The Natural Law of the Universe is be who you were born to be, take what you need and leave the rest. I got sick from the sulphites in lemon juice then I started getting headaches from something. I think it was aspartame in pop. I got Dr. Hulda Clark's book Cure for all Cancers and when I read it, I thought she was obsessed with being pure away from all the chemicals in industrial products but she did what nobody else has done. She catalogs almost every product in existence and tells you what's wrong with it. The modern capitalist industries will not tell you if their products contain materials that are toxic to your health. You have to learn these things for yourself then decide how dangerous all that stuff is and if it's a risk to your longevity and quality of life.

Wood Pellet Heating Systems is a comprehensive handbook covering all aspects of wood pellet heating technology. The use of wood pellets as an alternative heating fuel is already well established in several countries and is becoming widespread as fossil fuel prices continue to rise and awareness of climate change grows. Wood pellets are a carbon-neutral technology, convenient to use, and can easily be integrated into existing central heating systems or used in independent space heaters. This fully-illustrated and easy-to-follow guide shows how wood-pellet heating works, the different types of systems – from small living room stove systems to larger central heating systems for institutions – how they are installed, and even how wood pellets are manufactured. Featuring examples from around the world, it has been written for heating engineers and plumbers who are interested in installing systems, home owners and building managers who are considering purchasing a system, advanced DIYers, building engineers and architects, but will be of interest to anyone who requires a clear guide to wood pellet technology.
