The Major Works of John Cotta Duke University Press

This volume presents the first critical edition of the works of the early modern physician and thinker John Cotta, who boldly called for reform in both medical practice and the prosecution of witchcraft.

The Oxford Handbook of Witchcraft in Early Modern Europe and Colonial America African Books Collective

This volume is a collection based on the contributions to witchcraft studies of Willem de Blé court, to whom it is dedicated, and who provides the opening chapter, setting out a methodological and conceptual agenda for the study of cultures of witchcraft (broadly defined) in Europe since the Middle Ages. It includes contributions from historians, anthropologists, literary scholars and folklorists who have collaborated closely with De Blé court. Essays pick up some or all of the themes and approaches he pioneered, and apply them to cases which range in time and space across all the main regions of Europe since the thirteenth century until the present day. While some draw heavily on texts, others on archival sources, and others on field research, they all share a commitment to reconstructing the meaning and lived experience of witchcraft (and its related phenomena) to Europeans at all levels, respecting the many varieties and ambiguities in such meanings and experiences and resisting attempts to reduce them to master narratives or simple causal models. The chapter 'News from the Invisible World: The Publishing History of Tales of the Supernatural c.1660-1832' is available open access under a CC BY 4.0 license at [link.springer.com](https://link.springer.com).

Medicine and Society in Early Modern Europe The Feminist Press at CUNY

As we watch another agonizing attempt to shift the future of healthcare in the United States, we are reminded of the longevity of this crisis and how firmly entrenched we are in a system that doesn't work. *Witches, Midwives, and Nurses*, first published by the Feminist Press in 1973, is an essential book about the corruption of the medical establishment and its historic roots in witch hunters. In this new edition, Barbara Ehrenreich and Deirdre English have written an entirely new chapter that delves into the current fascination with and controversies about witches, exposing our fears and fantasies. They build on their classic exposé on the demonization of women healers and the political and economic monopolization of medicine. This quick history brings us up-to-date, exploring today's changing attitudes toward childbirth, alternative medicine, and modern-day witches.

On Reimagining Social Medicine from the South Abigail H. Neely explores social medicine's possibilities and limitations at one of its most important origin sites: the Pholela Community Health Centre (PCHC) in South Africa. The PCHC's focus on medical and social factors of health yielded remarkable success. And yet South Africa's systemic racial inequality hindered health center work, and witchcraft illnesses challenged a program rooted in the sciences. To understand Pholela's successes and failures, Neely interrogates the "social" in social medicine. She makes clear that the social sciences the PCHC used failed to account for the roles that Pholela's residents and their environment played in the development and success of its program. At the same time, the PCHC's reliance on biomedicine prevented it from recognizing the impact on health of witchcraft illnesses and the social relationships from which they emerged. By rewriting the story of social medicine from Pholela, Neely challenges global health practitioners to recognize the multiple worlds and actors that shape health and healing in Africa and beyond.

Consulting plant spirits for spiritual and psychological guidance and healing • Reveals how, by communing with the deva or spirit of a plant, we can call forth its medicine without even needing to ingest it • Includes wisdom from the devas of 13 herbs, such as rosemary, datura, and uva ursi • Empowers readers with the tools to develop their own inner resources for healing in relationship with the plant devas around them Each plant has a story to share with us, a healing story to guide us in trying times, a spirit medicine for the New Earth that is presently unfolding. Herbs are some of the most powerful allies we have for these transitional times--we just need to learn how to listen as they share their knowledge with us. In *Wisdom of the Plant Devas*, Thea Summer Deer reveals a new dimension of herbal medicine, one where the plant's spirit is consulted for guidance and healing beyond the physical. Examining the botany, modern and traditional uses, history, and folklore of 13 special herbs, such as rosemary, uva ursi, and datura, she shares divinations and messages from their devas, or plant spirits, explaining how these stories carry the herbs into our lives, letting them work their magic on us. Exploring herbal medicine from an energetic perspective, she reveals that by communing with the deva of a plant, we can call on the plant's physical, psychological, and spiritual medicine and guidance--without ingesting it or even being in its presence. Detailing the sacred space of a Medicine Wheel Garden, whether in a backyard or our imaginations, she connects us with the devas and empowers us to seek our own answers with their much-needed spiritual guidance and divinatory advice. Creating a bridge between botanical medicine and plant spirit medicine, she shows how by coming into community with the devas and co-creating with the world of nature, we can gain tremendous insights to help heal our hearts, our minds, and our spirits and consciously evolve as together we birth the New Earth.

