Foreword by Jacques F. Vallee Introduction by Burt Rutan Commentary by Tom Clancy A never-before-heard firsthand account of a government insider's experience on the cutting edge of UFO exploration; includes a new afterword "Forget everything you think you know about UFOs - this insider's account exposes the reality... Packed with top grade information, insightful analysis and fascinating anecdotes, Alexander's interesting and controversial book sets the gold standard for titles on this subject." -Nick Pope, author of Open Skies, Closed Minds "Changes the playing field for both true believers and skeptics alike. Alexander strongly warns, be careful what you wish for when asking for presidential intervention. Success could set the field of ufology back decades." --George Noory, host of Coast to Coast AM While still on active duty in the U.S. Army during the 1980s, Colonel John B.

Alexander, Ph.D. created an interagency group to explore the controversial topic of UFOs. All members held Top Secret clearance. What they discovered was not at all what was expected. UFOs covers the numerous cases they saw, and answers questions like: • What was really in Hanger 18? • Did a UFO land at Holloman Air Force Base? • What happened at Roswell? • What is Majestic 12? • What is the Aviary? • What does the government know about UFOs? • What has happened with disclosure in other countries? • Has the U.S. reverse engineered a UFO? • Why don't presidents get access to UFO info? UFOs is at once a complete account of Alexander's findings, and a call to action. There are no conspiracy theories here--only hard facts--but they are merely the beginning.

Kisses From Jack: The Other Side of a Billionaire Love Story Trafford Publishing

Innovation in information and production technologies is creating benefits and disruption, profoundly altering how firms and markets perform. Digital DNA provides an in depth examination of the opportunities and challenges in the fast-changing global economy and lays out strategies that countries and the international community should embrace to promote robust growth while addressing the risks of this digital upheaval. Wisely guiding the transformation in innovation is a major challenge for global prosperity that affects everyone. Peter Cowhey and Jonathan Aronson demonstrate how the digital revolution is transforming the business models of high tech industries but also of traditional agricultural, manufacturing, and service sector firms. The rapidity of change combines with the uncertainty of winners and losers to create political and economic tensions over how to adapt public policies to new technological and market surprises. The logic of the policy trade-offs confronting society, and the political economy of practical decision-making is explored through three developments: The rise of Cloud Computing and trans-border data flows; international collaboration to reduce cybersecurity risks; and the consequences of different national standards of digital privacy protection. The most appropriate global strategies will recognize that a significant diversity in individual national policies is inevitable. However, because digital technologies operate across national boundaries there is also a need for a common international baseline of policy fundamentals to facilitate "quasi-convergence" of these national policies. Cowhey and Aronson's examination of these dynamic developments lead to a measured proposal for authoritative "soft rules" that requires governments to create policies that achieve certain objectives, but leaves the specific design to national discretion. These rules should embrace mechanisms to work with

expert multi-stakeholder organizations to facilitate the implementation of formal agreements, enhance their political legitimacy and technical expertise, and build flexible learning into the governance regime. The result will be greater convergence of national policies and the space for the new innovation system to flourish.

History of the Negro Race in America from 1619 to 1880 Blake Pierce

Apocalypse shapes the experience of millions of Americans. Not because they face imminent cataclysm, however true this is, but because apocalypse is a story they tell themselves. It offers a way out of an otherwise irredeemably unjust world. Adherence to it obscures that it is a story, rather than a description of reality. And it is old. Since its origins among Jewish writers in the first centuries BCE, apocalypse has recurred as a tempting and available form through which to express

a sense of hopelessness. Why has it appeared with such force in the US now? What does it mean? This book argues that to find the meaning of our apocalyptic times we need to look at the economics of the last five decades, from the end of the postwar boom. After historian Robert Brenner, this volume calls this period the long downturn. Though it might seem abstract, the economics of the long downturn worked its way into the most intimate experiences of everyday life, including the fear that there would be no tomorrow, and this fear takes the form of 'neoliberal apocalypse'. The varieties of neoliberal apocalypse--horror at the nation's commitment to a racist, exclusionary economic system; resentment about threats to white supremacy; apprehension that the nation has unleashed a violence that will consume it; claustrophobia within the limited scripts of neoliberalism; suffocation under the weight of debt--together form the discordant chord that hums under American life in the twenty-first century. For many of us, for different reasons, it feels like the end is coming soon and this book explores how we came to this, and what it has meant for literature.

