Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as

atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in *Invisible Women* † ‹ , diving into women ' s lives at home, the workplace, the public square, the doctor ' s office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable expos é that will change the way you look at the world.

The impact of combat on service members' mental health has received considerable attention both in the popular press and in scholarly publications. Yet few books have focused on

systematic, evidence-based attempts at preventing mental health problems and enhancing service members' well-being and resilience. This book is intended to fill that gap. The editors have gathered leading clinicians and researchers in military mental health to examine how mental health providers and military leaders can best moderate the negative impact of combat. Contributors discuss the importance of individual screening, training, peer support, leadership and organizational policies, as well as the development and implementation of large-scale mental health programs that incorporate these elements and more. The editors promote a broad occupational health model of prevention and include the latest research on delivering mental health services in pre-deployment, in-theater settings, and VA hospitals. The psychological health of not only service members but also

military families is approached as an integral aspect of deployment psychology. The result is a ground-breaking book that emphasizes what we know-and don't know-about evidence-based interventions. It represents the first comprehensive review of mental health interventions across the deployment cycle and will help guide the field of military psychology in developing a much-needed support system for service members in the years to come.

Deployment Psychology NYU Press Documents, diaries, memoirs, and interviews evoke the atmosphere of wartime Hawaii in a work that discusses the experiences of American soldiers based on Hawaiian islands during World War II. Collateral Damage Emerald Group Publishing Is Trauma a transhistorical, transnational phenomenon? Gender and Trauma challenges the standard history that has led to our contemporary understanding of psychological trauma to answer this question, and to explore the impact of gender in the experience and

understanding of emotional distress. Bringing together eleven case studies from all over the world, it draws on methods from history, gender and communication studies to consider how trauma has been understood over the 20th and 21st centuries. Encompassing histories from Australia, Britain, Indonesia, Italy, the Soviet Union, Timor Leste, the United States and Vietnam, these examples demonstrate how gender and trauma are inextricably linked, and how the term 'trauma' has evolved over time. With chapters on war, political repression, displacement, rape and childbirth, the cases showcased in this volume highlight two pivotal transformations across the 20th century. First, the transformation of the trauma sufferer from perpetrator to victim, and second, the increased understanding of psychological consequences of sexual assault and domestic violence. Together, these diverse stories yield a more nuanced picture of what trauma is, how we have understood it alongside gender in the past, and how this affects our understanding of it in the present. Gender and the Military Createspace Independent Publishing Platform The #1 international best seller In Lean In, Sheryl Sandberg reignited the conversation around women in the workplace. Sandberg is chief operating officer of Facebook and coauthor of Option B with Adam Grant. In 2010, she gave an electrifying TED talk in which she described how women unintentionally

hold themselves back in their careers. Her talk, which has been viewed more than six million times, encouraged women to “sit at the table,” seek challenges, take risks, and pursue their goals with gusto. *Lean In* continues that conversation, combining personal anecdotes, hard data, and compelling research to change the conversation from what women can’t do to what they can. Sandberg provides practical advice on negotiation techniques, mentorship, and building a satisfying career. She describes specific steps women can take to combine professional achievement with personal fulfillment, and demonstrates how men can benefit by supporting women both in the workplace and at home. Written with humor and wisdom, *Lean In* is a revelatory, inspiring call to action and a blueprint for individual growth that will empower women around the world to achieve their full potential.

Voice and Agency The Unwomanly Face of War Analyzes the U.S. and international efforts in Afghanistan and offers detailed recommendations for dealing with the precarious situation leading up to the 2014 transition to Afghan control and beyond. Military Law Review National Academies Press The white power movement in America wants a revolution. It has declared all-out war against the federal government and its agents, and has carried out—with military precision—an escalating campaign of terror against the American public. Its soldiers are not lone wolves

but are highly organized cadres motivated by a coherent and deeply troubling worldview of white supremacy, anticommunism, and apocalypse. In *Bring the War Home*, Kathleen Belew gives us the first full history of the movement that consolidated in the 1970s and 1980s around a potent sense of betrayal in the Vietnam War and made tragic headlines in the 1995 bombing of the Oklahoma City federal building. Returning to an America ripped apart by a war that, in their view, they were not allowed to win, a small but driven group of veterans, active-duty personnel, and civilian supporters concluded that waging war on their own country was justified. They unified people from a variety of militant groups, including Klansmen, neo-Nazis, skinheads, radical tax protestors, and white separatists. The white power movement operated with discipline and clarity, undertaking assassinations, mercenary soldiering, armed robbery, counterfeiting, and weapons trafficking. Its command structure gave women a prominent place in brokering intergroup alliances and giving birth to future recruits. Belew’s disturbing history reveals how war cannot be contained in time and space. In its wake, grievances intensify and violence becomes a logical course of action for some. *Bring the War Home* argues for awareness of the heightened potential for paramilitarism in a present defined by ongoing

war.

