Gender inequality comes at a significant economic cost as it hinders productivity and economic growth globally, countries are losing \$160 trillion in wealth because of differences in lifetime earnings between women and men. In addition, an IMF staff note paper showed that the obstacles to women entering the labour market have more economic cost than was believed to be the case, and benefits from reducing the barrier of gender inequality are likely to be larger than initially thought. Women and the Economy presents a comprehensive economic analysis of women's issues and the economic factors that have changed their lives – from marriage and fertility to work and pay. This engaging textbook examines topics such as gender wage differentials, changes in marriage markets and fertility, and the rise of women's labor force activity.

Family economics - Wikipedia

Women's economic empowerment is affected by economic policies, including how governments raise and spend taxes, and shape trade and investment deals. This is because these policies have a direct impact on the quality and availability of public services, which women are dependent on because of their unpaid care work, and which are vital in tackling violence against women and girls .

The woman performs the role of wife, partner, organizer, administrator, director, re-creator, disburser, economist, mother, disciplinarian, teacher, health officer, artist and queen in the family at the same time. Apart from it, woman plays a key role in the socio-economic development of the society.

Land is perhaps the most important economic asset; women account for only 12.8 per cent of agricultural landholders in the world. Women and girls suffer most from the dearth of safely managed water and sanitation. Women and girls are responsible for water collection in 80 per cent of households without access to water on premises. Menstrual hygiene management is difficult in the absence of water, soap and gender-responsive sanitation facilities, whether at home, school or work.