Fear and Loathing in Las Vegas St. Martin's Griffin

Finally, kisses from the billionaire's point of view... Jack Saunders wanted one last hurrah before taking the mantle of DS Oil & Gas, the billion-dollar company that his father founded. His friend, Owen, let him borrow his mansion on a tropical island so that he could throw a final party before "marrying" the business that would dominate the rest of his life. He brought his secretary, Brandy, hoping that he could kindle a relationship that would last through the long days and nights of running a company. However, while the party was great, the gold digging woman he brought was not, and Jack resigned himself to a lifetime of loneliness. That was until he took a walk down the beach and met her. A woman who didn't recognize him from the tabloids and only saw him, the man behind the money. Of all the women Jack had ever met, there was nobody like Emma LaRue. With one pretend marriage ceremony, she would change his life forever, and become the only one he ever wanted to give his saltwater kisses to. This novella is the first half of Saltwater Kisses written from Jack's point-of-view, with a few bonus scenes thrown in as well. It contains the first half of Saltwater Kisses as a sample

and also throws in the cast of all the Kisses books in an ensemble that is sure to make any of Krista Lakes' fans happy! --- Emma pushed open her door and nearly stepped inside before he caught her. "What do you think you're doing?" Jack asked, his eyes twinkling. Despite running along the beach, he wasn't out of breath from running. He was out of breath controlling himself with Emma. It had taken every ounce of willpower he processed to get her back to the hotel room. The only reason he had managed to wait was that it was technically their wedding. He was looking forward to this part. "Opening the door?" Emma cocked her head to the side, confused. She had sprinted just as hard to get back here. With a fluid motion, Jack scooped her up in his arms. She giggled as she realized what he was doing, wrapping her arms around his neck and holding him close. She pressed her nose into his throat and inhaled, taking in the scent of him. It made his heart race with primal need. He carried her to the bedroom, setting her down gently on the floor. She held onto him for an extra moment, as if she were soaking him into her skin. When she looked up at him, her long lashes fluttering over sea-green eyes, his heart melted into a puddle on the floor. She stepped back and in a one smooth motion raised the hem of her sundress up and over her head. All she had on was a pair of tiny white panties. Jack's breath caught and all the need he had been keeping tamped down came roaring to life...

Civil Rights and African Americans Vintage

A Quaker's faith is tested during the War of 1812 in this "stunning work of historical fiction" (Kirkus Reviews, starred review). Mark Greenhow, a naive and peaceful Quaker, lands on the shores of North America on the eve of the War of 1812, thinking only of finding the missing sister, a missionary whose adventurous spirit he has always admired. His pursuit begins by hitching a ride with the voyageurs who have canoed the rivers, transporting the tons of furs that feed the trade that has made the region a battleground of the French and British empires. Though Mark enters this brave new world with his conscience clean and his convictions sound, his encounters with a place and people he never could have imagined test his rigid upbringing. The backwoods of Canada have certainly led his sister astray; she has been excommunicated from the Society of Friends for running off with a non-Quaker. After her child is stillborn she runs again, deep into Indian country. On this increasingly desperate search, Mark finds himself among spies and domestic warriors, displaced natives, infidels, and the pious each engaged in their own battles to maintain their particular way of life. With Elphinstone's crisp and effortless prose, coupled with her riveting, organic way with description, her fully drawn characters, and the history of the region, she "brings the landscapes and peoples of 1800s Canada back to thrilling life in her pacy, colorful and intelligent epic: the finest trip along these rivers since Brian Moore's great Black Robe" (The Independent).
