Wocn Guidelines In Skin Care

My reasons for pursuing a career as a wound, ostomy and continence (WOC) nurse stems from my personal experience of becoming an ostomate in December 1994. I was somewhat familiar with the potential of having an ostomy placed after growing up with my ostomy patient father and having Crohn's disease since I was 16.

They also care for patients who have ostomies. Wounds may be surgical in nature or may be the result of skin breakdown, disease or injury.

Document Library | WOCN Society

The skin barrier opening should be adjusted with each pouch change to be one-eighth of an inch larger than the stoma. The skin should be cleaned with water and allowed to dry.

Antibacterial soaps are not recommended because they can affect the normal flora of the skin. The pouch should be placed on dry skin.
