"A unique aspect of Introduction to Personal Finance is its pedagogical framework. Rather than force students to wade through page after page of densely written material that must fit within a limited number of chapters, this text offers fewer chapters with more topics.

The point of a topic-based text is to make financial literacy topics fun to learn, easy to read, and quick to digest. Each chapter and topic has been updated and examined for clarity and inclusivity, and revised as needed, to reflect the most recent data available at time of publication. Your interaction with and use of money is a lifetime journey. This text will help prepare you to successfully navigate the financial decisions in your life. We will provide you with the tools—both conceptual and functional—that will enhance your financial literacy and

capabilities. What do we mean by financial literacy? Some have described financial literacy as financial education or being financially knowledgeable. Some think financial literacy is the same as having a background in economics. Others define financial literacy as being a "streetwise consumer"—New First-time Homeowners Harvard Education Press. Many adults attend financial education classes to help them make more informed financial decisions, based on their knowledge of their financial situation available

cash or funds planned expenditures. This volume brings together scholars from the fields of adult education and financial literacy and covers topics that reveal the interrelatedness of the two fields. They show how concepts and knowledge about adult education can be utilized in and illuminate financial education, and they offer insights about how financial education, as an eminently practical subject, shows adults learning and putting their new knowledge into action. This is the 141st volume of this Jossey-Bass series. Noted for its

depth of coverage, it explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of adult and continuing education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

Fredrik deBoer exposes
the lie at the heart of our
educational system and
demands top-to-bottom
reform. Everyone agrees
that education is the key
to creating a more just
and equal world, and that

our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has

created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences,

progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we 'll never achieve this dream until the Cult of Smart is destroyed.
