[Our Dogs, Ourselves](#) Andrews McMeel Publishing

This unique book brings together research and theorizing on human-animal relations, animal advocacy, and the factors underlying exploitative attitudes and behaviors towards animals. Why do we both love and exploit animals? Assembling some of the world's leading academics and with insights and experiences gleaned from those on the front lines of animal advocacy, this pioneering collection breaks new ground, synthesizing scientific perspectives and empirical findings. The authors show the complexities and paradoxes in human-animal relations and reveal the factors shaping compassionate versus exploitative attitudes and behaviors towards animals. Exploring topical issues such as meat consumption, intensive farming, speciesism, and effective animal advocacy, this book demonstrates how we both value and devalue animals, how we can address animal suffering, and how our thinking about animals is connected to our thinking about human intergroup relations and the dehumanization of human groups. This is essential reading for students, scholars, and professionals in the social and behavioral sciences interested in human-animal relations, and will also strongly appeal to members of animal rights organizations, animal rights advocates, policy makers, and charity workers.

How can someone who condemns hunting, animal farming, and animal experimentation also favor legal abortion, which is the deliberate destruction of a human fetus? The authors of *Beating Hearts* aim to reconcile this apparent conflict and examine the surprisingly similar strategic and tactical questions faced by activists in the pro-life and animal rights movements. *Beating Hearts* maintains that sentience, or the ability to have subjective experiences, grounds a being's entitlement to moral concern. The authors argue that nearly all human exploitation of animals is unjustified. Early abortions do not contradict the sentience principle because they precede fetal sentience, and *Beating Hearts* explains why the mere potential for sentience does not create moral entitlements. Late abortions do raise serious moral questions, but forcing a woman to carry a child to term is problematic as a form of gender-based exploitation. These ethical explorations lead to a wider discussion of the strategies deployed by the pro-life and animal rights movements. Should legal reforms precede or follow attitudinal changes? Do gory images win over or alienate supporters? Is violence ever principled? By probing the connections between debates about abortion and animal rights, *Beating Hearts* uses each highly contested set of questions to shed light on the other.

In this paperback edition is a foreword by activist and author John Robbins and a reader's group study guide. This ground-breaking work, voted one of the top ten books of 2010 by *VegNews Magazine*, offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term "carnism" to describe the belief system that has conditioned us to eat certain animals and not others. In *Why We Love Dogs, Eat Pigs, and Wear Cows* Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face, and the environmental impact of raising 10 billion animals for food each year. Controversial and challenging, this book will change the way you think about food forever.

What about plants? Don't animals eat other animals? There are no perfect vegans, so why bother? If you're vegan, how many times have you been asked these, and other similarly challenging, questions from non-vegans? Using humor and reason, Sherry F. Colb takes these questions at face value and also delves deeply into the motivations behind them, coming up with answers that are not only intelligent but insightful about human nature. Through examples, case studies, and clear-eyed logic, she provides arguments for everything from why veganism is compatible with the world's major religions to why vegetarianism is not enough. In the end, she shows how it is possible for vegans and non-vegans to engage in a mutually beneficial conversation without descending into counterproductive name-calling, and to work together to create a more hospitable world for human animals and non-human animals alike. "A rare fusion of passion and logic, idealism and pragmatism, style and substance, and--in its measured confrontation of the most challenging questions vegans face--a revolutionary guide for advocates seeking to engage the ethics of eating animals through authentic dialogue rather than bombastic rhetoric. Colb's literary touch is something to behold. She writes in a way that will appeal to non-vegans and vegans alike, building bridges across an all too turbulent divide. This is food writing at its best and

food writing as it should be: honest, inclusive, inspirational, and, more than you might imagine, timely."--James McWilliams, Professor of History, Texas State University, San Marcos, and author of *Just Food* and *The Politics of the Pasture* "With compassion, humor, and eloquence, Sherry Colb provides a clear and engaging account of what motivates vegans to eat and live the way we do. [Gross But True Things You Never Knew about Animals](#) Bloomsbury Publishing

