The Jeep was the primary light four-wheel-drive vehicle of the US Army and allies during the Second World War and the post-war period. It was originally designed to meet a 1940 US Army specification, and over 600,000 examples were built in both Ford and Willys forms. The Jeep saw service all over the world, and a healthy number of restored authentic military examples can still be seen today in the hands of

enthusiasts. This book provides a brief history of this iconic vehicle, and a fascinating behind-the-scenes insight into what is involved in restoring, operating and maintaining a Jeep today, 70 years after the prototype first appeared.

When Chase Morseley Jr. joins Ford Motor Co. in 1948, he has no idea the part he'll play in automotive history. Morseley's arrival comes as Henry Ford II and other titans in the industry are about to kill the vaunted V-8 engine. He sees it as his sole mission to talk them out of it. In *The Man Who Saved the V-8*, he shares the never-before-told story of how his crusade saved the engine that would go on to power iconic cars like the Ford Thunderbird and Mustang. "To this day, I have no idea how a young, newly hired manager like myself...had the nerve to

challenge the most powerful men inside Ford Motor Company and tell them they were wrong," Morseley says. "But that is exactly what I did." The twenty-nine-year-old executive embarks on massive market research. He works with manufacturing experts to find ways to produce the V-8 engine more efficiently. After finding success, he goes on to continue playing a central role in some of the most pivotal decisions that would ensure Ford remains one of the powerhouses in the automotive industry. *The Man Who Saved the V-8* tells the story of his successes and lessons learned.

When it entered army service in 1985, AM General's high-mobility multipurpose wheeled vehicle-better known as the Humvee-quickly assumed the status the World War II jeep enjoyed among an earlier generation of soldiers. Humvee at War showcases this iconic vehicle in the many roles and configurations it has taken on over the years-ambulance, troop transport, and armament carrier among them. Jeeps 1941 – 45 Bloomsbury Publishing
The jeep was the most famous military vehicle of World War II, and its name has become

synonymous with a whole class of military and civilian all-terrain vehicles. The jeep originated in a prewar US Army requirement for a simple, inexpensive, and robust vehicle for basic utility chores. Its simple design proved to be adaptable to a host of military tasks including use as a scout vehicle, battlefield ambulance, communications vehicle, and staff car. This book, covering “ the savior of World War II ” , focuses on the design and development of this versatile vehicle used on nearly

every front of World War II.

Helen and Frank Schreider were
true adventurers. Their dream
was to drive the length of the
Americas, from the town of
Circle, Alaska (just outside the
Arctic Circle), to the world ' s
southernmost town, Ushuaia, in
Tierra del Fuego. Dinah, their
German shepherd, went with
them. They are the first people
in history to have made this trip.

They came back with a whale of a southern Mexico, were forced to

mountain-climbing abilities of
their amphibious jeep, La
Tortuga, were put to a rugged
test during the eighteen thrill-
packed months the Schreiders
were under way. They didn ' t
just drive from Circle to
Ushuaia—much of the way there
are no roads. Many of the rivers
that slice through the jungle are
unbridged; the jungle itself often
rears up in an impenetrable wall,
and the natives just shake their
heads and say, “ Turn back. ”
Undaunted, the Schreiders
hacked their way with machetes
through the steaming jungles of

were forced to
put out through the monstrous
surf into the far from pacific
Pacific, island-hopped across the
reef-ribbed Caribbean, rode out
a hurricane at sea, and crawled to
almost sixteen thousand feet in
the Peruvian Andes. They are the
first to have reached South
America in a wheeled vehicle
under its own power. La Tortuga
served them well and came away
with her share of honors: she ' s
the first “ ship ” ever to have

Over the last 30 years, the 'technical' or armed pick-up truck has become arguably the most ubiquitous military land vehicle of modern warfare. Harking back to the armed Jeeps and Chevrolet trucks of the SAS and Long Range Desert Group in North Africa in World War II, the world's first insurgent technicals were those of the Sahrawi People's Liberation Army in Algeria in the late 1970s,

followed by the Chadian use of technical in the so-called Toyota War against Libya. Since then, technicals have seen use in Somalia, Iraq, Afghanistan and Libya, as well as being used by Western and Russian Special Forces. Fully illustrated with commissioned artwork and providing rigorous analysis, this is the first history of how this deceptively simple fighting vehicle has been used and developed in conflicts worldwide.
