This fully revised and updated book is the authoritative guide on how to look after your old house – whether it is a timber-framed medieval cottage, an eighteenth-century town house or a Victorian or Edwardian terrace. Written in association with The Society for the Protection of Ancient Buildings, the authors' approach is one of respect, restraint and repair rather than 'restoration', which can so easily and permanently destroy the special qualities of an old building. From the foundations to the roof, from the need for modern services to traditional paintwork and finishes, from windows and doors to breathability and damp in walls and floors, this handbook provides informed practical

guidance. It is essential reading on maintenance and repair for all those with an old house. Complete Guide to Building Log Homes Craftsman Book Company
Dirk Thomas, experienced woodburner and chimney sweep, is the perfect guide to the ins and outs of the many ways available to burn wood for heat. He discusses the fuel value of various woods, how to buy firewood and get the most heat from it, the environmental impact of woodburning and a variety of chimney and flue arrangements. Throughout, the emphasis is on woodburning safety. Even knowledgeable woodburners will gain from his detailed descriptions of woodburning installations, which are.

"Natural Home Heating" is the first comprehensive guide to

heating your home with renewable energy sources. Greg Pahl offers a well-organized, easy-to-understand tour of all available home-heating options, including traditional oil and gas furnaces, wood stoves and masonry heaters, active and passive solar systems, and heat pumps. Included is everything you need to know about the fuels, systems, technologies, costs, and advantages and disadvantages of each option. Pahl teaches homeowners how to retrofit existing heating systems and choose renewable replacements, or design an entirely new house that can be heated comfortably with minimal environmental and financial impact. Consider: - 95% of American homes are heated with fossil fuels. - Oil and gas prices are up by more than 20% as supplies dwindle and sources become less reliable. - Home heating costs could double or even triple in the event of a fuel crisis. - The fossil

fuel economy is unsustainable. - There are viable, clean, healthy, and affordable home heating alternatives! Learn how to burn environmentally friendly bio-diesel fuels, not just in your car, but in your furnace. Find out how a ground-source heat pump works and why it can achieve 400% heating efficiency. Discover what it takes to make burning wood truly sustainable. Natural Home Heating explains all these details and more, making it unique in the marketplace.
