A unique reinterpretation of democracy that shows how history's most vocal champions of democracy from Jean-Jacques Rousseau and Thomas Jefferson to John Rawls have contributed to a pervasive, anti-democratic ideology, effectively redefining democracy to mean "rule by the elites." The rise of global populism reveals a tension in Western thinking about democracy. Warnings about the "populist threat" to democracy and "authoritarian" populism are now commonplace. However, as Emily B. Finley argues in *The Ideology of Democratism*, dismissing "populism" as anti-democratic is highly problematic. In effect, such arguments essentially reject the actual popular will in favor of a purely theoretical and abstract "will of the people." She contends that the West has conceptualized democracy-not just its populist doppelgänger-as an ideal that has all of the features of a thoroughgoing political ideology which she labels "democratism." As she shows, this understanding of democracy, which constitutes an entire view of life and politics, has been and remains a powerful influence in America and leading Western European nations and their colonial satellites. Through a careful analysis of several of history's most vocal champions of democracy, including Jean-Jacques Rousseau, Thomas Jefferson, Woodrow Wilson, John Rawls, and American neoconservatives and liberal internationalists, Finley identifies an interpretation of democracy that effectively transforms the meaning of "rule by the people" into nearly its opposite. Making use of democratic language and claiming to speak for the people, many politicians, philosophers, academics, and others advocate a more "complete" and "genuine" form of democracy that in practice has little regard for the actual popular will. A heterodox argument that challenges the prevailing consensus of what democracy is and what it is supposed be, *The Ideology of Democratism* offers a timely and comprehensive assessment of the features and thrust of this powerful new view of democracy that has enchanted the West.

The politics of identity in the period of the early American republic involved the cultural production of a national self. In *Romances of the Republic*, Shirley Samuels examines revolutionary rhetoric from the 1790s through the 1850s primarily in novels, but also in poems, pamphlets, political cartoons, and sermons. How our dominant Christian worldview shapes everything from personal behavior to public policy (and what to do about it) Over the centuries, Christianity has accomplished much which is deserving of praise. Its institutions have fed the hungry, sheltered the homeless, and advocated for the poor. Christian faith has sustained people through crisis and inspired many to work for social justice. Yet although the word "Christian" connotes the epitome of goodness, the actual story is much more complex. Over the last two millennia, ruling elites have used Christian institutions and values to control those less privileged throughout the world. The doctrine of Christianity has been interpreted to justify the killing of millions, and its leaders have used their faith to sanction participation in colonialism, slavery, and genocide. In the Western world, Christian influence has inspired legislators to continue to limit women's reproductive rights and has kept lesbians and gays on the margins of society. As our triple crises of war, financial meltdown, and environmental destruction intensify, it is imperative that we dig beneath the surface of Christianity's benign reputation to examine its contribution to our social problems. *Living in the Shadow of the Cross* reveals the ongoing, everyday impact of Christian power and privilege on our beliefs, behaviors, and public policy, and emphasizes the potential for people to come together to resist domination and build and sustain communities of justice and peace. Paul Kivel is the award-winning author of *Uprooting Racism* and the director of the Christian Hegemony Project. He is a social justice activist and educator who has focused on the issues of violence prevention, oppression, and social justice for over forty-five years.

The American nineteenth century saw a largely rural nation confined to the Eastern Seaboard conquer a continent and spawn increasingly dense commercial metropolises. This time of unprecedented territorial and economic growth has long been thought to find its most sweeping visual equivalent in the period's landscape paintings. But, as Matthew N. Johnston shows, the age's defining features were just as clearly captured in, and motivated by, visual material mass-produced through innovations in printing technology. Illustrated railroad and steamboat guidebooks, tourist literature, reports of geological surveys, ethnographic studies: all of these new print vehicles brought new meanings to the interplay of time, space, and place as American continental expansion peaked. Instrumental to that project of national and industrial growth, these commercial and scientific publications introduced readers, travelers, and citizens to a changing North American landscape made more accessible by new travel routes blazed between 1825 and 1875. More fundamentally, as Johnston

shows in his nuanced analysis, by simulating new temporal frameworks through their presentation of landscape, these print materials established new models of consumption and new kinds of knowledge critical to expansion. Johnston relates these sources to traditional art historical subjects—the landscapes of the Hudson River school, luminist paintings by John Kensett and William Trost Richards, Native portraits painted by George Catlin, and photographs by Timothy O'Sullivan—to show how key discourses associated with expansion shifted away from picturesque strategies pairing imagery and narrative toward entirely new forms that gave temporal structure to viewers' experience of an emerging modernity. Revealing the crucial role of print and visual culture in shaping the nineteenth-century United States, *Narrating the Landscape* offers fresh insight into the landscapes Americans beheld and imagined in this formative era. *The Genius of Place* Bloomsbury Publishing USA

Rendezvous with Destiny Oxford University Press
“A first-rate work of insider history . . . A monumental accomplishment.” —National Review The election that changed everything: Craig Shirley's masterful account of the 1980 presidential campaign reveals how a race judged “too close to call” as late as Election Day became a Reagan landslide—and altered the course of history. To write *Rendezvous with Destiny*, Shirley gained unprecedented access to 1980 campaign files and interviewed more than 150 insiders—from Reagan's closest advisers and family members to Jimmy Carter himself. His gripping account follows Reagan's unlikely

path from his bitter defeat on the floor of the 1976 Republican convention, through his underreported “wilderness years,” through grueling primary fights in which he knocked out several Republican heavyweights, through an often-nasty general election campaign complicated by the presence of a third-party candidate (not to mention the looming shadow of Ted Kennedy), to Reagan’s astounding victory on Election Night in 1980. Shirley’s years of intensive research have enabled him to relate countless untold stories—including, at long last, the solution to one of the most enduring mysteries in politics: just how Reagan’s campaign got hold of Carter’s debate briefing books.

