The state-of-the-art in NMR spectral analysis. This interactive tutorial provides readers with a comprehensive range of software tools and techniques, as well as the necessary theoretical knowledge required to analyze their spectra and obtain the correct NMR parameters. Modern Spectral Analysis provides expert guidance, by presenting efficient strategies to extract NMR parameters from measured spectra. A database of selected spectra and modern, powerful WIN-NMR software designed by Bruker are provided on the enclosed CD-ROM. The programs provided are 1 D WIN-NMR, WIN-DAISY, WIN-DR and WIN-DYNAMICS, and direct data exchange between all these programs is possible. Readers are shown how they can obtain maximum structural information from their 1 D NMR spectra with time-saving computer assistance. Practical problems that can occur and their solutions are discussed at length using clear, easy-to-follow examples. Both homo- and heteronuclear and first- and second-order spin systems are demonstrated. Moreover, relaxation analysis, nuclear Overhauser effects and magnetic site exchange are all covered in this hands-on guide to NMR spectral analysis.

Neurobiology of Monotremes brings together current information on the development, structure, function and behavioural ecology of the monotremes. The monotremes are an unusual and evolutionarily important group of mammals showing striking behavioural and physiological adaptations to their niches. They are the only mammals exhibiting electroreception (in the trigeminal sensory pathways) and the echidna shows distinctive olfactory specialisations. The authors aim to close the current gap in knowledge between the genes and developmental biology of monotremes on the one hand, and the adult structure, function and ecology of monotremes on the other. They explore how the sequence 'embryonic structure › adult structure › behaviour' is achieved in monotremes and how this differs from other mammals. The work also combines a detailed review of the neurobiology of monotremes with photographic and diagrammatic atlases of the sectioned adult brains and peripheral nervous system of the short-beaked echidna and platypus. Pairing of a detailed review of the field with the first published brain atlases of two of the three living monotremes will allow the reader to immediately relate key points in the text to features in the atlases and will extend a universal system of brain nomenclature developed in eutherian brain atlases by G Paxinos and colleagues to monotremes.

This highly illustrated manual provides practical guidance on structural steelwork detailing. It: describes the common structural shapes in use and how they are joined to form members and complete structures explains detailing practice and conventions provides detailing data for standard sections, bolts and welds emphasises the importance of tolerances in order to achieve proper site fit-up discusses the important link between good detailing and construction costs Examples of structures include single and multi-storey buildings, towers and bridges. The detailing shown will be suitable in principle for fabrication and erection in many countries, and the sizes shown will act as a guide to preliminary design. The second edition has been updated to take account of changes to standards, including the revisions to BS5950 and includes a new chapter on computer aided detailing.

Can you fall for someone you've never met? Hailey Taylor Emery has a hunch that her favorite client at Fetch--an anonymous virtual assistant service--is actually hockey star Matt Eriksson. Although it's against the rules for her to check his file, she's 95% sure she spends at least part of each day texting with her lifelong crush and catering to his every need. Still nursing a wounded heart thanks to her recent breakup, Hailey is perfectly content with some harmless online flirting...until she has to meet her client. Face to face. Cue: utter panic. Matt Eriksson is no stranger to heartbreak. He's still not over the destruction of his marriage, and it sucks to be the only guy on the team who knows the truth--that hockey and long-term relationships are a toxic mix. He barely sees his kids, and dealing with his ex makes him feel insane. The only person in his life who seems to understand is someone who won't show her pretty face. But it's nothing that a pair of fourth row hockey seats can't fix. Hailey can't resist the offer. Matt can't resist Hailey. Good thing he doesn't have to. Fire up the kiss cam! Warning: Contains rabid hockey fans, misunderstood dick pics, hockey players at the opera and exploding ovaries. Although the function of nitric oxide in a regulatory capacity in the central and peripheral nervous system is widely recognized, the full scope of its actions and its interrelationships with other classes of regulatory molecules is just beginning to be comprehended. This volume contains a number of sophisticated and advanced methods essential for exploring the activity of nitric oxide in the brain. It will be a valuable tool for the established investigator and for those just entering the field.

Draping—the art of using cotton muslin to create womenswear directly on a dress form—is an essential skill for fashion designers. Through a series of step-by-step projects, designed to develop skills from the most basic to more advanced techniques, this book will guide you in creating both classic and contemporary garments, as well as historical styles and costumes. Draping projects include dresses, bustiers, and jackets, and highlight key fashion garments such as Audrey Hepburn's dress from Breakfast at Tiffany's and the Dolce & Gabbana tuxedo jacket. Starting with the basics of choosing and preparing the dress form for draping, the book advances through pinning, trimming, and clipping, and creating shape using darts and tucks, to adding volume using pleats and gathers, and handling complex curves. Advanced skills include how to use support elements such as shoulder pads, under layers, and petticoats, and how to handle bias draping. The book culminates with a chapter on improvisational skills. Each skill and technique throughout the book is explained with step-by-step photographs and line drawings that bring the art of creating womenswear in three dimensions to life.

When someone is diagnosed with obsessive-compulsive disorder (OCD), chances are they've been living with the symptoms for a long time. People with OCD may have long felt embarrassed by their thoughts and behaviors, which may include fear of contamination, the need for symmetry, pathological doubt, aggressive thoughts, repeating behaviors, and obsessive cleaning. OCD: A Guide for the Newly Diagnosed helps readers understand how OCD works so they can develop better strategies for coping with their symptoms. This pocket guide offers guidance for coping with the diagnosis itself, discusses stigmas related to OCD, and includes help for readers unsure of who they should tell about the diagnosis. Readers also

learn about the most effective treatment approaches and easy ways to begin to manage their OCD symptoms. An OCD diagnosis can be a devastating event, or it can be a catalyst for positive change. Books in the Guides for the Newly Diagnosed series provide readers with all the tools they need to process a diagnosis in the healthiest way possible, and then move forward to manage their symptoms so that the disorder doesn't get in the way of living a fulfilling life. This book has been awarded The Association for Behavioral and Cognitive Therapies Self-Help Seal of Merit — an award bestowed on outstanding self-help books that are consistent with cognitive behavioral therapy (CBT) principles and that incorporate scientifically tested strategies for overcoming mental health difficulties. Used alone or in conjunction with therapy, our books offer powerful tools readers can use to jump-start changes in their lives. This book is a part of New Harbinger Publications' Guides for the Newly Diagnosed series. The series was created to help people who have recently been diagnosed with a mental health condition. Our goal is to offer user-friendly resources that provide answers to common questions readers may have after receiving a diagnosis, as well as evidence-based strategies to help them cope with and manage their condition, so that they can get back to living a more balanced life. Visit www.newharbinger.com for more books in this series.
