

Who Owns Global Digital Solutions

As recognized, adventure as with ease as experience approximately lesson, amusement, as capably as treaty can be gotten by just checking out a books **Who Owns Global Digital Solutions** also it is not directly done, you could receive even more vis--vis this life, something like the world.

We find the money for you this proper as capably as simple showing off to get those all. We give Who Owns Global Digital Solutions and numerous books collections from fictions to scientific research in any way. in the middle of them is this Who Owns Global Digital Solutions that can be your partner.

Nelson's Directory of Investment Research Springer Nature

Asia is home to 60 per cent of the world's population, including the world's two most populous nations, China and India. The region's economic gains and rising middle class are accelerating demand for more consumer goods and a better quality of life. For further economic growth to be realised, the region will need a massive supply of additional energy, three- to five-fold 2020 's amount by 2050. These changes create new business and investment opportunities for domestic companies and overseas participants. Asia 's energy market, already the world 's biggest, will soon be the most advanced. There will be mass adoption of digital technologies, like artificial intelligence, to make the distribution of solar, wind and other clean resources, smarter and more efficient. Led by China, billions of dollars in capital investment will drive the region's shift to green, sustainable energy, replacing polluting and expensive fossil fuels, which will help to rein in climate change. In Asia 's Energy Revolution, leading energy markets analyst and practitioner Joseph Jacobelli explains why Asia is the world 's most important territory for energy transition, how developments in the region will drive change in the rest of the world as well as how it will all be financed. The book discussion includes:

Analysis of past events and forward-looking analysis of the industry in the region encompassing commercial, economic, and financial aspects
Appraisal of new energy technologies, such as electric vehicles, and digital solutions, such as blockchain for energy
Review of the capital flows and sustainable financing channels needed to fund energy infrastructure and tech growth
What's Your Digital Business Model? Springer Nature

Singapore's FinTech journey has been a story of relentless pursuit of excellence to build a global financial service hub with limited means and lots of aspirations. The slogan of 'Dream big. Start small. Move fast' has rallied regulators, startups, investors, corporates and everyone else to achieve a common goal. One of the critical superpowers of Singapore is a national character built on survival instinct and a distinctive obsession with being successful. Singaporeans by nature are kiasu (a Hokkien word which can be loosely translated to fear of missing out), and they wear it as a badge of honour. Being kiasu drives Singaporeans to be constantly paranoid, doing everything they can to achieve success. It creates a certain fanaticism about meritocracy and instils a belief that one can never be complacent. In a regulated industry, our fear is our biggest strength, pushing us to comply with a wide range of ever-evolving regulations. The durable social fabric supports an adherence to order and authority. It proves to be a significant asset when it comes to developing and supporting a heavily regulated industry like financial services. Singapore attracts people across the region to build their ventures in the domains of finance and technology. This book traces Singapore's journey from 2015 till today starting with establishment of regional hubs and globalisation of FinTech innovation. The key principles which established Singapore as a FinTech Nation have been an obsession with excellence referred to as RFFL (Right First, Fast Later), a unique model of economic and legal policies known as Singanomics and lastly, an organised and controlled model of a new idea development termed Garden Innovation.

Wireless Internet Cambridge University Press

Knowledge and information have significant impacts on individuals' daily lives and activities, especially when referring to the new economy and the global knowledge societies. However, the COVID-19 pandemic has caused massive disruptions in the creation of the vital inclusive global information society. Due to this change,

further study on the current difficulties and best practices of creating global knowledge societies is required in order to ensure communities can continue to advance and information is shared appropriately. The Handbook of Research on Building Inclusive Global Knowledge Societies for Sustainable Development aims at providing an updated view of the newest trends, novel practices, and latest tendencies concerning building inclusive global knowledge societies for sustainable development while focusing on the benefits and the opportunities derived from the new economy and the global knowledge societies. Covering topics such as smart cities, food security, and climate change, this major reference work is ideal for policymakers, government officials, business owners, managers, academicians, scholars, researchers, practitioners, instructors, and students.

