The heartrending story of a  
midcentury American family with  
twelve children, six of them  
diagnosed with schizophrenia, that  
became science's great hope in the  
quest to understand the disease.  
"Reads like a medical detective  
journey and sheds light on a topic  
so many of us face: mental  
illness." —Oprah Winfrey Don and  
Mimi Galvin seemed to be living  
the American dream. After World  
War II, Don's work with the Air  
Force brought them to Colorado,  
where their twelve children  
perfectly spanned the baby boom:

the oldest born in 1945, the  
youngest in 1965. In those years,  
there was an established script for  
a family like the  
Galvins--aspiration, hard work,  
upward mobility, domestic  
harmony--and they worked hard to  
play their parts. But behind the  
scenes was a different story:  
psychological breakdown, sudden  
shocking violence, hidden abuse. By  
the mid-1970s, six of the ten  
Galvin boys, one after another,  
were diagnosed as schizophrenic.  
How could all this happen to one  
family? What took place inside the  
house on Hidden Valley Road was so  
extraordinary that the Galvins  
became one of the first families to  
be studied by the National  
Institute of Mental Health. Their

---

story offers a shadow history of the science of schizophrenia, from the era of institutionalization, lobotomy, and the schizophrenogenic mother to the search for genetic markers for the disease, always amid profound disagreements about the nature of the illness itself. And unbeknownst to the Galvins, samples of their DNA informed decades of genetic research that continues today, offering paths to treatment, prediction, and even eradication of the disease for future generations. With clarity and compassion, bestselling and award-winning author Robert Kolker uncovers one family's unforgettable legacy of suffering, love, and hope.

Running a family is somewhat like managing a small company, complete with management and valued 'trainees' except that no one quits or gets fired, there are no unions or employment equity, and parents get no pay or time off. Apart from the general aim of providing a pleasant, nurturing environment in which individual company members can

develop to their fullest potential, the goal of the family company is to coach and educate trainees to the point where they can leave to become managers in a company of their own. Many families run into problems when trainees, whether they be toddlers or teenagers, attempt to take over the company--in the form of a child in charge. Who's in Charge? provides an easy-to-read, troubleshooting approach for parents who wish to regain control and give themselves permission to parent.

Charlie Wheelan and his family do what others dream of: They take a year off to travel the world. This is their story. What would happen if you quit your life for a year? In a pre-COVID-19 world, the Wheelan family decided to find out; leaving behind work, school, and even the family dogs to travel the world on a

modest budget. Equal parts "how-to" and "how-not-to"—and with an eye toward a world emerging from a pandemic—*We Came, We Saw, We Left* is the insightful and often hilarious account of one family's gap-year experiment. Wheelan paints a picture of adventure and connectivity, juggling themes of local politics, global economics, and family dynamics while exploring answers to questions like: How do you sneak out of a Peruvian town that has been barricaded by the local army? And where can you get treatment for a flesh-eating bacteria your daughter picked up two continents ago? From Colombia to Cambodia, *We Came, We Saw, We Left* chronicles nine months across six

---

continents with three teenagers. What could go wrong?

orchard should have provided for their well-being, but instead embroiled them in legal debate. WWII Axis bombings of Kalamata prompted the young family to flee to the remote mountain village of Katherine's birth, but Nazi invasion-and seemingly endless occupation of their village and their house-trapped them there until the war's end. Told through the eyes of John, Katherine's youngest child, he shares a universal story of fear and frustration faced by all innocent civilians during war in occupied countries. American Kid is a moving recollection of Katherine's courage, their family's sparse village existence on Mt. Parnon, and years of fear-filled interactions with Nazi soldiers.