Index to Jewish Periodicals Oxford University Press In 1862, four years after Minnesota was ratified as the thirty-second state in the Union, simmering tensions between indigenous Dakota and white settlers culminated in the violent, six-week-long U.S.–Dakota War. Hundreds of lives were lost on both sides, and the war ended with the execution of thirty-eight Dakotas on December 26, 1862, in Mankato, Minnesota—the largest mass execution in American history. The following April, after suffering a long internment at Fort Snelling, the Dakota and Winnebago peoples were forcefully removed to South Dakota, precipitating the near destruction of the area's native communities while simultaneously laying the foundation for what we know and recognize today as Minnesota. In *North Country: The Making of Minnesota*, Mary Lethert Wingerd unlocks the complex origins of the state—origins that have often been ignored in favor of legend and a far more benign narrative of immigration, settlement, and cultural exchange. Moving from the earliest years of contact between Europeans and the indigenous peoples of the western Great Lakes region to the era of French and British influence during the fur trade and beyond, Wingerd charts how for two centuries prior to official statehood Native people and Europeans in the region maintained a hesitant, largely cobeneficial relationship. Founded on intermarriage, kinship, and trade between the two parties, this racially hybridized society was a meeting point for cultural and economic exchange until the western expansion of American capitalism and violation of treaties by the U.S. government during the 1850s wore sharply at this tremulous bond, ultimately leading to what Wingerd calls Minnesota's Civil War. A cornerstone text in the chronicle of Minnesota's history, Wingerd's narrative is augmented by more than 170 illustrations chosen and described by Kirsten Delegard in comprehensive captions that depict the fascinating, often haunting representations of the region and its inhabitants over two and a half centuries. *North Country* is the unflinching account of how the land the Dakota named Mini Sota Makoce became the State of Minnesota and of the people who have called it, at one time or another, home.

Birth of a Killer Nancy Allan This *Worldwide Struggle: Religion and the International Roots of the Civil Rights Movement* identifies a network of black Christian intellectuals and activists who looked abroad, even in other religious traditions, for ideas and practices that could transform American democracy. From the 1930s to the 1950s, they drew lessons from independence movements around for the world for an American racial justice campaign. Their religious perspectives and methods of moral reasoning developed theological blueprints for the classical phase of the Civil Rights Movement. The network included professors and public intellectuals Howard Thurman, Benjamin Mays, and William Stuart Nelson, each of whom met with Mohandas Gandhi in India; ecumenical movement leaders, notably YWCA women, Juliette Derricotte, Sue Bailey Thurman, and Celestine Smith; and pioneers of black Christian nonviolence James Farmer, Pauli Murray, and Bayard Rustin. People in this group became mentors and advisors to and coworkers with Martin Luther King and thus became links between Gandhi, who was killed in 1948, and King, who became a national figure in 1956. Azaransky's research reveals fertile intersections of worldwide resistance movements, American racial politics, and interreligious exchanges that crossed literal borders and disciplinary boundaries, and underscores the role of religion in justice movements. Shedding new light on how international and interreligious encounters were integral to the greatest American social movement of the last century, *This Worldwide Struggle* confirms the relationship between moral reflection and democratic practice, and it contains vital lessons for movement building today.

The American Film Institute Catalog of Motion Pictures Produced in the United States University of New Hampshire Press In this searing polemic, Lee Edelman outlines a radically uncompromising new ethics of queer theory. His main target is the all-pervasive figure of the child, which he reads as the linchpin of our universal politics of “reproductive futurism.” Edelman argues that the child, understood as innocence in need of protection, represents the possibility of the future against which the queer is positioned as the embodiment of a relentlessly narcissistic, antisocial, and future-negating drive. He boldly insists that the efficacy of queerness lies in its very willingness to embrace this refusal of the social and political order. In *No Future*, Edelman urges queers to abandon the stance of accommodation and accede to their status as figures for the force of a negativity that he links with irony, jouissance, and, ultimately, the death drive itself. Closely engaging with literary texts, Edelman makes a compelling case for imagining Scrooge without Tiny Tim and Silas Marner without little Eppie. Looking to Alfred Hitchcock’s films, he embraces two of the director's most notorious creations: the sadistic Leonard of North by Northwest, who steps on the hand that holds the couple precariously above the abyss, and the terrifying title figures of *The Birds*, with their predilection for children. Edelman enlarges the reach of contemporary psychoanalytic theory as he brings it to bear not only on works of literature and film but also on such current political flashpoints as gay marriage and gay parenting. Throwing down the theoretical gauntlet, *No Future* reimagines queerness with a passion certain to spark an equally impassioned debate among its readers.