Social Innovation, Entrepreneurship, and Sport for Development and Peace Springer Nature

This brand strategy book is a carefully curated collection of the best brand-thinking over the last decade or so, adapted specifically for our time. Use it to position your brand and to stand out amongst the competition. Give your brand a personality people can identify with. Give folks good reason to stay loyal, and to support and cheer on your brand's next project. Strong brands are more profitable, attract the best talent, and are highly valued. This book is a toolbox for everyone who sees the value of digging a little deeper, to aim much higher. Monna Nordhagen is Nordic Strategy Director of Scandinavian Design Group, serial entrepreneur and voracious reader. She holds an MBA from the Norwegian Business School BI and has more than three decades worth of experience within business strategy, brand building, sales and management. Monna is also a highly sought after presenter with a passion for innovation, brands and entrepreneurship, speaking regularly at conferences and events. Kirsti Rogne has worked with international brands in the intersecting fields of marketing and communication for well over a decade; including as a Client Director and Copywriter for Scandinavian Design Group. She holds a post graduate degree in English from the University of Oslo and currently works as a freelance writer, lecturer and translator.

The Future of Digital Finance In Southeast Asia Blue Rose Publishers

Digital transformation is not about technology--it's about change. In the rapidly changing digital economy, you can't succeed by merely tweaking management practices that led to past success. And yet, while many leaders and managers recognize the threat from digital--and the potential opportunity--they lack a common language and compelling framework to help them assess it and guide them in responding. They don't know how to think about their digital business model. In this concise, practical book, MIT digital research leaders Peter Weill and Stephanie Woerner provide a powerful yet straightforward framework that has been field-tested globally with dozens of senior management teams. Based on years of study at the MIT Center for Information Systems Research (CISR), the authors find that digitization is moving companies' business models on two dimensions: from value chains to digital ecosystems, and from a fuzzy understanding of the needs of end customers to a sharper one. Looking at these dimensions in combination results in four distinct business models, each with different capabilities. The book then sets out six driving questions, in separate chapters, that help managers and executives clarify where they are currently in an increasingly digital business landscape and highlight what's needed to move toward a higher-value digital business model. Filled with straightforward self-

assessments, motivating examples, and sharp financial analyses of where profits are made, this smart book will help you tackle the threats, leverage the opportunities, and create winning digital strategies.

Application of Emerging Technologies Springer Nature

Capitalism represents the greatest engine of material well-being that the world has ever seen. But scepticism about its viability has grown across the political spectrum, on the back of rising inequalities, climate change and digital disruptions. This book joins the debate about the crisis of capitalism--not by blindly defending the system, but by advocating concrete proposals to put it on a more socially and environmentally sustainable path. Too often, conversations about the future of capitalism consider it as a homogeneous socio-economic system whose features vary little from one location to another; this commonly leads to one-size-fits-all recommendations to address capitalism's flaws. The contributors to this book, by contrast, look at the transition needed from the perspective of capitalism's multi-faceted nature, in response to challenges including the green transition, the digital revolution and spiralling inequalities. These present difficult trade-offs in terms of growth, efficiency and stability, which each capitalist model will solve differently.

Big Tech Firms and International Relations IGI Global

Bringing together insights from political economy, public policy, science, technology and legal scholarship, this book explores the role of public procurement in digital technology regulation.

T-Byte Consulting & IT Services July 2021 IGI Global

As hyper-personalization has yet to be perfected, developing hyper-personalized strategies presents a critical challenge; due to this, optimizing hyper-personalization and designing new processes and business models takes center stage in tourism and hospitality to reach new levels of customer service and experience through the introduction and development of new solutions supported in the internet of things, software interfaces, artificial intelligence solutions, back-end and front-end management tools, and other emergent business intelligence strategies. Optimizing Digital Solutions for Hyper-Personalization in Tourism and Hospitality serves as an essential reference source that emphasizes the importance of hyper-personalization models, processes, strategies, and issues within tourism and hospitality fields with a particular focus on digital IT solutions. More than a simple starting point for a critical reflection on the state of the art of this sector, this book aims to contribute in an objective way to leveraging digital solutions to optimize the concept of hyper-personalization in the tourist experience. The content of this book covers research topics that include digital tourism and hospitality, consumer behavior, customer journey, and smart technologies and is ideal for professionals, executives, hotel managers, event coordinators, restaurateurs, travel agents, tour directors, policymakers, government officials, industry professionals,

researchers, students, and academicians in the fields of tourism and hospitality management, marketing, and communications.

