'Fascinating . . . Shot through with fresh insights . . . No previous biography has attempted anything so comprehensive.'
Observer Nelson is a thrilling new appraisal of Horatio Nelson, the greatest practitioner of naval command the world has ever seen. It explores the professional, personal, intellectual and practical origins of one man's genius, to understand how the greatest warrior that Britain has ever produced transformed the art of conflict, and enabled his country to survive the challenge of total war and international isolation. In Nelson, Andrew Lambert - described by David Cannadine as 'the outstanding British naval historian of his generation' - is able to offer new insights into the individual quality which led Byron rightly to celebrate Nelson's genius as 'Britannia's God of War'. He demonstrates how Admiral Nelson elevated the business of naval warfare to the level of the sublime. Nelson's unique gift was to take that which other commanders found complex, and reduce it to simplicity. Where his predecessors and opponents saw a particular battle as an end in itself, Nelson was always a step ahead - even in the midst of terrifying, close-quarters action, with officers and men struck down all around him. 'Excellent . . . Worthy of the stirring events [it celebrates].' Independent

Through careful research and colorful accounts, historian Paul A. Gilje discovers what liberty meant to an important group of common men in American society, those who lived and worked on the waterfront and aboard ships. In the process he reveals that the idealized vision of liberty associated with the Founding Fathers had a much more immediate and complex meaning than previously thought. In Liberty on the Waterfront: American Maritime Culture in the Age of Revolution, life aboard warships, merchantmen, and whalers, as well as the interactions of mariners and others on shore, is recreated in absorbing detail. Describing the important contributions of sailors to the resistance movement against Great Britain and their experiences during the Revolutionary War, Gilje demonstrates that, while sailors recognized the ideals of the Revolution, their idea of liberty was far more individual in nature—often expressed through hard drinking and womanizing or joining a ship of their choice. Gilje continues the story into the post-Revolutionary world highlighted by the Quasi War with France, the confrontation with the Barbary Pirates, and the War of 1812.

Examining the growth trend towards community rehabilitation in neurology, this book is directed towards all clinicians involved with neurorehabilitation. The study analyzes community rehabilitation needs from diverse international perspectives that include the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation plans are presented, and supplemental case studies highlight the main issues. Chapters also cover the disabled child in the community and neuropsychological rehabilitation.

The Age of Revolutions in Global Context, c. 1760-1840 Cambridge University Press
Sailing the tide of a tumultuous era of Atlantic revolutions, a remarkable group of African-born and African-descended individuals transformed themselves from slaves into active agents of their lives and times. Big Prince Whitten, the black Seminole Abraham, and General Georges Biassou were “ Atlantic creoles, ” Africans who found their way to freedom by actively engaging in the most important political events of their day. These men and women of diverse ethnic backgrounds, who were fluent in multiple languages and familiar with African, American, and European cultures, migrated across the new world ’ s imperial boundaries in search of freedom and a safe haven. Yet, until now, their extraordinary lives and exploits have been hidden from posterity. Through prodigious archival research, Jane Landers radically alters our vision of the breadth and extent of the Age of Revolution, and our understanding of its actors. Whereas Africans in the Atlantic world are traditionally seen as destined for the slave market and plantation labor, Landers reconstructs the lives of unique individuals who managed to move purposefully through French, Spanish, and English colonies, and through Indian territory, in the unstable century between 1750 and 1850. Mobile and adaptive, they shifted allegiances and identities depending on which political leader or program offered the greatest possibility for freedom. Whether fighting for the King of Kongo, England, France, or Spain, or for the Muskogee and Seminole chiefs, their thirst for freedom helped to shape the course of the Atlantic revolutions and to enrich the history of revolutionary lives in all times.

