Weygandt's Managerial Accounting, Third Canadian Edition retains the same features that made it popular in the previous editions: it gives students all the necessary techniques and concepts of managerial accounting in a focused, concise framework with an excellent pedagogy that's been praised by instructors. It does this by focusing on the tools students need to succeed, whether as accountants or in other career paths. Incorporating the unique Decision Toolkit learning system, and developed around a framework of decision-making, Weygandt Managerial is the perfect fit for any one-semester undergraduate managerial accounting course. However, the authors understand that many students in this course are not accounting majors and will need to understand how managerial accounting is used as a management tool. Therefore, Weygandt Managerial focuses on building decision-making skills, understanding how to use accounting information to make quality business decisions, and developing tools that can be used by future managers.

Statistics: Unlocking the Power of Data, 3rd Edition is designed for an introductory statistics course focusing on data analysis with real-world applications. Students use simulation methods to effectively collect, analyze, and interpret data to draw conclusions. Randomization and bootstrap interval methods introduce the fundamentals of statistical inference, bringing concepts to life through authentically relevant examples. More traditional methods like t-tests, chi-square tests, etc. are introduced after students have developed a strong intuitive understanding of inference through randomization methods. While any popular statistical software package may be used, the authors have created StatKey to perform simulations using data sets and examples from the text. A variety of videos, activities, and a modular chapter on probability are adaptable to many classroom formats and approaches.
