In Scorecasting,
University of Chicago
behavioral economist
Tobias Moskowitz teams
up with veteran Sports
Illustrated writer L. Jon
Wertheim to overturn
some of the most
cherished truisms of
sports, and reveal the
hidden forces that shape
how basketball, baseball,
football, and hockey
games are played, won
and lost. Drawing from
Moskowitz's original
research, as well as
studies from fellow
economists such as
bestselling author
Richard Thaler, the
authors look at: the
influence home-field
advantage has on the

outcomes of games in all
sports and why it exists;
the surprising truth about
the universally accepted
axiom that defense wins
championships; the subtle
biases that umpires
exhibit in calling balls and
strikes in key situations;
the unintended
consequences of
referees' tendencies in
every sport to "swallow
the whistle," and more.
Among the insights that
Scorecasting reveals:

- Why Tiger Woods is prone to the same mistake in high-pressure putting situations that you and I are
- Why professional teams routinely overvalue draft picks
- The myth of momentum or the "hot hand" in sports, and why so many fans, coaches, and broadcasters fervently subscribe to it
- Why NFL coaches

rarely go for a first down on fourth-down situations--even when their reluctance to do so reduces their chances of winning. In an engaging narrative that takes us from the putting greens of Augusta to the grid iron of a small parochial high school in Arkansas, Scorecasting will forever change how you view the game, whatever your favorite sport might be.