Nelson Information's Directory of Investment Research World Bank Publications

Amid the opportunities and challenges we face at the dawn of the fifth industrial revolution, *Digital Literacy and Inclusion* presents a carefully curated selection of case studies, theories, research, and best practices based on digital literacy as a prerequisite for effective digital inclusion. More than a dozen experts provide deep insights in stories, research reports, and geographical studies of digital literacy and inclusion models, all from a multi-disciplinary perspective that includes engineering, social sciences, and education. *Digital Literacy and Inclusion* also highlights a showcase of real-world digital literacy initiatives that have been adopted by communities of practice around the globe. Contributors explore myriad aspects and modalities of digital literacy: digital skills related to creativity, urban data literacy, digital citizenship skills, digital literacy in education, connectivity literacy, online safety skills, problem-solving and critical-thinking digital skills, data literacy skills, mobile digital literacy, algorithmic digital skills, digital health skills, etc. They share the principles and techniques behind successful initiatives and examine the dynamics and structures that enable communities to achieve digital literacy efficiently and sustainably. Their practical solutions, propositions, and findings provide theoretically grounded and evidence-based facts that inform interventions intended to ensure that all citizens have and can enhance their digital literacy while meaningfully and responsibly participating in the digital economy and society. The ideas and histories in this book will appeal to scholars and researchers in the social sciences, engineering, education, sustainable digital technologies, and transformation, and will also be of interest to practitioners in industry, policy, and government.

Digital Technologies and Public Procurement
EGBG Services LLC

The dynamics of the world's pervasive digital technologies is transforming organisations and enabling enterprises to create sustainable competitive advantage. This presents huge economic opportunities for Africa. This book responds to the need for African enterprises and organisations—particularly those in the service sector—to fully exploit the inherent potential in digital platforms by putting in place processes to respond effectively to changing consumer demands. Digital service delivery is conceptualised as a key driver of effective management and service delivery across the value chain of businesses. The authors offer insights into the opportunities, drivers, structures, and models of digital service delivery specific to the African context, using case studies and country-based themes that highlight how the adoption of digital platforms and practices can transform service delivery for value-creation. The book examines the scope and applications of digital businesses, emphasising the emergence, value-creation, and strategic implications for Africa's private and public enterprises. Students, entrepreneurs, IT innovators, academics, and policymakers will gain a greater understanding of how digitalisation is shaping consumer expectations, industry practices, and service delivery in Africa.

T Bytes Consulting & IT Services European Alliance for Innovation

This book is a substantial re-write of the author's earlier book on management consultancy that has established itself as a leading book on this topic. This re-write focuses upon the analysis of the impact of e-business on the consulting industry as well as examining the changing structure of the industry and emerging segmentation. It also includes recent material on the efforts of consulting firms to manage knowledge more effectively and includes new and more examples and interviews.

Digitalization of Medicine in Low- and Middle-Income Countries Apress

This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. In one country, the prime minister pushes for the

liberalization of digital finance as a central pillar of the country's national strategy, while the central bank almost makes it a criminal offence. In another, the digital minister tries to scupper the very process to support digital transformation that the president has asked them to co-lead. This book gives a ringside seat on seven developing countries' tumultuous early steps on the path to a reform of the economy and the government using technology. Written by a group of academics and practitioners from Oxford at the heart of the process, but foregrounding the voices of the policymakers and participants, this book documents and critically assesses efforts to assist a set of governments to kick-start digital transformation. In doing so, it offers lessons for policymakers in other countries who want to pursue similar efforts. Beyond that, however, it is also an exposition of the process of policymaking more generally in the 2020s, and offers broader insight into how outsiders can play a sensible role in other reform processes in developing and emerging countries.