Harvard-educated psychologist and bestselling author Melanie Joy exposes the psychology that underlies all forms of oppression and abuse and the belief system that gives rise to this psychology--which she calls powerarchy. Melanie Joy had long been curious as to why people who were opposed to one or more forms of oppression--such as racism, sexism, speciesism, and so forth--often stayed mired in many others. She also wondered why people who were working toward social justice sometimes engaged in interpersonal dynamics that were unjust. Or why people who valued freedom and democracy might nevertheless vote and act against these values. Where was the disconnect? In this thought-provoking analysis, Joy explains how we've all been deeply conditioned by the invisible system of powerarchy to believe in a hierarchy of moral worth--to view some individuals and groups as either more or less worthy of moral consideration--and to treat them accordingly. Powerarchy conditions us to engage in power dynamics that violate integrity and harm dignity, and it creates unjust power imbalances among social groups and between

individuals. Joy describes how powerarchies—both social and interpersonal—perpetuate themselves through cognitive distortions, such as denial and justification; narratives that reinforce the belief in a hierarchy of moral worth; and privileges that are granted to some and not others. She also provides tools for transformation. By illuminating powerarchy and the psychology it creates, Joy helps us to work more fully toward transformation for ourselves, others, and our world.

Every time we eat, we have the power to radically transform the world we live in. Our choices can help alleviate the most pressing issues we face today: the climate crisis, infectious and chronic diseases, human exploitation and, of course, non-human exploitation. Undeniably, these issues can be uncomfortable to learn about but the benefits of doing so cannot be overstated. It is quite literally a matter of life and death. Through exploring the major ways that our current system of animal farming affects the world around us, as well as the cultural and psychological factors that drive our behaviours, *This Is Vegan Propaganda* answers the pressing question, is there a better way? Whether you are a vegan already or curious to learn more, this book will show you the other side of the story that has been hidden for far too long. Based on years of research and conversations with slaughterhouse workers and farmers, to animal rights philosophers, environmentalists and everyday consumers, vegan educator and public speaker Ed Winters will give you the knowledge to understand the true scale and enormity of the issues at stake. *This Is Vegan Propaganda* is the empowering and groundbreaking book on veganism that everyone, vegan and sceptic alike, needs to read.

Why It's So Hard to Think Straight About Animals Pow! Kids Books

Does living with a pet really make people happier and healthier? What can we learn from biomedical research with mice? Who enjoys a better quality of life—the chicken destined for your dinner plate or the rooster in a Saturday night cockfight? Why is it wrong to eat the family dog? Drawing on more than two decades of research into the emerging field of anthrozoology, the science of human-animal relations, Hal Herzog offers an illuminating exploration of the fierce moral conundrums we face every day regarding the creatures with whom we share our world. Alternately poignant, challenging, and laugh-out-loud funny—blending anthropology, behavioral economics, evolutionary psychology, and philosophy—this enlightening and provocative book will forever change the way we look at our relationships with other creatures and, ultimately, how we see ourselves.

An Introduction to Carnism Houghton Mifflin
'An animal activist's journey to the "other side"'
Joanna Lumley This is the story of what happens when we cross enemy lines to look for solutions. Leah Garcés has dedicated her career to fighting for the rights of the animals that end up on our plates. As the former US Executive Director of Compassion in World Farming and the current President of the non-profit group Mercy for Animals, she has led the fight against the sprawling chicken industry that raises billions of birds in cruel conditions - all to satisfy our appetite for meat. Grilled is Leah's story of working alongside the food and farming industry for animal welfare and ethical food. Instead of fighting and protesting and shaming - approaches that simply haven't worked previously - Garcés has instead tried to find common ground with

producers. She has worked alongside owners of the megafarms, befriending them, having frank conversations with them, and ultimately encouraging change through dialogue and discussion. Leah is helping to directly improve the lives of millions of farm animals, and pushing alternatives such as plant-based substitutes and lab-grown meats to the top of the agenda, with some of the mega-farm conglomerates joining forces with her to explore these avenues. When she started her journey, Leah Garcés did not have much empathy to spare for the contract chicken farmer - until she actually met one and tried to understand the difficulties they faced. This is the story of giving in to discomfort for the sake of progress. It's a story of the power of human connection, and what happens when we practice empathy toward our enemies.

