In this widely praised book, Vladislav Zubok argues that Western interpretations of the Cold War have erred by exaggerating either the Kremlin's pragmatism or its aggressiveness. Explaining the interests, aspirations, illusions, fears, and misperceptions of the Kremlin leaders and Soviet elites, Zubok offers a Soviet perspective on the greatest standoff of the twentieth century. Using recently declassified Politburo records, ciphered telegrams, diaries, and taped conversations, among other sources, Zubok offers the first work in English to cover the entire Cold War from the Soviet side. A Failed Empire provides a history quite different from those written by the Western victors. In a new preface for this edition, the author adds to our understanding of today's events in Russia, including who the new players are and how their policies will affect the state of the world in the twenty-first century.

Sports Plays is a volume about sports in the theatre and what it means to stage sports. The chapters in this volume examine sports plays through a range of critical and theoretical approaches that highlight central concerns and questions both for sports and for theatre. The plays cut across boundaries and genres, from Broadway-style musicals to dramas to experimental and developmental work. The chapters examine and trouble the conventions of staging sports as they open possibilities for considering larger social and cultural issues and debates. This broad range of perspectives make the volume a compelling resource for students and scholars of sport, theatre, and performance studies whose interests span feminism, sexuality, politics, and race.

This cultural history examines the global rise of American-style supermarkets during the Cold War era and how they shaped the way we eat today. Supermarkets were invented in the United States, and from the 1940s on they made their way around the world, often explicitly to carry American-style economic culture with them. This innovative history tells us how supermarkets were used as anticommunist weapons during the Cold War, and how their proliferation has shaped our current food system. The widespread appeal of supermarkets contributed to a “ farms race ” between the United States and the Soviet Union, as the superpowers vied to show that their contrasting approaches to food production and distribution were best suited to an abundant future. In the aftermath of the Cold War, US food power was transformed into a global system of market power, laying the groundwork for the emergence of our contemporary world, in which transnational supermarkets operate as powerful institutions in a global food economy.

In a new interpretation of how and why the United States went to war in Vietnam, the author challenges conventional wisdom about the origins of the war, arguing that U.S. policy decisions were shaped by an imbalance of military power favoring the U.S. over the Soviet Union and China, a factor that is also relevant to the current U.S. intervention in Iraq.

Army Historical Series: Starlingrad to Berllin Penguin

In The Merchants of Siberia, Erika Monahan reconsiders commerce in early modern Russia by reconstructing the trading world of Siberia and the careers of merchants who traded there. She follows the histories of three merchant families from various social ranks who conducted trade in Siberia for well over a century. These include the Filat'evs, who were among Russia ’ s most illustrious merchant elite; the Shababins, Muslim immigrants who mastered local and long-distance trade while balancing private endeavors with service to the Russian state; and the Noritsyns, traders of more modest status who worked sometimes for themselves, sometimes for bigger merchants, and participated in the emerging Russia-China trade. Monahan demonstrates that trade was a key component of how the Muscovite state sought to assert its authority in the Siberian periphery. The state ’ s recognition of the benefits of commerce meant that Russian state- and empire-building in Siberia were characterized by accommodation; in this diverse borderland, instrumentality trumped ideology and the Orthodox state welcomed Central Asian merchants of Islamic faith. This reconsideration of Siberian trade invites us to rethink Russia ’ s place in the early modern world. The burgeoning market at Lake Yamysh, an inner-Eurasian trading post along the Irtysh River, illuminates a vibrant seventeenth-century Eurasian caravan trade even as Europe-Asia maritime trade increased. By contextualizing merchants and places of Siberian trade in the increasingly connected economies of the early modern period, Monahan argues that, commercially speaking, Russia was not the "outlier" that most twentieth-century characterizations portrayed.

The closest we've ever come to the end of the world "DEFCON-2 is the best single volume on the Cuban Missile Crisis published and is an important contribution to the history of the Cold War. Beyond the military and political facts of the crisis, Polmar and Gresham sketch the personalities that created and coped with the crisis. They also show us how close we came to the edge without becoming sensationalistic."—Larry Bond, bestselling author of Dangerous Ground Spy-satellite and aerial-reconnaissance photos reveal that one of the United States's bitterest enemies may be acquiring weapons of mass destruction and the means to use them against the American homeland. Administration officials refuse to accept intelligence professionals' interpretation of these images and order an end to spy missions over the offending nation. More than a month later, after vicious infighting, the president orders the spy missions to resume. The new photos reveal an array of ballistic missiles, capable of carrying nuclear warheads and striking deep within U.S. territory. It appears that the missiles will be fully operational within one week. This is not a plot setup for a suspense novel; it is the true story of the most terrifying moment in the 45-year Cold War between the United States and the Soviet Union: the Cuban Missile Crisis. DEFCON-2 tells this tale as it has never been told before—from both sides, with the help of hundreds of recently declassified U.S. and Soviet documents, as well as interviews with numerous former spies, military figures, and government officials who speak out here for the first time.

IBSS: Political Science: 2002 Vol.51 Univ of North Carolina Press

Nancy Bernkopf Tucker confronts the coldest period of the cold war—the moment in which personality, American political culture, public opinion, and high politics came together to define the Eisenhower Administration's policy toward China. A sophisticated, multidimensional account based on prodigious, cutting edge research, this volume convincingly portrays Eisenhower's private belief that close relations between the United States and the People's Republic of China were inevitable and that careful consideration of the PRC should constitute a critical part of American diplomacy. Tucker provocatively argues that the Eisenhower Administration's hostile rhetoric and tough actions toward China obscure the president's actual views. Behind the scenes, Eisenhower and his Secretary of State, John Foster Dulles, pursued a more nuanced approach, one better suited to China's specific challenges and the stabilization of the global community. Tucker deftly explores the contradictions between Eisenhower and his advisors' public and private positions. Her most powerful chapter centers on Eisenhower's recognition that rigid trade prohibitions would undermine the global postwar economic recovery and push China into a closer relationship with the Soviet Union. Ultimately, Tucker finds Eisenhower's strategic thinking on Europe and his fear of toxic, anticommunist domestic politics constrained his leadership, making a fundamental shift in U.S. policy toward China difficult if not impossible. Consequently, the president was unable to engage congress and the public effectively on China, ultimately failing to realize his own high standards as a leader.
