Are you a forager? If you dream of being more connected to the landscape and all the bounty it can provide, this invaluable guide from the team who created *A Handbook of Scotland's Trees* will inform you about plants from fields, woods and seashores, as well as firewood and seaweeds. Here you'll discover well-tried recipes from Scottish kitchens – from nettle haggis to blueberry muffins – and a wealth of woodland and hedgerow materials you can use in the garden or home. The information is drawn together from expert members of both Reforesting Scotland and the Scottish Wild Harvests Association (SWHA), trusted custodians of our environment and natural resources. Many are professionals

in the field, and all of them know their plants and materials thoroughly from years or decades of experience. Their entries abound in useful information on habitat, history, uses, lore, and how to distinguish a useful plant from similar species that are not. **Fireplaces and Wood Stoves** New Society Publishers  
This fully revised and updated book is the authoritative guide on how to look after your old house – whether it is a timber-framed medieval cottage, an eighteenth-century town house or a Victorian or Edwardian terrace. Written in association with The Society for the Protection of Ancient Buildings, the authors' approach is one of respect, restraint and repair rather than 'restoration', which can so easily and permanently destroy the special qualities of an old building. From the foundations to the roof, from the need for modern services to traditional paintwork and finishes, from windows and doors to breathability and damp in walls and floors, this handbook provides informed practical guidance. It is essential reading on maintenance and repair for all those with an old house. **The Woodburner's Companion** Craftsman Book Company