The Hot Dog Companion Conari Press

An Introduction to Carnism. "An important and groundbreaking contribution to the struggle for the welfare of animals." - Yuval Harari, New York Times best-selling author of *Sapiens: A Brief History of Humankind* "An absorbing examination of why humans feel affection and compassion for certain animals but are callous to the suffering of others." - Publishers Weekly
Why We Love Dogs, Eat Pigs, and Wear Cows offers an absorbing look at what social psychologist Melanie Joy calls carnism, the belief system that conditions us to eat certain animals when we would never dream of eating others. Carnism causes extensive animal suffering and global injustice, and it drives us to act against our own interests and the interests of others without fully realizing what we are doing. Becoming aware of what carnism is and how it functions is vital to personal empowerment and social transformation, as it enables us to make our food choices more freely—because without awareness, there is no free choice.

This book puts the issue of eating animals squarely on the table. We all claim to care about animals and to regard them as having at least some moral value. We all claim to agree that it's wrong to inflict "unnecessary" suffering and death on animals and—whatever disagreement we may have about when animal use is necessary—we all agree that the suffering and death of animals cannot be justified by human pleasure, amusement, or convenience. We condemn Michael Vick for dog fighting precisely because we feel strongly that any pleasure that Vick got from this activity could not possibly justify what he did. So how can we justify the fact that we kill many billions of land animals and fish every year for food? However "humanely" we treat and kill these animals, the amount of animal suffering we cause is staggering. Yet no one maintains that animal foods are necessary for optimal health. Indeed, mounting empirical evidence points to animal foods being detrimental for human health. But however you evaluate that evidence, there can be no serious doubt that we can have excellent health with a vegan diet. There is also broad consensus that animal agriculture is an ecological disaster. Animal agriculture is responsible for water pollution, air pollution, deforestation, soil erosion, inefficient use of plant protein and water, and all sorts of other environmental harms. The best justification we have for the unimaginable amount of suffering and death that we impose on animals is that they taste good. We enjoy the taste of animal foods. But how is this any different from Michael Vick claiming that his dog fighting operation was justifiable because he

enjoyed watching dogs fight? Vick liked sitting around a pit watching animals fight. We enjoy sitting around the summer barbecue pit roasting the corpses of animals who have had lives and deaths that are as bad, if not worse than, Vick's dogs. What is the difference between Michael Vick and those of us who eat animal foods? This book shows that there is no difference, or at least not any difference that matters morally. Francione and Charlton argue that if you think animals matter morally—if you reject the idea that animals are just things—your own beliefs require that you stop eating animal products. There is nothing "extreme" about a vegan diet; what is extreme is the inconsistency between what we say we believe and how we act where animals are concerned. Many of us are uneasy thinking about the animals who end up on our plates. We may have thought about stopping eating animal products but there are many excuses that have kept us from doing so. The authors explore the 30+ excuses they have heard as long-time vegans and address each one, showing why these excuses don't work. Packed with clear, commonsense thinking on animal ethics, without jargon or complicated theory, this book will change the way you think about what you eat.

I Love Them All Berrett-Koehler Publishers
Until the last decade of the twentieth century, the abusive or cruel treatment of animals had received virtually no attention among academicians. Since then, however, empirical studies of animal abuse, and its relation to other forms of violence toward humans, have increased not only in number but in quality and stature. Sociologists, criminologists, social workers, psychologists, legal scholars, feminists, and others have recognized the myriad reasons that animal abuse is worthy of serious scholarly focus. In his overview of contemporary sociological understanding of animal abuse, Clifton Flynn asks why studying animal abuse is important, examines the connections between animal abuse and human violence, surveys the theses surrounding the supposed link between abuse of animals and humans, and lays out some theoretical perspectives on the issue. The book offers recommendations for policy and professionals and directions for future research. Ultimately, *Understanding Animal Abuse* challenges the reader to consider animal abuse as not limited just to harmful acts committed by individuals. It asks us to extend our notion of abuse to the systemic cruelty of factory farms and vivisection laboratories.
