Introduction to UWP app design

The Design Principles of Metro Apps | Dr Dobb's  
Metro apps are pretty nice, but they absolutely suck on a Windows desktop with a mouse and keyboard. That's to be expected though, since Metro (also known as Modern UI or Microsoft design language) was created mainly with touch input in mind for Surface Pros and Windows Phones.. But many of the Metro-style apps and games on the Windows Store play rather nicely with a mouse/keyboard setup.
