- In *The Merchants of Siberia*, Erika Monahan reconsiders commerce in early modern Russia by reconstructing the trading world of Siberia and the careers of merchants who traded there. She follows the histories of three merchant families from various social ranks who conducted trade in Siberia for well over a century. These include the Filat'evs, who were among Russia's most illustrious merchant elite; the Shababins, Muslim immigrants who mastered local and long-distance trade

while balancing private endeavors with service to the Russian state; and the Noritsyns, traders of more modest status who worked sometimes for themselves, sometimes for bigger merchants, and participated in the emerging Russia-China trade. Monahan demonstrates that trade was a key component of how the Muscovite state sought to assert its authority in the Siberian periphery. The state's recognition of the benefits of commerce meant that Russian state- and empire-building in Siberia were characterized by accommodation; in this diverse borderland, instrumentality trumped ideology and the Orthodox state welcomed Central Asian merchants of Islamic faith. This reconsideration of Siberian trade

invites us to rethink Russia's place in the early modern world. The burgeoning market at Lake Yamysh, an inner-Eurasian trading post along the Irtysh River, illuminates a vibrant seventeenth-century Eurasian caravan trade even as Europe-Asia maritime trade increased. By contextualizing merchants and places of Siberian trade in the increasingly connected economies of the early modern period, Monahan argues that, commercially speaking, Russia was not the "outlier" that most twentieth-century characterizations portrayed.

The most recognizable fictional spy and one of the longest running film franchises, James Bond has inspired a host of other pop culture

contributions, including Doctor Who (the Jon Pertwee era), the animated television comedy series Archer, Matt Kindt's comic book series Mind MGMT, Japan's Nakano Spy School Films, the 1960s Italian Eurospy genre, and the recent 007 Legends video game. This collection of new essays analyzes Bond's phenomenal literary and filmic influence over the past 50-plus years. The 14 essays are categorized into five parts: film, television, literature, lifestyle (emphasis on fashion and home décor), and the Bond persona reinterpreted.

This cultural history examines the global rise of American-style supermarkets during the Cold War era and how they shaped the way we eat today. Supermarkets were invented in the United States, and from the 1940s on they made their way around the world, often explicitly to carry American-style economic culture with them. This innovative

history tells us how supermarkets were used as anticommunist weapons during the Cold War, and how their proliferation has shaped our current food system. The widespread appeal of supermarkets contributed to a “farms race” between the United States and the Soviet Union, as the superpowers vied to show that their contrasting approaches to food production and distribution were best suited to an abundant future. In the aftermath of the Cold War, US food power was transformed into a global system of market power, laying the groundwork for the emergence of our contemporary world, in which transnational supermarkets operate as powerful institutions in a global food economy.

This is the first book to define and explore the geopolitical economy of sport – the intersection of power, politics, money, and state interests that both exploit and shape elite sport around the world. Russia's invasion of Ukraine, the global response, and the consequent ramifications for sport have put the geopolitical economy of sport front and centre in both public debate and academic thinking. Similarly, the Winter Olympics in Beijing and the FIFA World Cup in Qatar illustrate the political, economic, and geographic imperatives that shape modern sport. This book brings

together studies from around the world to describe this new geopolitical economy of sport, from the way in which countries use natural resource revenues, accusations of sport washing, and the deployment of sport for soft power purposes, to the way in which sport has become a focus for industrial development. This book looks at the geopolitical economy of sport across the globe, from the Gulf States' interests in European soccer to Israel seeking to build a national competitive advantage by positioning itself as a global sports tech start-up hub, and the United States continuing to extend its economic and cultural influence through geopolitical sport activities in Africa, Latin America, and the Indian subcontinent. This book captures a pivotal moment in the history of sport and sport business. This is essential reading for any student, researcher, practitioner, or policymaker with an interest in sport business, the politics of sport, geopolitics, soft power, diplomacy, international relations, or international political economy.

In this widely praised book, Vladislav Zubok argues that Western interpretations

of the Cold War have erred by exaggerating either the Kremlin's pragmatism or its aggressiveness. Explaining the interests, aspirations, illusions, fears, and misperceptions of the Kremlin leaders and Soviet elites, Zubok offers a Soviet perspective on the greatest standoff of the twentieth century. Using recently declassified Politburo records, ciphered telegrams, diaries, and taped conversations, among other sources, Zubok offers the first work in English to cover the entire Cold War from the Soviet side. A Failed Empire provides a history quite different from those written by the Western victors. In a new preface for this edition, the author adds to our understanding of today's events in Russia, including who the new players are and how their policies will affect the state of the world in the twenty-first century.