Slave Ship Sailors and Their Captive Cargoes, 1730-1807 OUP Oxford
The criminal law has often been seen as central to the rule of the eighteenth-century landed é lite in England. This book presents a detailed analysis of the judicial processs - of victims' reactions, pretrial practices, policing, magistrates hearings, trials, sentencing, pardoning and punishment - using property offenders as its main focus. The period 1740-1820 - the final era before the coming of the new police and the repeal of the capital code - emerges as the great age of discretionary justice, and the book explores the impact of the vast discretionary powers held by many social groups. It reassesses both the relationship between crime rates and the economic deprivation, and the many ways that vulnerability to prosecution varied widely across the lifecycle, in the light of the highly selective nature of pretrial negotiations. More centrally, by asking at every stage - who used the law, for what purposes, in whose interests and with what social effects - it opens up a number of new perspectives on the role of the law in eighteenth-century social relations. The law emerges as less the instrument of particular é lite groups and more as an arena of struggle, of negotiation, and of compromise. Its rituals were less controllable and its merciful moments less manageable and less exclusively available to the gentry é lite than has been previously suggested. Justice was vulnerable to power, but was also mobilised to constrain it. Despite the key functions that the propertied fulfilled, courtroom crowds, the counter-theatre of the condemned, and the decisions of the victims from a very wide range of backgrounds had a role to play, and the criteria on which decisions were based were shaped as much by the broad and more humane discourse which Fielding called the 'good mind' as by the instrumental needs of the propertied é lites.

While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with The Last Warning, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's The Shadow short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

If a picture is worth a thousand words, then it's a good bet that at least half of those words relate to the picture's copyright status. Art historians, artists, and anyone who wants to use the images of others will find themselves awash in byzantine legal terms, constantly evolving copyright law, varying interpretations by museums and estates, and despair over the complexity of the whole situation. Here, on a white—not a high—horse, Susan Bielstein offers her decades of experience as an editor working with illustrated books. In doing so, she unsnarls the threads of permissions that have ensnared scholars, critics, and artists for years. Organized as a series of “ takes ” that range from short sidebars to extended discussions, Permissions, A Survival Guide explores intellectual property law as it pertains to visual imagery. How can you determine whether an artwork is copyrighted? How do you procure a high-quality reproduction of an image? What does “ fair use ” really mean? Is it ever legitimate to use the work of an artist without permission? Bielstein discusses the many uncertainties that plague writers

who work with images in this highly visual age, and she does so based on her years navigating precisely these issues. As an editor who has hired a photographer to shoot an incredibly obscure work in the Italian mountains (a plan that backfired hilariously), who has tried to reason with artists' estates in languages she doesn't speak, and who has spent her time in the archival trenches, she offers a snappy and humane guide to this difficult terrain. Filled with anecdotes, asides, and real courage, Permissions, A Survival Guide is a unique handbook that anyone working in the visual arts will find invaluable, if not indispensable.

John Joseph wants men to know, in no uncertain terms, that they don ’ t need to eat steak, burgers, wings, ribs, or any other animal product, for that matter, to be strong—in fact, he would argue, eating animals is for the weak. Because when your protein sources come from animals, you ’ re missing out on all of the nutritional benefits of a plant-based diet—a diet that can make you more fit, more sexy, and more manly. In Meat is for Pussies, Joseph presents a throw-down of information, offering both personal and scientific evidence that a plant-based diet offers the best path to athleticism, endurance, strength, and overall health. In addition to handily dispelling the myths surrounding meat, Joseph offers workout advice, a meal plan, and recipes that make going plant-based easy. Flavor and vitamin-packed options like the Working Man Stew and Veggie Chili with Cornbread will keep men ’ s (and women ’ s) bodies healthy and energized, while workouts that emphasize cardio and strength training build endurance and stamina and prove that you don ’ t need meat to build muscle. Joseph also offers living proof that living a plant-based lifestyle is badass, from super-athlete Brendan Brazier to MMA champion Jake Shields to Joseph himself, who is an Ironman Triathlete and still rocking out (at the age of fifty-two) on world tours as the frontman for his legendary band the Cro-Mags. Joseph ’ s passion for educating the world about the benefits of a plant-based diet comes through on each page, in a voice and a vocabulary that is uniquely his own. At the end of the day, he wants readers to live a long, healthy, happy life . . . and he won ’ t take no for an answer.