A New Spirit of Capitalism Vigmostad & Børke
Today, digital technologies represent an absolute must when it comes to creating new products and factories. However, day-to-day product development and manufacturing engineering operations have still only unlocked roughly fifty percent of the "digital potential". The question is why? This book provides compelling answers and remedies to that question. Its goal is to identify the main strengths and weaknesses of today's set-up for digital engineering working solutions, and to outline important trends and developments for the future. The book concentrates on explaining the critical basics of the individual technologies, before going into deeper analysis of the virtual solution interdependencies and guidelines on how to best align them for productive deployment in industrial and collaborative networks. Moreover, it addresses the changes needed in both, technical and management skills, in order to avoid fundamental breakdowns in running information technologies for virtual product creation in the future.

Resolute Japan IGI Global
Proceedings of the AHFE International Conference on Human Factors in Design, Engineering, and Computing (AHFE 2023 Hawaii Edition), Honolulu, Hawaii, USA 4-6, December 2023

Handbook of Research on Building Inclusive Global Knowledge Societies for Sustainable Development Emerald Group Publishing
Global Health Watch (GHW), now in its sixth edition, provides the definitive voice for an alternative discourse on health. It integrates rigorous analysis, alternative proposals and stories of struggles and change to present a compelling case for the imperative to work for a radical transformation of the way we approach actions and policies on health. It was conceived in 2003 as a collaborative effort by activists and academics from across the world, and is designed to question present policies on health and to propose alternatives Global Health Watch 6 (GHW6) has been coordinated by eight civil society organizations - the People's Health Movement, ALAMES, Health Poverty Action, Medico International, Third World Network, Medact, Sama and Viva Salud. With contributions from across the globe, GHW6 addresses key issues related to health systems and the range of social, economic, political and environmental determinants of health, locating decisions and choices that impact on health in the structure of global power relations and economic governance.

I-Bytes Business Services Industry Springer Nature

This book presents cutting-edge research and exploration of the role of nation-state when big tech firms present themselves as new participants in contemporary international relations that act on an equal footing with nation-states. The general research goal of this book is to identify the justifications that nation-states have adopted to regulate the big tech firms and the impacts of this process on international trade in the main

economies in the world. With the massive instrumentation of data, big tech firms have become actors with the capacity to intervene not only in economies but also, above all, in the politics of different countries with different systems. The emergence of big tech firms has transformed the approach to the concepts of national security, information management and access to new technologies among nation-states. The principles and fundamentals of cyber sovereignty have become one of the bases of states in the contemporary system of international relations. Today, the influence of big tech firms in different societies in the contemporary world is one of the main forms of power. This book tries to collect and present the recent state of the art in studies on the relationship between big tech firms and nation-states in the literature. It also addresses how governments such as those of the US, China and the EU are changing their legislation, creating control and data security mechanisms, imposing entry restrictions on foreign companies, and regulating the actions beyond the cloud of big tech firms inside and outside their borders.

Communities Of Innovation: How Organizations Harness Collective Creativity And Build Resilience
Hurst Publishers

This book follows on the authors' successful development of the Three-Pillar Model (3-P Model) for organizing and leading in disruptive times. Its focus is on helping the reader to implement the model and providing a wide variety of application cases for these VUCA times (Volatility, Uncertainty, Complexity and Ambiguity), including global crises like the COVID-19 pandemic. The book covers a broad range of organizations: private and public sector, NGOs, local and global governmental institutions, global organizations such as UN, etc. In addition, it shows how the 3-P Model can be applied to challenges in organization design, management and leadership.

Global Health Watch 6 University of Pennsylvania Press

This book includes selected papers presented at the International Conference on Marketing and Technologies (ICMarkTech 2021), held at University of La Laguna, Tenerife, Spain, during December 2-4, 2021. It covers up-to-date cutting-edge research on artificial intelligence applied in marketing, virtual and augmented reality in marketing, business intelligence databases and marketing, data mining and big data, marketing data science, web marketing, e-commerce and v-commerce, social media and networking, geomarketing and IoT, marketing automation and inbound marketing, machine learning applied to marketing, customer data management and CRM, and neuromarketing technologies.
