Spore 195: Smart farming - Transforming Agriculture with Artificial Intelligence
University of Michigan Press
Transforming Agriculture with Artificial Intelligence. At a time where the world needs to produce more with fewer resources, artificial intelligence (AI) could help to transform agriculture worldwide. SPORE is the quarterly magazine of the Technical Centre for Agricultural and Rural Cooperation (CTA), offering a global perspective on agribusiness and sustainable agriculture. CTA operates under the Cotonou Agreement between the countries of the Africa, Caribbean and Pacific (ACP) group and the European Union and is financed by the

EU .

Tourism Innovation in the Digital Era European Alliance for Innovation

Tourism Innovation in the Digital Era explores topics as diverse as big data analytics in tourism marketing to the impact of AI to the use of CSR in competitiveness amongst hotel groups, providing multidisciplinary approaches on the organizational impacts of digitalization and artificial intelligence in tourism and hospitality.

The Business Year: Dubai 2020 CTA

This brand strategy book is a carefully curated collection of the best brand-thinking over the last decade or so, adapted specifically for our time. Use it to position your brand and to stand out amongst the competition. Give your brand a personality people can identify with. Give folks good reason to stay loyal, and to support and cheer on your brand's next project. Strong brands are more profitable, attract the best talent, and are highly valued. This book is a toolbox for everyone who sees the value of digging a little deeper, to aim much higher.

Monna Nordhagen is Nordic Strategy Director of Scandinavian Design Group, serial entrepreneur and voracious reader. She holds an MBA from the Norwegian Business School BI and has more than three decades worth of experience within business strategy, brand building, sales and management.

Monna is also a highly sought after presenter with a passion for innovation, brands and entrepreneurship, speaking regularly at conferences and events.

Kirsti Rogne has worked with international brands in the intersecting fields of marketing and communication for well over a decade; including as a Client Director and Copywriter for Scandinavian Design Group. She holds a post graduate degree in English from the University of Oslo and currently works as a freelance writer, lecturer and translator.

Postal Services in the Digital Age Springer Nature

This book acts as a valuable quick-access resource on the challenges and opportunities that the digital age presents to organizational leadership. Balanced, comprehensive, and thought-provoking, the book will be useful to professionals and practitioners. The book

broadly follows a macro, meso, and micro approach to argumentation and is best read from beginning to end. The book synthesizes the historical context of technological revolutions and reflects on first-order results from enhanced use of information and communication technology in organizations; considers second-level impacts from information and communication technology on economy, society, work, and the very act of organizing; maps out core concepts of agility and principles that leaders should honor to exploit agility in newfound workforce ecosystems; showcases emerging leadership behaviors and mindsets; and specifies the good practice needed to plan and lead digital strategies. The book invites reference to the author's popular Knowledge Solutions: Tools, Methods, and Approaches to Drive Organizational Performance (2017) and the more recent Leading Solutions: Essays in Business Psychology (2021), which it both rests on and extends.

Rule of Law in Crisis Springer Nature

This book presents a rich compilation of real-world cases on digitalization, aiming to share first-hand insights from renowned organizations and to make digitalization tangible. With all economic and societal sectors being challenged by emerging technologies, the digital economy is highly volatile, uncertain, complex, and ambiguous. It confronts established organizations with substantial challenges and opportunities. Against this backdrop, this book reports on best practices and lessons learned from organizations that succeeded in tackling the challenges and seizing the opportunities of the digital economy. It illustrates how twenty organizations leveraged their capabilities to create disruptive innovation, to develop digital business models, and to digitally transform themselves. These cases stem from various industries (e.g. automotive, insurance, consulting, and public services) and countries, covering the

many facets that digitalization may have. As all case descriptions follow a unified template, they are easily accessible for readers and provide insightful examples for practitioners as well as interesting cases for researchers, teachers, and students. Almost every organization is trying to figure out how best to respond to the opportunities and threats posed by digitalization. This book provides valuable lessons from those organizations that have already begun their digital transformation journey. Michael D. Myers, Professor of Information Systems, University of Auckland *Digitalization Cases* provides firsthand insights into the efforts of renowned companies. The presented actions, results, and lessons learned are a great inspiration for managers, students, and academics. This book gives real pointers on the how and where to start. Anna Kopp, Head of IT Germany, Microsoft The cases compiled in the second volume of *Digitalization Cases* show how disruption can actively be managed. Further, long-term insights from extended success stories of the first edition highlight that courage to change pays off well. This book represents a motivation for organizations to drive their digital transformation journeys actively. Markus Richter, State Secretary at the Federal Ministry of the Interior, Building and Community and Federal Government Commissioner for Information Technology, Germany

The EU as a Global Digital Actor EGBG Services LLC
Featuring dozens of interviews from across every major sector of the economy, we are confident that this publication will be a vital handbook for anybody looking to do business in Abu Dhabi.

