In Guatemala, the 36-year armed conflict from 1960 to 1996 claimed 200,000 lives, over two per cent of the population, and displaced a million more. In the 1970s and the 1980s the widespread and violent repression of social movements fighting for justice and human rights reached unimaginable proportions, involving assassinations, disappearances, and exile. Even parts of the Church, traditionally considered an ally of the powerful and the wealthy, were not spared this fate. Missionaries and Resistance in Guatemala chronicles the involvement of certain Catholic missionaries in popular and revolutionary movements. Based primarily on their own accounts, it narrates their gradual progression from conservative theological and pastoral practices to radical positions, informed by their solidarity with the poor and a theology of liberation. Their stories are situated in a wider geopolitical and ecclesial context.

Humans are lovers, and yet a good deal of pedagogical theory, Christian or otherwise, assumes an anthropology at odds with human nature, fixed in a model of humans as "thinking things." Turning to Augustine, or at least Augustine in conversation with Aquinas, Martin Heidegger, the overlooked Jesuit thinker Bernard Lonergan, and the important contemporary Charles Taylor, this book provides a normative vision for Christian higher education. A phenomenological reappropriation of human subjectivity reveals an authentic order to love, even when damaged by sin, and loves, made authentic by grace, allow the intellectually, morally, and religiously converted person to attain an integral unity. Properly understanding the integral relation between love and the fullness of human life overcomes the split between intellectual and moral formation, allowing transformed subjects--authentic lovers--to live, seek, and work towards the values of a certain kind of cosmopolitanism. Christian universities exist to make cosmopolitans, properly understood, namely, those persons capable of living authentically. In other words, this text gives a full-orbed account of human flourishing, rooted in a phenomenological account of the human as basis for the mission of the university.

Lost Souls Walter de Gruyter

In 1862, four years after Minnesota was ratified as the thirty-second state in the Union, simmering tensions between indigenous Dakota and white settlers culminated in the violent, six-week-long U.S.–Dakota War. Hundreds of lives were lost on both sides, and the war ended with the execution of thirty-eight Dakotas on December 26, 1862, in Mankato, Minnesota—the largest mass execution in American history. The following April, after suffering a long internment at Fort Snelling, the Dakota and Winnebago peoples were forcefully removed to South Dakota, precipitating the near destruction of the area's native communities while simultaneously laying the foundation for what we know and recognize today as Minnesota. In *North Country: The Making of Minnesota*, Mary Lethert Wingerd unlocks the complex origins of the state—origins that have often been ignored in favor of legend and a far more benign narrative of immigration, settlement, and cultural exchange. Moving from the earliest years of contact between Europeans and the indigenous peoples of the western Great Lakes region to the era of French and British influence during the fur trade and beyond, Wingerd charts how for two centuries prior to official statehood Native people and Europeans in the region maintained a hesitant, largely cobeneficial relationship. Founded on intermarriage, kinship, and trade between the two parties, this racially hybridized society was a meeting point for cultural and economic exchange until the western expansion of American capitalism and violation of treaties by the U.S. government during the 1850s wore sharply at this tremulous bond, ultimately leading to what Wingerd calls Minnesota's Civil War. A cornerstone text in the chronicle of Minnesota's history, Wingerd's narrative is augmented by more than 170 illustrations chosen and described by Kirsten Delegard in comprehensive captions that depict the fascinating, often haunting representations of the region and its inhabitants over two and a half centuries. *North Country* is the unflinching account of how the land the Dakota named Mini Sota Makece became the State of Minnesota and of the people who have called it, at one time or another, home.

The Genius of Place Penguin

The politics of identity in the period of the early American republic involved the cultural production of a national self. In *Romances of the Republic*, Shirley Samuels examines revolutionary rhetoric from the 1790s through the 1850s primarily in novels, but also in poems, pamphlets, political cartoons, and sermons.

In the basement of a Boston bookstore, Firmin is born in a shredded copy *Finnegans Wake*, nurtured on a diet of *Zane Grey*, *Lady Chatterley's Lover*, and *Jane Eyre* (which tastes a lot like lettuce). While his twelve siblings gnaw these books obliviously, for Firmin the words, thoughts, deeds, and hopes—all the literature he consumes—soon consume him. Emboldened by reading, intoxicated by curiosity, foraging for food, Firmin ventures out of his bookstore sanctuary, carrying with him all the yearnings and failings of humanity itself. It's a lot to ask of a rat—especially when his home is on the verge of annihilation. A novel that is by turns hilarious, tragic, and hopeful, *Firmin* is a masterpiece of literary imagination. For here, a tender soul, a vagabond and philosopher, struggles with mortality and meaning—in a tale for anyone who has ever feasted on a book...and then had to turn the final page. NOTE: This edition does not include illustrations.

Missionaries and Resistance in Guatemala University of Oklahoma Press

The Genius of Place examines how, after the War of 1812, concerns about the scale of the nation resulted in a fundamental reorientation of American identity away from the Atlantic or global ties that held sway in the early republic and toward more localized forms of identification. Instead of addressing the sweep of the nation, American authors, artists, geographers, and politicians shifted from the larger reach of the globe to the more manageable scope of the local and sectional. Paradoxically, that local representation became the primary mode through which early Americans construed their emerging national identity. This newfound cultural obsession with locality impacted the literary consolidation and representation of key American imagined places - New England, the plantation, the West - in the decades between 1816 and 1836. Apap's examination of the intersections between local and national representations and exploration of the myths of space and place that shaped U.S. identity through the nineteenth century will appeal to a broad, interdisciplinary readership.