Benjamin Christensen's *Häxan* (*The Witch*, 1922) stands as a singular film within the history of cinema. Deftly weaving contemporary scientific analysis and powerfully staged historical scenes of satanic initiation, confession under torture, possession, and persecution, *Häxan* creatively blends spectacle and argument to provoke a humanist re-evaluation of witchcraft in European history as well as the contemporary treatment of female "hysterics" and the mentally ill. In *Realizing the Witch*, Baxstrom and Meyers show how *Häxan* opens a window onto wider debates in the 1920s regarding the relationship of film to scientific evidence, the evolving study of religion from historical and anthropological perspectives, and the complex relations between popular culture, artistic expression, and concepts in medicine and psychology. *Häxan* is a film that travels along the winding path of art and science rather than between the narrow division of "documentary" and "fiction." Baxstrom and Meyers reveal how Christensen's attempt to tame the irrationality of "the witch" risked validating the very "nonsense" that such an effort sought to master and dispel. *Häxan* is a notorious, genre-bending, excessive cinematic account of the witch in early modern Europe. *Realizing the Witch* not only illustrates the underrated importance of the film within the canons of classic cinema, it lays bare the relation of the invisible to that which we cannot prove but nevertheless "know" to be there.

The essays in this Handbook, written by leading scholars working in the rapidly developing field of witchcraft studies, explore the historical literature regarding witch beliefs and witch trials in Europe and colonial America between the early fifteenth and early eighteenth centuries. During these years witches were thought to be evil people who used magical power to inflict physical harm or misfortune on their neighbours. Witches were also believed to have made pacts with the devil and sometimes to have worshipped him at nocturnal assemblies known as sabbaths. These beliefs provided the basis for defining witchcraft as a secular and ecclesiastical crime and prosecuting tens of thousands of women and men for this offence. The trials resulted in as many as fifty thousand executions. These essays study the rise and fall of witchcraft prosecutions in the various kingdoms and territories of Europe and in English, Spanish, and Portuguese colonies in the Americas. They also relate these prosecutions to the Catholic and Protestant reformations, the introduction of new forms of criminal procedure, medical and scientific thought, the process of state-building, profound social and economic change, early modern patterns of gender relations, and the wave of demonic possessions that occurred in Europe at the same time. The essays survey the current state of knowledge in the field, explore the academic controversies that have arisen regarding witch beliefs and witch trials, propose new ways of studying the subject, and identify areas for future research.

This subtle and powerful ethnography examines African healing and its relationship to medical science. Stacey A. Langwick investigates the practices of healers in Tanzania who confront the most intractable illnesses in the region, including AIDS and malaria. She reveals how healers generate new therapies and shape the bodies of their patients as they address devils and parasites, anti-witchcraft medicine, and child immunization. Transcending the dualisms between tradition and science, culture and nature, belief and knowledge, Langwick tells a new story about the materiality of healing and postcolonial politics. This important work bridges postcolonial theory, science, public health, and anthropology.

The Dark Wind provides a survey of witches around the world, their prehistoric origin and how society has viewed them throughout history. Folklorist Gary R. Varner explores the use of magic, spells and curses among indigenous groups as well as state approved religions such as those observed in ancient Rome and Greece, and how even contemporary Christianity uses many of the same "magic" combinations. Also examined is the current "witch craze" in several countries where thousands are being killed as witches, the underlying reasons for this tragedy and the history of anti-witchcraft laws. The Dark Wind is a book for everyone interested in anthropology, archaeology, ancient history, religion and the occult. Illustrated with contemporary woodcuts and drawings. The author is a member of the American Folklore Society and the Foundation for Mythological Studies.
