Accounting Information Systems, 1st Edition by Arline Savage, Danielle Brannock, and Alicja Foksinska presents a modern, professional perspective that develops the necessary skills students need to be the accountants of the future. Through high-quality assessment and integrated homework, students learn course concepts more efficiently and understand how course concepts are applied in the workplace through real-world application. Accounting Information Systems also focuses on helping students learn how to make informed business decisions through case-based learning and data analysis applications. Students work through Julia's Cookies, a flexible, running case that helps them understand how various systems come together to support a business, and how those systems evolve. Students also develop a critical thinking mindset by working through integrated analysis questions that take a tool-agnostic approach, as well as Tableau cases so students can practice making real business decisions using leading technology. To further help prepare students to be the accountants of the future, the authors incorporate their own industry experience and help showcase how AIS concepts are used through resources including Sample LinkedIn Job Posts and the Featured Professionals video series. These tools spotlight real accounting professionals and job opportunities, while connecting to chapter material, allowing student to see how what they're learning applies to business, as well as visualize the different paths AIS can take them.

This exciting new textbook for introductory psychology helps to open students' minds to the idea that psychology is all around us. Authors RON COMER and LIZ GOULD encourage students to examine what they know about human behaviour and how they know it; and open them up to an appreciation of psychology outside of the classroom. Psychology Around Us helps students see the big picture by stressing the interconnected nature of psychological science. Almost every chapter within this first edition helps open students' minds to comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life. This text highlights human development, brain function, abnormal psychology, and the individual differences in each area as cut-across themes to demonstrate these connections. Also included are two-page art spreads to demonstrate exactly What Happens In The Brain When we engage in everyday activities such as eat pizza, study psychology, or listen to music. The art featured in these spreads have been created especially for Psychology Around Us by an award-winning artist with input from faculty on how it will contribute to teaching and learning. Features: Cut Across Connections - Almost every chapter helps students comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life. What Happens in the Brain When...
