In this stimulating, thought-provoking guide, a noted sculptor and teacher demonstrates how to

discover a rich new design source in the abstractions inherent in natural forms.

Through systematic study of such properties as line, form, shape, mass, pattern, light and dark, space, proportion, scale, perspective, and color as they appear in nature, students can learn to utilize the infinite variety and

diversity of those elements as a wellspring of creative abstraction. The author invites students to learn the necessary techniques through a series of projects devoted to exploring and drawing plants, animals, birds, landscapes, seascapes, skies, and more. Lines of growth and structure, water and liquid forms, weather

---

and atmospheric patterns, luminosity in plants and animals, earth colors and lightning are among the sources of abstraction available to the artist who is aware of them. This book will train you to see and use these elements and many more. An intriguing blend of art, psychology, and the natural sciences, *Abstraction in Art and Nature* is profusely illustrated with over 370 photographs, scientific illustrations, diagrams, and reproductions of works by the great masters. It not only offers a mind-stretching new way of learning and teaching basic design, but deepens our awareness of the natural environment. In short, Mr. Hale's

book is an indispensable guide that artists, teachers, and students will want to have close at hand for instruction, inspiration, and practical guidance. *200 Projects to Get You Into Art School* Schiffer Craft This volume is a guide to the main characteristics, movements and regional variants of a millennium of Western architecture, from the early Romanesque to the most recent contemporary trends.

Abstract Textile Designs Prestel Publishing From the early Renaissance through Baroque and Romanticism to Cubism, Surrealism, and Pop, these canonical works of Western Art span eight centuries and a vast range of subjects. Here are the sacred and the scandalous, the minimalist and the opulent, the groundbreaking and the conventional. There are paintings that captured the feeling of an era and those that signaled the beginning of a new one. Works of art that were immediately recognised for their genius, and others

---

that were at first met with resistance. All have stood the test of time and in their own ways contribute to the dialectic on what makes a painting great, how notions of art have changed, to what degree art reflects reality, and to what degree it alters it. Brought together, these great works illuminate the changing preoccupations and insights of our ancestors, and give us pause to consider which paintings from our own era will ultimately join the canon.
