Microsoft Word Templates

Microsoft Office Word is traditionally used for creating text or word documents, making it one of the earliest tools used for a software documentation template. It allows the user to type text

and add more comments via additional text boxes, paste, edit and format visuals (only a few options, for something more advanced - use an external image editor).

Software Design Document (SDD) Template

A template is a Microsoft Word document that has some formatting in place, such as fonts, logos, and line spacing.

Templates exist for many types of documents, for example, party invitations, flyers, and resumes. They can be used as a starting point when you want to create a specific type of document without starting from scratch.

How to Create and Use Microsoft Word Templates

Microsoft's Word

document templates allow you to quickly create a flyer for your next neighborhood block party or announce an upcoming sale for your business, design a brochure for your restaurant that gets your customers' mouths watering or inform a potential patient about important medical information.

Word templates

Software Design Document (SDD) Template Software design is a process by which the software requirements are translated into a representation of software components, interfaces, and data necessary for the implementation phase. The SDD shows how the software system will be