T-Byte Consulting & IT Services July 2021 IOS Press

Emerging Developments and Technologies in Digital Government Springer Nature

This book follows on the authors' successful development of the Three-Pillar Model (3-P Model) for organizing and leading in disruptive times. Its focus is on helping the reader to implement the model and providing a wide variety of application cases for these VUCA times (Volatility, Uncertainty, Complexity and Ambiguity), including global crises like the COVID-19 pandemic. The book covers a broad range of organizations: private and public sector, NGOs, local and global governmental institutions, global organizations such as UN, etc. In addition, it shows how the 3-P Model can be applied to challenges in organization design, management and leadership.

ICIDC 2023 Apress

This book addresses the current crisis that threatens the rule of law and has led to the need for its adjustment as normative concept, legal principle and pragmatic guideline for the behaviour of political players. Rule of law is a pillar of the constitutional orders and a key principle of national, international and EU law. Yet, rule of law is subject to pressure for change in the face of emergency, crisis and transition.

This book explores how constitutional crisis, emergency constitutionalism and constitutional polycrisis assert pressures for the transformation of rule of law and thus produce a state of flux. It examines the rule of law from the viewpoint of constitutional imaginaries, memory politics and identity politics. It critically assesses the responses given by the EU and its member states to the current

crisis. The work also provides an analysis of the most important challenges to rule of law stemming from the performance of constitutional courts, including the risks of judicial activism, politicization of the courts and judicialization of politics. The book will be an invaluable resource for researchers, academics and policy-makers working in the areas of Constitutional Law and Political Science.

Global Digital Cultures CRC Press

The dynamics of the world's pervasive digital technologies is transforming organisations and enabling enterprises to create sustainable competitive advantage. This presents huge economic opportunities for Africa. This book responds to the need for African enterprises and organisations—particularly those in the service sector—to fully exploit the inherent potential in digital platforms by putting in place processes to respond effectively to changing consumer demands. Digital service delivery is conceptualised as a key driver of effective management and service delivery across the value chain of businesses. The authors offer insights into the opportunities, drivers, structures, and models of digital service delivery specific to the African context, using case studies and country-based themes that highlight how the adoption of digital platforms and practices can transform service delivery for value-creation. The book examines the scope and applications of digital businesses, emphasising the emergence, value-creation, and strategic implications for Africa's private and public enterprises. Students, entrepreneurs, IT innovators, academics, and policymakers will gain a greater

understanding of how digitalisation is shaping consumer expectations, industry practices, and service delivery in Africa.

Technologies for Modern Digital Entrepreneurship The Business Year

This book examines central aspects of the new technologies and the legal questions raised by them from both an international and an inter-disciplinary perspective. The technology revolution and the global networking of IT systems pose enormous challenges for the law. Current areas of discussion relate to autonomous systems, big data and issues surrounding legal tech. Ensuring data protection and IT security as well as the creation of a legal framework for the new technology as a whole can only be achieved through international and inter-disciplinary co-operation. The team of authors is made up of experienced, internationally renowned experts as well as young researchers and professionals who give valuable insights from numerous different jurisdictions. This book is written for jurists and those responsible for technology in public authorities and companies as well as practising lawyers and researchers.

Digital Solutions Springer Nature

This book offers the latest research on organizational management, knowledge management, organizational functioning, organizational digitalization, and other issues of modern company development. The book proposes to look at the pool of these problems through the prism of building various models for implementing digital transformation of business and processes. This book is intended for both young and experienced scientists who want to get

acquainted with latest trends and data to use them in their research.

Developing Entrepreneurial Ecosystems for Digital Businesses and Beyond Springer Nature

Digital media histories are part of a global network, and South Asia is a key nexus in shaping the trajectory of digital media in the twenty-first century. Digital platforms like Facebook, WhatsApp, and others are deeply embedded in the daily lives of millions of people around the world, shaping how people engage with others as kin, as citizens, and as consumers. Moving away from Anglo-American and strictly national frameworks, the essays in this book explore the intersections of local, national, regional, and global forces that shape contemporary digital culture(s) in regions like South Asia: the rise of digital and mobile media technologies, the ongoing transformation of established media industries, and emergent forms of digital media practice and use that are reconfiguring sociocultural, political, and economic terrains across the Indian subcontinent. From massive state-driven digital identity projects and YouTube censorship to Tinder and dating culture, from Twitter and primetime television to Facebook and political rumors, *Global Digital Cultures* focuses on enduring concerns of representation, identity, and power while grappling with algorithmic curation and data-driven processes of production, circulation, and consumption.