DIVIn The Body of War, Dubravka Žarkov analyzes representations of female and male bodies in the Croatian and Serbian press in the late 1980s and in the early 1990s, during the war in which Yugoslavia disintegrated. Žarkov proposes that the Balkan war was not a war between ethnic groups; rather, ethnicity was produced by the war itself. Žarkov explores the process through which ethnicity was generated, showing how lived and symbolic female and male bodies became central to it. She does not posit a direct causal relationship

between hate speech published in the press during the mid-1980s and the acts of violence in the war. Instead, she argues that both the representational practices of the “ media war ” and the violent practices of the “ ethnic war ” depended on specific, shared notions of femininity and masculinity, norms of (hetero)sexuality, and definitions of ethnicity. Tracing the links between the war and press representations of ethnicity, gender, and sexuality, Žarkov examines the media ’ s coverage of two major protests by women who explicitly identified themselves as mothers, of sexual violence against women and men during the war, and of women as militants. She draws on contemporary feminist analyses of violence to scrutinize international and local feminist writings on the war in former Yugoslavia. Demonstrating that some of the same essentialist ideas of gender and sexuality used to produce and reinforce the significance of ethnic differences during the war often have been invoked by feminists, she points out the political and theoretical drawbacks to grounding feminist strategies against violence in ideas of female victimhood.

The Moral Equivalent of War Routledge

The Soviet Union was the first nation to allow women pilots to fly combat missions. During World War II the Red Air Force formed three all-female units -- grouped into separate fighter, dive bomber, and night bomber regiments -- while also recruiting other women to fly with mostly male units. Their amazing story, fully recounted for the first time by Reina Pennington,

honors a group of fearless and determined women whose exploits have not yet received the recognition they deserve. Pennington chronicles the creation, organization, and leadership of these regiments, as well as the experiences of the pilots, navigators, bomb loaders, mechanics, and others who made up their ranks, all within the context of the Soviet air war on the Eastern Front. These regiments flew a combined total of more than 30,000 combat sorties, produced at least thirty Heroes of the Soviet Union, and included at least two fighter aces. Among their ranks were women like Marina Raskova ("the Soviet Amelia Earhart"), a renowned aviator who persuaded Stalin in 1941 to establish the all-women regiments; the daredevil "night witches" who flew ramshackle biplanes on nocturnal bombing missions over German frontlines; and fighter aces like Liliia Litviak, whose twelve "kills" are largely unknown in the West. Here, too, is the story of Alexander Gridnev, a fighter pilot twice arrested by the Soviet secret police before he was chosen to command the women's fighter regiment. Going well beyond the handful of uncritical, journalistic, or poorly documented previous accounts, Pennington draws upon personal interviews and the Soviet archives to detail the recruitment, training, and combat lives of these women. Deftly mixing anecdote with analysis, her work should find a wide readership among

aviation, World War II, or the Russian military, as well as anyone concerned with the contentious debates surrounding military and combat service for women.

Integrating the US Military Random House Trade Paperbacks

Introduces the topic of women in the American military, including entries on individuals, events, laws, organizations, and wars

Reader's Guide to Military History American Psychological Assn

"Integrating the US Military is an edited collection that examines the US Army's role and place in progressive social change through the lens of the military experience of African Americans, women, and gays since World War II. By making this long overdue comparison, the editors argue this anthology demonstrates how the challenges launched against the racial, gender, and sexual status quo in the years after World War II transformed overarching ideas about power, citizenship, and America's role in the world. This anthology's major contribution is synthesizing recent scholarly work on the history of minorities and women in the US military. It does so by examining connections between GIs and civilian society in the context of ideologies of race, gender, and sexuality. Given the militarization of American society since World War II, revealing the links between these legally marginalized groups within the Armed Services is historically significant in its own right. At the same

time, this comparison also sheds new light on a broad range of issues that affected civilian society, such as affirmative action, integration, marriage laws, and sexual harassment. Integrating the US Military is a book designed for college students, military professionals, policy makers, and general readers. Allowing readers to view the history of several civil rights movements within the Armed Forces will prompt them to rethink the way they understand the history of social movements. It will also help them to better understand the relationship between the military and American society. Finally, readers will gain a historical perspective on recent debates about the rights of gays in the military and the implications of deploying women in combat."--Provided by publisher.

