While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

Weygandt helps corporate managers see the relevance of accounting in their everyday lives. Challenging accounting concepts are introduced with examples that are familiar to

them, which helps build motivation to learn the material. Accounting issues are also placed within the context of marketing, management, IT, and finance. The new Do It! feature reinforces the basics by providing quick-hitting examples of brief exercises. The chapters also incorporate the All About You (AAY) feature as well as the Accounting Across the Organization (AAO) boxes that highlight the impact of accounting concepts. With these features, corporate managers will learn the concepts and understand how to effectively apply them.

Proven Pedagogical Framework helps students learn accounting concepts and apply them to decision making in the business world: Includes Study

Objectives are first stated at the beginning of the chapter and then re-appear in the margin at each point that the objective is discussed. The objectives are then summarized at the end of the chapter. Chapter-Opening Previews are charts that visually represent the chapter's outline. Each of these chapter "road maps" establishes the chapter's key concepts and their relationship to one another. Business Insight boxes relate the chapter's concepts to actual accounting situations in real business. Four different icons identify four different points of view:

Management Perspective, Ethics Perspective, Investor Perspective, International

Perspective. Accounting equation analyses, with cash-flow effects, appear in the margin next to key journal entries to help students understand the impact of an

accounting transaction on the financial statements and cash flow. Before You Go On Review It/Do It questions serve as learning checks at the end of major text sections. Brief Do It exercises ask students to put their knowledge to work in some form of financial statements preparation. Action Plans outline the reasoning necessary to complete them. Solutions show how problems should be solved. Throughout each chapter, Decision Toolkits summarize the key features of the decision tools discussed in the prior section. A Using the Decision Toolkit exercise, with a solution, challenges students to use financial information from a financial statement to make a financial decision. This feature appears after the last Before You Go On section in each chapter. Annotations in Chapter 1 explain each pedagogical element of the text the first time it appears. End-of-chapter material, including Demonstration Problems, Self-Study Questions, Questions, Brief Exercises, Exercises, Problems, and Broadening Your Perspective sections, helps students develop a greater set of essential skills.