Readings in Health Care Ethics provides a wide-ranging selection of important and engaging contributions to the field of health care ethics. Designed as a course text for undergraduate use,

the anthology includes fifty-six selections grouped into ten sections. Included are a wide range of the most important essays both on long standing issues in biomedical ethics (such as consent, euthanasia, and research involving human subjects); and on issues that have particularly come to the fore in recent years, such as the allocation of scarce medical resources, and genetic alteration. An extensive introduction provides a accessible general overview of ethical theory for those without previous familiarity with philosophical concepts.

For Angel Mitchell, Christmas has never been like it is for others. There are no family parties or turkey dinners. No exchanging of gifts or singing carols around an open fire. For her, Christmas is all about surviving the holidays without drowning in grief. Gabriel 'Gabe' Moss loves everything about Christmas, including sharing his joy, and happiness with others. Everyone finds his love of the season infectious; everyone except Angel, who is determined to convince him that Christmas isn't the be all and end all, and she is perfectly fine the way she is. Despite Angel's protests, Gabe makes it his mission to make her believe

in Christmas again, but when an unexpected threat to her safety appears out of nowhere, Gabe is forced to go against Angel's wishes to keep her safe. Can Gabe break through Angel's tough exterior, and melt the ice that has encased her heart for so many years?

The closest we've ever come to the end of the world "DEFCON-2 is the best single volume on the Cuban Missile Crisis published and is an important contribution to the history of the Cold War. Beyond the military and political facts of the crisis, Polmar and Gresham sketch the personalities that created and coped with the crisis. They also show us how close we came to the edge without becoming sensationalistic."—Larry Bond, bestselling author of *Dangerous Ground* Spy-satellite and

aerial-reconnaissance photos reveal that one of the United States's bitterest enemies may be acquiring weapons of mass destruction and the means to use them against the American homeland. Administration officials refuse to accept intelligence professionals' interpretation of these images and order an end to spy missions over the offending nation. More than a month later, after vicious infighting, the president orders the spy missions to resume. The new photos reveal an array of ballistic missiles, capable of carrying nuclear warheads and striking deep within U.S. territory. It appears that the missiles will be fully operational within one week. This is not a plot setup for a suspense novel; it is the true story of the most terrifying moment in the 45-year Cold War between the United States and the Soviet Union: the Cuban Missile Crisis. DEFCON-2 tells this tale as it has never been told before—from both sides, with the help of hundreds of recently declassified U.S. and Soviet documents, as well as interviews with numerous former spies, military figures, and government officials who speak out here for the first time.

Long ago there was a war between the nine families that controlled the world. These families all had superpowers and they were fighting for all of the people who didn't. One side wanted to treat these people better and not like slaves while the other side did not like that. The war was looking grim for one side until a powerful person was able to give all the normal people superpowers. Because of this, it helped them win the war gaining their independence. After the war a new power rose called the World Government. The World Government made a law stating that if you were part of the Nine families, you were to be immediately executed. This pushed the families into hiding to prevent from being wiped out. People with superpowers started to

rule the world now which proved to be problematic. A lot of crime started to happen because of this so the World Government created S.P.A.C.E., a set of superpowered police who would prevent these happenings. The main headquarters Sun, was in charge of all the smaller police stations named after other planets. This not only protected the people from bad superpowered people, but also from any one of the nine families from coming back into power. Hundreds of years later, some of the families are trying to come back into power. Part of their plan to come back was to kidnap a nine year old boy named Niko after killing his entire family. However, after a year, Niko was able to escape. George Cronus, leader of Sun took him in as his adoptive father, protecting him from everyone. Niko grew up fine except he was hardly showed any emotion. Ten years later and Niko has graduated high school and has a plan to get revenge. He is going to need to find people that will join his cause. Will Niko find people that will help him get his revenge or will he end up fighting the nine families alone? Join him as he figures out why he was kidnapped and the plans the nine families have for getting back into power.
