In a new interpretation of how and why the United States went to war in Vietnam, the author challenges conventional wisdom about the origins of the war, arguing that U.S. policy decisions were shaped by an imbalance of military power favoring the U.S. over the Soviet Union and China, a factor that is also relevant to the current U.S. intervention in Iraq.

This edited volume highlights the work of ten forgotten and neglected social theorists in the hope of reinvigorating interest in their work and their potential contributions to the analysis of contemporary social issues. Each chapter includes a brief biographical sketch, an overview of the selected theorist's work and significance, and the relevance of their work to one or more contemporary social issues. While other similar texts tend to focus primarily on intellectual biography, our emphasis here is on the scholar's theories and their application to contemporary social issues. We provide a contextualization of each scholar's work, using present-day social

issues or problems. Many of these individuals played a significant role in the development of sociology. Our hope is to provide a resource that will help re-integrate these marginalized social theorists, rescuing them from obscurity and elevating their status.

In this widely praised book, Vladislav Zubok argues that Western interpretations of the Cold War have erred by exaggerating either the Kremlin's pragmatism or its aggressiveness. Explaining the interests, aspirations, illusions, fears, and misperceptions of the Kremlin leaders and Soviet elites, Zubok offers a Soviet perspective on the greatest standoff of the twentieth century. Using recently declassified Politburo records, ciphered telegrams, diaries, and taped conversations, among other sources, Zubok offers the first work in English to cover the entire Cold War from the Soviet side. *A Failed Empire* provides a history quite different from those written by the Western victors. In a new preface for this edition, the author adds to our understanding of today's events in Russia, including who the new players are and how their policies will affect the state of the world in the twenty-first century.

"The most balanced and comprehensive account of the Korean War." —The Economist  
Sixty years after North Korean troops crossed the 38th parallel into South Korea, the Korean War has not yet ended. Sheila Miyoshi Jager presents the first comprehensive history of this misunderstood war, one that risks involving the world's superpowers—again. Her sweeping narrative ranges from the middle of the Second World War—when Korean independence was fiercely debated between Roosevelt, Stalin, and Churchill—to the present day, as North Korea, with China's aid, stockpiles nuclear weapons while starving its people. At the center of this conflict is an ongoing struggle between North and South Korea for the mantle of Korean legitimacy, a "brother's war," which continues to fuel tensions on the Korean peninsula and the region. Drawing from newly available diplomatic archives in China, South Korea, and the former Soviet Union, Jager analyzes top-level military strategy. She brings to life the bitter struggles of the postwar period and shows how the conflict between the two Koreas has continued to evolve to the present, with important and tragic consequences for the region and the world. Her portraits of the many fascinating characters that populate this history—Truman, MacArthur, Kim Il Sung, Mao, Stalin, and Park Chung Hee—reveal the complexities of the Korean War and the repercussions this conflict

has had on lives of many individuals, statesmen, soldiers, and ordinary people, including the millions of hungry North Koreans for whom daily existence continues to be a nightmarish struggle. The most accessible, up-to-date, and balanced account yet written, illustrated with dozens of astonishing photographs and maps, *Brothers at War* will become the definitive chronicle of the struggle's origins and aftermath and its global impact for years to come.

In *The Merchants of Siberia*, Erika Monahan reconsiders commerce in early modern Russia by reconstructing the trading world of Siberia and the careers of merchants who traded there. She follows the histories of three merchant families from various social ranks who conducted trade in Siberia for well over a century.

These include the Filat'evs, who were among Russia's most illustrious merchant elite; the Shababins, Muslim immigrants who mastered local and long-distance trade while balancing private endeavors with service to the Russian state; and the Noritsyns, traders of more modest status who worked sometimes for themselves, sometimes for bigger merchants, and participated in the emerging Russia-China trade. Monahan demonstrates that trade was a key component of how the Muscovite state sought to assert its authority in the Siberian periphery. The state's recognition of the benefits of commerce meant that Russian state- and empire-building in Siberia were characterized by accommodation; in this diverse borderland, instrumentality trumped ideology and the Orthodox state welcomed Central Asian merchants of Islamic faith. This reconsideration of Siberian trade invites us to rethink Russia's place in the early modern world. The burgeoning market at Lake Yamysh, an inner-Eurasian trading post along the Irtysh River, illuminates a vibrant seventeenth-century Eurasian caravan trade even as Europe-Asia maritime trade increased. By contextualizing merchants and places of Siberian trade in the increasingly connected economies of the early modern period, Monahan argues that, commercially speaking, Russia was not the "outlier" that most twentieth-century characterizations portrayed.

The closest we've ever come to the end of the world "DEFCON-2 is the best single volume on the Cuban Missile Crisis published and is an important contribution to the history of the Cold War. Beyond the military and political facts of the crisis, Polmar and Gresham sketch the personalities that created and coped with the crisis. They also show us how close we came to the edge without becoming sensationalistic."—Larry Bond, bestselling author of *Dangerous Ground* Spy-satellite and aerial-reconnaissance photos reveal that one of the United States's bitterest enemies may be acquiring weapons of mass destruction and the means to use them against the American homeland. Administration officials refuse to accept intelligence professionals' interpretation of these images and order an end to spy

missions over the offending nation.

More than a month later, after vicious infighting, the president orders the spy missions to resume. The new photos reveal an array of ballistic missiles, capable of carrying nuclear warheads and striking deep within U.S. territory. It appears that the missiles will be fully operational within one week. This is not a plot setup for a suspense novel; it is the true story of the most terrifying moment in the 45-year Cold War between the United States and the Soviet Union: the Cuban Missile Crisis. DEFCON-2 tells this tale as it has never been told before—from both sides, with the help of hundreds of recently declassified U.S. and Soviet documents, as well as interviews with numerous former spies, military figures, and government officials who speak out here for the first time.

This book deals with the sustainability of agriculture on the Black Earth by drawing on data from long-term field experiments. It emphasises the opportunities for greater food and water security at local and regional levels. The Black Earth, Chernozem in Russian, is the best arable soil in the world and the breadbasket of Europe and North America. It was the focus of scientific study at the very beginnings of soil science in the late 19th century—as a world in itself, created by the roots of the steppe grasses building a water-stable

granular structure that holds plentiful water, allows rapid infiltration of rain and snow melt, and free drainage of any surplus. Under the onslaught of industrial farming, Chernozem have undergone profound but largely unnoticed changes with far-reaching consequences—to the point that agriculture on Chernozem is no longer sustainable. The effects of agricultural practices on global warming, the diversion of rainfall away from replenishment of water resources to destructive runoff, and the pollution of streams and groundwater are all pressing issues. Sustainability absolutely requires that these consequences be arrested.
