working alliance to achieve client readiness for change, moderation, and abstinence. In addition, Drs. Alderson and Gladding provide a number of counseling approaches and treatment options that consider work with women, youth, people of color, LGBTQ+ individuals, veterans, older adults, people with disabilities, individuals in the criminal justice system, and rural residents. Five useful appendices conclude the book, including a listing of 20 opioid drugs in descending order of potency; common ICD-10, ICD-10-CM, and ICD-11 codes; and a glossary of terms and abbreviations. Unpacks the twenty-one most common myths and misconceptions about Native Americans In this enlightening book, scholars and activists Roxanne Dunbar-Ortiz and Dina Gilio-Whitaker tackle a wide range of myths about Native American culture and history that have misinformed generations. Tracing how these ideas evolved, and drawing from history, the authors disrupt long-held and enduring myths such as: "Columbus Discovered America" "Thanksgiving Proves the Indians Welcomed Pilgrims" "Indians Were Savage and Warlike" "Europeans Brought Civilization to Backward Indians" "The United States Did Not Have a Policy of Genocide" "Sports Mascots Honor Native Americans" "Most Indians Are on Government Welfare" "Indian Casinos Make Them All Rich" "Indians Are Naturally Predisposed to Alcohol" Each chapter deftly shows how these myths are rooted in the fears and prejudice of European settlers and in the larger political agendas of a settler state aimed at acquiring Indigenous land and tied to narratives of erasure and disappearance. Accessibly written and revelatory, "All the Real Indians Died Off" challenges readers to rethink what they have been taught about Native Americans and history.

From Ayurvedic texts to botanical medicines to genomics, ideas and expertise about veterinary healing have circulated between cultures through travel, trade, and conflict. In this broad-ranging and accessible study spanning 400 years of history, Susan D. Jones and Peter A. Koolmees present the first global history of veterinary medicine and animal healing. Drawing on inter-disciplinary and multi-disciplinary perspectives, this book addresses how attitudes toward animals, disease causation theories, wars, problems of food insecurity and the professionalization and spread of European veterinary education have shaped new domains for animal healing, such as preventive medicine in intensive animal agriculture and the need for veterinarians specializing in zoo animals, wildlife, and pets. It concludes by considering the politicization of animal protection, changes in the global veterinary workforce, and concerns about disease and climate change. As mediators between humans and animals, veterinarians and other animal healers have both shaped, and been shaped by, the social, cultural, and economic roles of animals over time.

The European Union is facing a profound crisis and is confronted with multiple challenges. Over the last two decades, it has experienced a series of dramatic changes to its powers, its institutional design, its constitutional framework and its borders. At the same time, the uneasy relationship between European citizens and elites has complicated both the reform and the function of the Union. While the Lisbon treaty provided some answers to crucial questions, it did not clarify the nature of the EU, which remains at the crossroads of federal and intergovernmental logic. The current economic and financial crisis puts the EU's legitimacy further

under pressure and creates the impression of a turning point. This book provides a concise analysis of the EU and its dynamics by paying particular attention to its day to day operation. It aims to help students and scholars understand its evolution, its institutions, its decision-making and the interactions between the EU and various actors. Avoiding abstract theorizing, the authors propose an easy to read analysis of how the Union works while recognizing the complexity of the situation. Throughout the book, the key issues of European integration are addressed: democratic deficit, politicization, the role of member states, institutional crisis and citizen involvement.

*Self-Controlled Case Series Studies: A Modelling Guide with R* provides the first comprehensive account of the self-controlled case series (SCCS) method, a statistical technique for investigating associations between outcome events and time-varying exposures. The method only requires information from individuals who have experienced the event of interest, and automatically controls for multiplicative time-invariant confounders, even when these are unmeasured or unknown. It is increasingly being used in epidemiology, most frequently to study the safety of vaccines and pharmaceutical drugs. Key features of the book include: A thorough yet accessible description of the SCCS method, with mathematical details provided in separate starred sections. Comprehensive discussion of assumptions and how they may be verified. A detailed account of different SCCS models, extensions of the SCCS method, and the design of SCCS studies. Extensive practical illustrations and worked examples from epidemiology. Full computer code from the associated R package SCCS, which includes all the data sets used in the book. The book is aimed at a broad range of readers, including epidemiologists and medical statisticians who wish to use the SCCS method, and also researchers with an interest in statistical methodology. The three authors have been closely involved with the inception, development, popularisation and programming of the SCCS method.

In this innovative work which combines theory and practice, Suzanne Haeyen explores how art therapy can be useful to people with emotion regulation problems, or 'personality disorders', in diagnostic terms. Covering a number of basic themes encountered in clients with personality disorders, it offers insight into the theory behind art therapy techniques and discusses the current state of research in the field. In its second part the author provides a workbook based on aspects of dialectical behavioural therapy skill training developed by Marsha Linehan, including mindfulness, emotion regulation, interpersonal effectiveness and distress tolerance. This section also

discusses the use of schema-focused therapy; a method developed by Jeffrey Young, and offers a number of exercises for use in specific practice situations. Alongside summaries of the theory, the author explores the multidisciplinary nature of these therapeutic methods and provides 106 exercises which have been developed in practice. This book offers new ideas and practical tools that will be invaluable to all art therapists working with clients who have difficulties expressing, recognising or coping with their feelings, and who find expressing their feelings through creative work easier than with words.

NOW A MAJOR MOTION PICTURE—The #1 New York Times bestselling worldwide sensation with more than 15 million copies sold, hailed by The New York Times Book Review as "a painfully beautiful first novel that is at once a murder mystery, a coming-of-age narrative and a celebration of nature." For years, rumors of the "Marsh Girl" have haunted Barkley Cove, a quiet town on the North Carolina coast. So in late 1969, when handsome Chase Andrews is found dead, the locals immediately suspect Kya Clark, the so-called Marsh Girl. But Kya is not what they say. Sensitive and intelligent, she has survived for years alone in the marsh that she calls home, finding

friends in the gulls and lessons in the sand. Then the time comes when she yearns to be touched and loved. When two young men from town become intrigued by her wild beauty, Kya opens herself to a new life—until the unthinkable happens. Where the Crawdads Sing is at once an exquisite ode to the natural world, a heartbreaking coming-of-age story, and a surprising tale of possible murder. Owens reminds us that we are forever shaped by the children we once were, and that we are all subject to the beautiful and violent secrets that nature keeps.