Is peace an aberration? The bestselling author of *Paris 1919* offers a provocative view of war as an essential component of humanity. NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW AND THE EAST HAMPTON STAR "Margaret MacMillan has produced another seminal work. . . . She is right that we must, more than ever, think about war. And she has shown us how in this brilliant, elegantly written book. " —H.R. McMaster, author of *Dereliction of Duty* and

Battlegrounds: The Fight to Defend the Free World The instinct to fight may be innate in human nature, but war—organized violence—comes with organized society. War has shaped humanity's history, its social and political institutions, its values and ideas. Our very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has influenced human society and how, in turn, changes in political organization, technology, or ideologies have affected how and why we fight. *War: How Conflict Shaped Us* explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan reveals the many faces of war—the way it has determined our past, our future,

our views of the world, and our very conception of ourselves.

Handbook of the Sociology of the Military JHU Press

Hedwig Dohm (1831-1919) was a thinker and writer significantly ahead of her time. She championed women's rights in Germany and criticized with acerbic wit the social, political, and familial inequities inherent in gender relationships at the time of the first wave of the women's movement. Her novella *Become Who You Are* is about a woman, Agnes Schmidt, whose husband has died and who is grappling with finding an identity for herself as an aging widow--reflecting the restrictions imposed especially on aging, widowed women who often yearn for a life and identity of their own. Also included here is the English translation of Dohm's essay, "The Old Woman," which is a compelling call for women to resist the social, intellectual, psychological, and physical restraints placed on women of Dohm's time.

Gender roles are nowhere more prominent than in war. Yet contentious debates, and the scattering of scholarship across academic disciplines, have obscured understanding of how gender affects war and vice versa. In this authoritative and lively review of our state of knowledge, Joshua Goldstein assesses the possible explanations for the near-total exclusion of women from combat forces,

through history and across cultures. Topics covered include the history of women who did fight and fought well, the complex role of testosterone in men's social behaviours, and the construction of masculinity and femininity in the shadow of war. Goldstein concludes that killing in war does not come naturally for either gender, and that gender norms often shape men, women, and children to the needs of the war system. Illustrated with photographs, drawings, and graphics, and drawing from scholarship spanning six academic disciplines, this book provides a unique study of a fascinating issue.

This is the first comparative, cross-national study of the participation of women in the armed forces of NATO countries. Along side an analysis of this key topic stands a critique of existing theoretical models and the proposal of a revised analytical framework. Unlike previous works this new study employs mixed-methodological research design combining quantitative and qualitative data - a large N-analysis based on general policies and statistical information concerning every country in the sample with more in-depth case-studies. This volume includes original empirical data regarding the presence of women in the armed forces of NATO countries, proposes an index of 'gender inclusiveness' and assesses the factors that affect women's military roles. The book also presents two new key case studies - Portugal and the Netherlands - based on both documentary sources and in-depth interviews of both men and women officers in the two countries. This book will be of great interest to all students and scholars of strategic studies, gender and women studies and military history.

Across history, the condition has been called soldier's heart, shell shock, or combat fatigue. It is now increasingly common as our service men and women return from Iraq, Afghanistan, and other ongoing combat

zones. Since 1990, Veterans' centers here have treated more than 1.6 million affected men and women, including an estimated 100,000 from the Gulf War and an untallied total from the Iraq front and fighting in Afghanistan. The number also includes some 35,000 World War II veterans, because PTSD does not fade easily. Regardless of the months, years, and even decades that have passed, the traumatic events can flash back as seemingly real as they were when they occurred. In *Haunted by Combat* Paulson and Krippner range across history and into current experiences and treatments for this haunting disorder.--They take us into the minds of PTSD-affected veterans, as they struggle against the traumatic events lingering in their minds, sometimes exploding into violent behavior. The authors explain how and why PTSD develops and how we can help service members take the steps to heal today.