I-Bytes Business Services Industry The Business Year

The 2023 2nd International Conference on Information Economy, Data Modeling and Cloud Computing (ICIDC 2023) was therefore held during June 2nd to 4th, 2023 in Nanchang, China (hybrid form). The Conference was attended by more than 100 participants and hosted four keynote speeches, more than 60 oral presentations as well as various poster presentations. The proceedings of ICIDC 2023 cover various topics, including

Big Data Finance, E-Commerce and Digital Business, Modeling Method, 3D Modeling, Internet of Things, Cloud Computing Platform, etc. All the papers have been checked through rigorous review and processes to meet the requirements of publication. Data modeling allows us to obtain the dynamic change trend of various indicator data, so how to use big data information to model and study the development trend of economic operation plan is of great significance. And that is exactly the purpose of this conference, focusing on the application of big data in the economic field as well as conducting more profound research in combination with cloud computing.

Digital Communication and Media Linguistics Springer Nature

This book examines how new technologies have transformed global markets, as well as global business strategy. It explores how digitalization, artificial intelligence, virtual reality, and other changes in technology have led both to new opportunities but also to increased uncertainty within both business and legislature. By pulling together academics from Russia, China, France, Hungary, Azerbaijan, Tajikistan and other countries, this book provides a truly international perspective on the impact of new technologies across areas including smart cities, corporate governance, EU legislation and logistical enterprise. It will be valuable reading for academics interested in digitization, digital business, digital entrepreneurship and the way that technological change has informed strategy.

Rockets and Rebels Taylor & Francis

As the digital government field continues to evolve rapidly, scholars and professionals must stay ahead of the curve by developing innovative solutions and gaining comprehensive insights. The global landscape of digital governance is undergoing transformative shifts,

necessitating a deep understanding of historical developments, current practices, and emerging trends. This urgent demand for knowledge forms the crux of the problem that the book, *Emerging Developments and Technologies in Digital Government*, addresses with expert knowledge and insights. The book serves as an indispensable resource for academic scholars grappling with the complexities of digital government. It critically examines historical transitions from technology-centric paradigms to people-centric models, shedding light on the global impact of open data initiatives and the vital role of human-computer interaction in reshaping government websites. For professionals and researchers across disciplines such as library sciences, administrative management, sociology, and information technology, this book becomes a beacon, offering insights and tangible solutions to navigate the multifaceted dimensions of digital government.

Innovating for The Circular Economy Cambridge University Press

In recent years, the postal sector has undergone radical changes, which have primarily been driven by operational and technological developments. Not only has the advent of Information and Communication Technology (ICT) added competition to the market, but it has also provided ample opportunity for the broadening and improvement of services and product range. This book deals with the challenges faced by the postal sector in the digital age, and with the vast opportunities that technological advancements offer postal operators with regard to developing new business solutions and services tailored to the needs of their customers. It provides an analysis of these opportunities and identifies the ways in which postal operators might benefit from the digital age and new market requirements. The book is divided into three main parts:

various digital dimensions; e-commerce challenges; and opportunities for partnership with governments. A final chapter discusses the developments described in the book and the views and ideas of the authors. The book will be of interest to all those responsible for developing and running postal services, as well as to anyone affected by the changes which have already taken place or the possibilities opening up for new and improved services.

Taxing Global Digital Commerce Springer Nature

This book constitutes the refereed proceedings of the 22nd IFIP WG 6.11 Conference on e-Business, e-Services and e-Society, I3E 2023, held in Curitiba, Brazil, during November 9–11, 2023. The 29 full papers and 2 short papers presented in this volume were carefully reviewed and selected from 68 submissions. The contributions were organized in topical sections as follows: Artificial Intelligence and Algorithm; Digital Transformation and New Technologies; and Sustainable Technologies and Smart Cities.

The Global Digital Economy: A Comparative Policy Analysis Kluwer Law International B.V.

An entrepreneurial ecosystem is characterized by the structure and interactions of organizations, firms, institutions, and individuals in a specific locale that is conducive to entrepreneurship. It can be defined as a set of interdependent actors and factors that are governed in such a way that they enable productive entrepreneurship in a particular territory. The World Bank has developed a new toolkit, *Developing Entrepreneurial Ecosystems for Digital Businesses and Beyond*, for entrepreneurial ecosystem assessments, including dedicated methodologies and data sets, to nurture digital entrepreneurship. This toolkit builds

on the World Bank's expertise in collecting and analyzing firm-level data, assessing the quality and efficiency of policies that support innovation and small and medium enterprises, and deriving insights from spatial economics to inform subnational analysis. The toolkit consists of six modules: cross-country context analysis, assessing local entrepreneurial ecosystems, digital entrepreneurship and tech start-ups, mapping public programs and intermediary organizations, digital market regulations, and policy options to support entrepreneurial ecosystems.