“This groundbreaking book offers a compelling understanding of inherited trauma and fresh, powerful tools for relieving its suffering. Mark Wolynn is a wise and trustworthy guide on the journey toward healing.” —Tara Brach, PhD, author of *Radical Acceptance* and *True Refuge* A groundbreaking approach to transforming traumatic legacies passed down in families over generations, by an acclaimed expert in the field *Depression. Anxiety. Chronic Pain. Phobias. Obsessive thoughts.* The evidence is compelling: the roots of these difficulties may not reside in our immediate life experience or in chemical imbalances in our brains—but in the lives of our parents, grandparents, and even great-grandparents. The latest scientific

research, now making headlines, supports what many have long intuited—that traumatic experience can be passed down through generations. *It Didn't Start with You* builds on the work of leading experts in post-traumatic stress, including Mount Sinai School of Medicine neuroscientist Rachel Yehuda and psychiatrist Bessel van der Kolk, author of *The Body Keeps the Score*. Even if the person who suffered the original trauma has died, or the story has been forgotten or silenced, memory and feelings can live on. These emotional legacies are often hidden, encoded in everything from gene expression to everyday language, and they play a far greater role in our emotional and physical health than has ever before been understood. As a pioneer in the field of inherited family trauma, Mark Wolynn

therapeutic level for over twenty years. It Didn't Start with You offers a pragmatic and prescriptive guide to his method, the Core Language Approach. Diagnostic self-inventories provide a way to uncover the fears and anxieties conveyed through everyday words, behaviors, and physical symptoms. Techniques for developing a genogram or extended family tree create a map of experiences going back through the generations. And visualization, active imagination, and direct dialogue create pathways to reconnection, integration, and reclaiming life and health. It Didn't Start With You is a transformative approach to resolving longstanding difficulties that in many cases, traditional therapy, drugs, or other interventions have not had the

"A provocative new novel from the best-selling author of Snow Falling on Cedars--a moving father-son story that is also a taut courtroom drama and a bold examination of privilege, power, and how to live a meaningful life. In a small rural town outside Seattle, Joanna, an Ethiopian girl adopted by a white fundamentalist Christian family, is found dead of hypothermia in her own backyard--setting in motion a gripping journey into the complexities of human emotion. How does it feel to be a child taken into a family that doesn't share her background, her religion, or the color of her skin? What does it mean to be a mother on trial for murder? And

why would a lawyer choose to defend such a woman? Royal is a criminal attorney in his eighties, and this is his final case. His son, our narrator, drives Royal every day from his office to the town where the tragedy took place, and observes the trial as it unfolds. The consequences will reach beyond what he could have anticipated. Bracing, astute, and intensely imagined, *The Final Case* is a tightrope walk of a novel, a deeply affecting work of fiction that dares to confront life's most irreconcilable moral quandaries. It will make an indelible impression on every reader"--

There are so many different types of families, and *THE FAMILY BOOK* celebrates them all in a funny, silly, and reassuring way. Todd Parr includes

adopted families, step-families, one-parent families, and families with two parents of the same sex, as well as the traditional nuclear family. His quirky humor and bright, childlike illustrations will make children feel good about their families. Parents and teachers can use this book to encourage children to talk about their families and the different kinds of families that exist.

*Who S Your Mama, Are You Catholic & Can You Make a Roux?* (Book 2) Knopf

What's in a name, an ancient name like Innes? Ten years ago, Andrew Innes set out to trace its history, asking the age-old questions, "Who am I? And where do I come from?" Sleuthing his branch of the family back as far as possible, he discovered surprising, sometimes tangled truths. From Scotland, his engaging story moves to England and Wales, then to his father's discovery of bauxite in Jamaica, and

---

ultimately to Canada, recounting a family's social progress over two centuries. Of special interest to Innes cousins near and far is the tantalizing tale of the Stow Succession. In the nineteenth century several branches of the Innes clan believed they had a rightful claim to the vast fortune of Jane Innes of Stow. The author's family was among them. Andrew Innes here gathers together more information on this subject than any other author he is aware of, and offers it to those who still nurture this belief. This Second Edition includes important new DNA evidence supporting the family's descent from Berowald of Halton via the Inneses of Benwall and Ardtannes. It provides a useful example of how DNA analysis in combination with well documented genealogies can bridge gaps in a family's line of descent.
